Lansing, MI 48909-7721

Dear Ms. Janssen:

SEMCO ENERGY GAS COMPANY has collected the information you requested regarding pipe and fitting engineering specifications for the Belle River lateral serving Detroit Edison's Belle River Power Plant. Please see the detail on pressure ratings and pipe specifications noted below:

Item	Pressure or Pressure Rating
Stated Design Pressure	974 psig
Maximum Allowable Operating Pressure (MAOP)	974 psig
Valve and Fittings	600 ANSI (or 1440 psig)
Pipe	API-5L, 1995 Grade X-52
Note: Pipe information provided on Tubular Products Certified Test Report	(52,000 psig specified minimum yield strength) ERW High Test Line Pipe - Prime Stock 16" O.D. x .312" Wall Thickness

This information was provided to SEMCO ENERGY GAS COMPANY by Great Lakes Gas Transmission Company. I believe this covers all of the parameters you were interested in. Please let me know if you require any further information to complete your file; my telephone number is (810) 987-7900, extension 3086.

Sincerely,

Annette Gardiner
Manager of Engineering
