STATE OF MICHIGAN
BEFORE THE MICHIGAN PUBLIC SERVICE COMMISSION

In the matter of the application of)
EagleNet, Inc., to amend its license to)
provide basic local exchange service by)
expanding its geographic service area to)
include all the zone and exchange areas)
throughout the state of Michigan.)

Case No. U-14894

Application for Temporary and Permanent License Expansion

EagleNet, Inc. (“EagleNet”), by and through its attorneys Fraser Trebilcock Davis & Dunlap, P.C., hereby files this Application pursuant to Sections 301 and 302 of the Michigan Telecommunications Act (“MTA”), as amended, MCL 484.2101 et seq., seeking to temporarily and permanently amend its license to provide basic local exchange service to include all the zone and exchange areas throughout the state of Michigan. In support thereof, EagleNet represents as follows:

1. EagleNet is a privately-held Michigan corporation with principal offices located at 5222 33rd Street SE, Grand Rapids, MI 49512. EagleNet is a licensed provider of basic local exchange service, and is a wholly owned subsidiary of The Iserv Company, LLC (“Iserv”) who will continue to provide financial, technical and managerial support for EagleNet. Iserv is one of the largest independent Internet Service Providers (“ISP”) in the Midwest and is funded by private investors. Since its beginnings in 1995 as a local ISP, Iserv (www.iserv.net) has grown rapidly as it has expanded the services it provides. Iserv’s Tier 1 Data Center is one of the leading facilities of its kind in North America, with redundant and reliable networks, and engineering and design expertise. Iserv’s service offerings include Internet and Network Access (dial-up, accelerated dial-up, ISDN, DSL, dedicated lines, virtual private networks), Data Center

Services (website hosting, server hosting, application hosting, virtual mail server), and Website Design and Development. Finally, Iserv is one of the largest providers of DSL services in the state of Michigan, providing DSL service in the four (4) lower peninsula LATAs in both SBC and Verizon exchanges. In December, 2005, Iserv completed its 14th acquisition, including properties in Michigan, Illinois, and Ohio.

2. In its October 24, 2000 order in Case No. U-12575, attached as **Exhibit A**, the Commission granted EagleNet a license to provide basic local exchange service in the zone and exchange areas of Ameritech Michigan, Verizon North Inc., and Contel of the South, Inc., d/b/a Verizon North Systems, in the Grand Rapids LATA.

3. Section 101 of the MTA, as amended, promotes competition and encourages the entry of new parties into existing service territories. MCL 484.2101. EagleNet has recently recognized additional opportunities to serve customers outside of the Grand Rapids LATA. Indeed, EagleNet intends to acquire, and has entered into a definitive agreement to acquire, JAS Networks, Inc. ("JAS Networks"), a competitive local exchange carrier presently providing DSL services in the Battle Creek, Kalamazoo, and Grand Rapids areas. In its February 1, 2002 order in Case No. U-13179, attached as **Exhibit B**, the Commission granted JAS Networks a license to provide basic local exchange service in all the exchange areas currently served by Ameritech Michigan, Verizon North Inc., and Contel of the South, Inc., d/b/a Verizon North Systems, in the lower peninsula of the state. EagleNet seeks to amend the geographic scope of its license to include all the areas licensed by JAS Networks as well as all the remaining areas of the state. Consequently, EagleNet proposes to offer basic local exchange service to customers located in the zone and exchange areas throughout the state of Michigan. Doing so will help to promote competition among service providers in Michigan.

4. In this Application, EagleNet has generally followed the requirements of Part II of the Commission's Uniform Filing Requirements adopted in Case No. U-10129. Accordingly, EagleNet proposes to do all of the following:

- a. Describe the geographic area of the proposed amended license.
- b. Provide notice to all affected persons.
- c. Describe its technical, financial and managerial resources and abilities sufficient to provide basic local exchange service within the geographic area of the amended license. (As required by § 302 for initial licenses.)
- d. Discuss the impact on the public interest. (As required by § 302 for initial licenses.)
- e. Describe the quality of basic local exchange service.
- f. Describe the proposed rates for basic local exchange service.

