Re: Submission of SBC Michigan's Response to the MPSC's Competitive Market Conditions Survey MPSC Case No. U-12320

Dear Ms. Kunkle

Attached please find SBC's response to the Michigan Public Service Commission's Information/Data Request on Competitive Market Conditions and confidential CD.

Please note that confidential documents related to SBC's response will be filed under separate cover.

Should you have any questions, please feel free to call.

Very truly yours,

? Anita Parent

Michigan Public Service Commission
6th Information/Data Request
Competitive Market Conditions
January 14, 2005

The following information/data request is being sent for SBC Michigan operations. This information will assist the Michigan Public Service Commission in evaluating the state of local competition in the telecommunications industry in Michigan. Your participation in this survey is very important to provide a realistic and accurate analysis of the state of competition in Michigan. This information is being collected with December 31, 2004 as the cut off date for the data with the information to be submitted to the Michigan Public Service Commission Staff by February 28, 2005. The standard Commission procedures for protecting confidential and/or proprietary information are to be followed and if you are submitting information that you feel is confidential and /or proprietary, this information can be marked as such and filed with the Executive Secretary of the Commission. **Please indicate clearly on the document which information is deemed confidential from the information that is not.**

By February 28, 2005, please submit your response to:

Ms. Mary Jo Kunkle
Executive Secretary
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

If you have any questions about this survey, please contact David Flees at 517-241-6202 or e-mail at dmflees@michigan.gov.

For SBC (Michigan Only) :

Name of Contact Person regarding this survey: Anita Parent

Telephone Number of Contact Person: 313 496-1590

E-mail address of Contact Person: ap2356@sbc.com

1. Please specify the number of access lines served today by competitors by CLEC and totals for all CLECs as follows:

For the Period Ending December 31, 2004

	# of Residential Access Lines Served	# of Business Access Lines Served	Total Access Lines Served
1. Lines Served via Resale of ILECs service	4,844	18,474	23,318
2. Lines Served via unbundled network facilities	69,966	127,349	197,315
3. Lines Served via UNE Platform	901,079	216,798	1,117,877
4. Total Lines Served via SBC Facilities (Lines 1+2+3)	975,889	362,621	1,338,510
5. Estimated Lines Served via CLEC own facilities (non-DSL)	*125,183	*611,188	*736,371
6. xDSL	1,189	3,138	4,327
Total Lines Served (Lines 4+5+6)	1,102,261	976,947	2,079,208

*If estimates are used please footnote this information and include what estimating procedure is being used (i.e., 911 listings).

Estimated Lines Served via CLEC own facilities (non-DSL) is based on CLEC trunks in-service times 2.75 (estimated lines per trunk) minus unbundled loops.

For detail by CLEC, please see: **Attachment 1- Resold Lines**
Attachment 1- Unbundled Loops
Attachment 1 – UNEP Loops
Attachment 1 – DSL Loops
(Attachment 1 is confidential)

Notes to Number Two:
SBC Midwest UNE residential and business split supplied from CABS data based on loop type as specified by the CLECs

**For the definitions of these items, please refer to the FCC's definitions as set forth in the footnotes of the CCB Survey on the State of Local Competition, and of Broadband

Deployment to Residential Customers which have been partially captured and included as attachment A to this survey.

2. Please provide the information requested in item #1 in total for all CLECs by geographic area (e.g., by LATA, wire center or other geographic market area as available).

For Detail by Geographic Area, please see: Attachment 2 – Resold Lines
Attachment 2 – UNE Loops
Attachment 2 – UNEP Loops
Attachment 2 – DSL Loops
(Attachment 2 is confidential)

-Bypass estimates are not available below the state aggregate level.

3. Specify by competitor the number of central offices at which each provider is collocated and the total number of lines that could be accessed by a competitor in each of these locations.

See Attachment 3 - CLEC Collocation
(Attachment 3 is confidential)

4. For SBC Michigan, specify the following information for the time period: December 31, 2004: total number of access lines served, access lines served by LATA (or market area), total revenue, revenue by component (residential local revenue, business local revenue, residential intraLATA toll revenue, business intraLATA toll revenue, interstate network access revenue, intrastate network access revenue, local interconnection revenue, other revenue). **For revenue figures, if a net amount is used, please include both numbers.

See Attachment 4 – Acc Lns by LATA
Attachment 4 – Acc Lns by WC
Attachment 4 – Revenue
(Attachment 4 is Confidential)
Attachment 4 Public – Total Access Lines

Attachment A

Definitions/Notes to be used when completing the survey responses for number of lines:

For voice grade lines for purposes of this survey:

Include vs. exclude: report all lines and channels that connect directly to an end user premises at one end and, at the other end, (directly or indirectly) to a carrier switch or to a network that carries traffic to the public switched telephone network. For example:

include: - UNE loops provided to other communications carriers even if those carriers were not using those lines to provide service to end users.
- fixed wireless channels
- symmetric and asymmetric xDSL lines that carried customer voice and data to internet protocol, ATM based, or circuit switched networks whence traffic reached the public switched telephone network.
- dedicated lines that connected to an end user at one end, passed through your switch or switching center, and thence connected to another communication carrier's switch or network that carries traffic to the public switched network.

exclude:
- lines provided to carriers that were used for interoffice trunking.
- private lines that connected one customer location directly to another.
- lines not in service even if the lines were on order.
- company official lines.
- mobile satellite, cellular & PCS telephone service.
- lines between your switching center and internet protocol, ATM or circuit switched networks, where you already are reporting the portion of the line between the end user and your switching center, even if you multiplexed those lines and provided higher capacity lines between your switching center and those networks.
- lines that customers cannot use to place calls to subscribers of ordinary telephone service.

Residential vs. non-residential vs. UNE loop: Classify lines as residential only if the line terminates with a residential end user. Exclude lines that terminate with business, government, education, shared tenant system, institutional and pay telephone customers. Count a UNE loop as in service if it has been provided to and is being billed to the competing carrier regardless of whether that carrier has the line in service. Classify lines provided for resale as residential vs. non-residential according to the tariff/price list under which the service is provided.