5. EagleNet proposes to offer basic local exchange service to customers located in all the zones and exchange areas throughout the state of Michigan. A list of these proposed exchanges are attached as **Exhibit C**. The legal descriptions and maps of these exchanges mirror those of the incumbent providers throughout Michigan.

6. Sections 301 and 302 of the MTA do not require a hearing on a request to amend an existing license. Therefore, EagleNet will consult with the Commission's Executive Secretary to identify interested persons and to determine the manner by which notice of opportunity to comment should be provided to them.

7. EagleNet has the technical resources and abilities sufficient to expand its geographic service area. EagleNet has been licensed to provide basic local exchange service since 2000 and has provided unregulated telecommunications services, such as Internet access,

since 1996. EagleNet always keeps apprised of technological advances and, as a result, provides high-quality telecommunication services to its customers. Moreover, much of EagleNet's service will be resold service, and therefore it is able to rely upon and draw from the extensive technical knowledge of the incumbent carriers from whom it purchases services. Based upon EagleNet's experience, successful track record, and business model of providing largely resold services, EagleNet possesses sufficient technical resources and abilities to provide basic local exchange service to the public within all the zone and exchange areas throughout the state of Michigan.

8. EagleNet also has the financial capability to serve all customers located within the proposed extended areas. EagleNet is financially committed to providing basic local exchange service throughout the state, and has adequate capital to fund its proposed operations and services. EagleNet will keep JAS Networks as an operating company, and, at the same time, will have the financial support from its parent company, Iserv. EagleNet's financial strength and ability to offer service is demonstrated in Iserv's most recent verified, audited financial statements attached as **Exhibit D**. Because Iserv is a privately held limited liability company, its financial statements are confidential and filed under seal.

9. EagleNet possesses the managerial qualifications to provide its proposed basic local exchange service. The senior management of EagleNet has extensive experience in telecommunications and the technology service industry, and its highly-qualified technical staff ensure that EagleNet's current operations meet the most demanding standards for service quality and reliability. In Case No. U-12575, EagleNet filed brief descriptions of its management team's experiences, and based upon those experiences, the Commission granted EagleNet's application. EagleNet's experience is now six years greater. EagleNet's commitment to service, and its

success to date, demonstrate that EagleNet has the managerial resources and ability to provide basic local exchange service to persons in the zone and exchange areas of all incumbent local exchange carriers throughout the state of Michigan, as proposed.

10. EagleNet intends to provide service within one year from the date the license amendment is granted.

11. Licensing EagleNet to provide basic local exchange service on a competitive basis throughout the state will be in the public interest. Both the Michigan Legislature and Congress have determined that it is in the public interest to promote local telephone competition. As a competitive provider of local exchange services since 2000, EagleNet has longstanding knowledge and experience, and has established industry relationships to provide high-quality services to its customers. EagleNet's further entry into the Michigan telecommunications market will provide Michigan consumers with an enhanced range of telecommunications services, increase customer choice, encourage carriers to provide more efficient service at lower price, provide users with greater reliability, and create competitive pressures on carriers to provide more responsive customer service. EagleNet respectfully submits that its expanded entry will further bolster competition for the provision of local telecommunications services, which is essential to the State's continued economic health and well being. Further, the Commission has repeatedly determined that the amendment of a provider's license to provide competitive service is in the public interest.

12. EagleNet will offer basic local exchange service to customers located within the proposed extended areas which will be equal or superior to the service currently being provided to customers by the incumbent providers. Additionally, the expansion will have no ill effect on the high quality of service currently being provided by EagleNet.

13. Rates charged to customers will depend on the type of service offered, i.e., facility-based or resale. In any event, the rates charge will be competitive with the rates charged by the ILEC, but finalization of such rates, at least initially, is dependent on negotiation of interconnection agreements. The rates of EagleNet's current customers will not change as a result of this Application.

14. As required by Section 504 of the MTA, EagleNet will continue to observe its small and minority owned telecommunications business plan, as previously approved by the Commission and verified by EagleNet in Case No. U-14776.

15. EagleNet represents that this Application may be approved, and the requested amended license issued, without the time and expense of a hearing.

16. Finally, EagleNet requests a temporary amendment to its license in addition to a permanent amendment. Granting EagleNet a temporary license will allow it to begin prompt negotiations of interconnection agreements necessary to provide service. EagleNet commits to providing basic local exchange service under the temporary license expansion in accordance with the regulatory requirements specified in the MTA. Before commencing the provision of service under the temporary expansion, EagleNet will submit its tariffs for regulated services offered and identify the exchanges in which it will offer service.

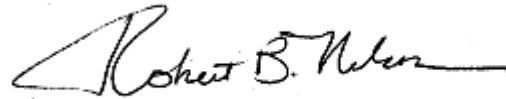

WHEREFORE, EagleNet respectfully requests that the Commission issue an order without a hearing within ninety (90) days from the date of this Application:

- A. Temporarily amending its license to provide basic local exchange service to include all the zones and exchange areas throughout the state of Michigan; and
- B. Permanently amending its license to provide basic local exchange service to include all the zones and exchange areas throughout the state of Michigan; and

C. Granting such further and additional relief as may be lawful and proper.

Respectfully submitted,

FRASER TREBILCOCK DAVIS & DUNLAP, P.C.
Attorneys for EagleNet, Inc.

Inc., and Verizon North Systems.)
)

Case No. U-12575

At the October 24, 2000 meeting of the Michigan Public Service Commission in Lansing,
Michigan.

PRESENT: Hon. John G. Strand, Chairman
Hon. David A. Svanda, Commissioner
Hon. Robert B. Nelson, Commissioner

OPINION AND ORDER

On August 21, 2000, EagleNet, Inc., filed an application, pursuant to the Michigan Telecommunications Act, MCL 484.2101 et seq.; MSA 22.1469(101) et seq., for a license to provide basic local exchange service in the zone and exchange areas of Ameritech Michigan, Verizon North Inc., and Contel of the South, Inc., d/b/a Verizon North Systems, in the Grand Rapids LATA.

At a hearing on October 12, 2000, EagleNet presented the testimony and exhibits of Richard C. Huizenga, its President. The testimony of David M. Flees of the Competitive Services Section of the Commission's Communications Division was also admitted into the record. Mr. Flees indicated that if the Commission grants the application, it should acknowledge certain regulatory requirements specified in the Michigan Telecommunications Act. At the close of the

hearing, the parties waived compliance with the provisions of Section 81 of the Michigan Administrative Procedures Act, MCL 24.281; MSA 3.560(181).

After a review of the application and testimony, the Commission finds that approval of the application is in the public interest. On numerous occasions, the Commission has found that competition can be advantageous to the citizens of this state. Approval of the request for a license to provide basic local exchange service will expand the opportunities for competition. Accordingly, the application should be approved. The grant of a license is conditioned on compliance with the anti-slamming procedures adopted in Case No. U-11900. Failure to comply fully with those procedures may result in revocation of the license or other penalties. Further, the grant of a license is conditioned upon the provision of service to customers within a reasonable time. Failure to do so may result in revocation of the license.

The Commission FINDS that:

- a. Jurisdiction is pursuant to 1991 PA 179, as amended, MCL 484.2101 et seq.; MSA 22.1469(101) et seq.; 1969 PA 306, as amended, MCL 24.201 et seq.; MSA 3.560(101) et seq.; and the Commission's Rules of Practice and Procedure, as amended, 1992 AACCS, R 460.17101 et seq.
- b. EagleNet possesses sufficient technical, financial, and managerial resources and abilities to provide basic local exchange service to all residential and commercial customers within the geographic area of the license and intends to provide service within one year from the date of this order.
- c. Granting EagleNet a license to provide basic local exchange service in the requested areas will not be contrary to the public interest.

THEREFORE, IT IS ORDERED that:

A. EagleNet, Inc., is granted a license to provide basic local exchange service in the zone and exchange areas of Ameritech Michigan, Verizon North Inc., and Contel of the South, Inc., d/b/a Verizon North Systems, in the Grand Rapids LATA.

B. EagleNet, Inc., shall provide basic local exchange service in accordance with the regulatory requirements specified in the Michigan Telecommunications Act, MCL 484.2101 et seq.; MSA 22.1469(101) et seq., and the anti-slamming procedures adopted in Case No. U-11900.

C. Before commencing basic local exchange service, EagleNet, Inc., shall submit its tariff reflecting the services that it will offer and identifying the exchanges in which it will offer service.

The Commission reserves jurisdiction and may issue further orders as necessary.

Any party desiring to appeal this order must do so in the appropriate court within 30 days after issuance and notice of this order, pursuant to MCL 462.26; MSA 22.45.

)

Case No. U-13179

At the February 1, 2002 meeting of the Michigan Public Service Commission in Lansing,
Michigan.

PRESENT: Hon. Laura Chappelle, Chairman
Hon. David A. Svanda, Commissioner
Hon. Robert B. Nelson, Commissioner

OPINION AND ORDER

On November 5, 2001, JAS Networks, Inc., (JAS) filed an application, pursuant to the Michigan Telecommunications Act (MTA), MCL 484.2101 et seq., to amend its license to provide basic local exchange service to include all exchanges currently served by Ameritech Michigan, Verizon North Inc., and Contel of the South, Inc., d/b/a Verizon North Systems in the lower peninsula of the state. The January 6, 1999 order in Case No. U-11783 had authorized it to serve ten specified exchanges.

JAS served a notice of opportunity to comment on other local exchange carriers. No comments were filed with the Commission.

The Commission finds that approval of the application is in the public interest. The expansion of the license is conditioned on compliance with the anti-slamming procedures adopted in Case No. U-11900, the number portability provisions of the MTA, and the number reclamation process

adopted in Case No. U-12703. Failure to comply fully with those procedures may result in revocation of the license or other penalties. Further, the expansion of the license is conditioned upon the provision of service to customers in the added exchanges within a reasonable time. Failure to do so may result in revocation of the license.

The Commission FINDS that:

- a. Jurisdiction is pursuant to 1991 PA 179, as amended, MCL 484.2101 et seq.; 1969 PA 306, as amended, MCL 24.201 et seq.; and the Commission's Rules of Practice and Procedure, as amended, 1992 AACCS, R 460.17101 et seq.
- b. Amending the license of JAS to provide basic local exchange service is in the public interest.

THEREFORE, IT IS ORDERED that:

- A. The license of JAS Networks, Inc., to provide basic local exchange service is amended to include all exchanges currently served by Ameritech Michigan, Verizon North Inc., and Contel of the South, Inc., d/b/a Verizon North Systems, in the lower peninsula of the state.
- B. JAS Networks, Inc., shall provide basic local exchange service in accordance with the regulatory requirements specified in the Michigan Telecommunications Act, MCL 484.2101 et seq., including the number portability provisions of Section 358, the anti-slamming procedures adopted in Case No. U-11900, and the number reclamation process adopted in Case No. U-12703.
- C. Before commencing basic local exchange service in the areas added to the license by this order, JAS Networks, Inc., shall submit its tariff identifying the additional exchanges in which it will offer service.

The Commission reserves jurisdiction and may issue further orders as necessary.

Any party desiring to appeal this order must do so in the appropriate court within 30 days after issuance and notice of this order, pursuant to MCL 462.26.
