

6-20-06

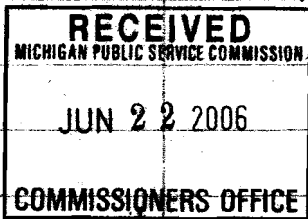

Commissioners Peter Lark, Laura Chapelle, and
Monica Martinez,

I am writing this letter
regarding case U-14838. We need
clean, reliable and affordable energy!
DTE is price gouging its customers and
should be held accountable and
refund the \$144 million it gouged from
its customers. Energy Saving should
be made a priority. (Example: wind
energy) Customers who are involved
in energy-saving programs should
be compensated.

Thanks, for your time. Please
send me your thoughts.

Angela Bergum
3865 Hi Dale
Lake Orion, MI. 48360

To Peter Lark, Laura Chapelle and Monica Martinez
Michigan Public Service Commission
P.O. Box 30221
Lansing, Michigan 48909

In case U-14838, The Commission should insist that DTE refund the \$44 Million it gouged from its customer's through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

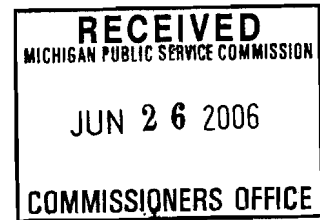

In developing its 21st Century Energy Plan, The Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-savings programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly-fossil-fueled electric plants.

Please reply

ATT: Commissioners: Peter Lark, Laura Chapelle, and Monica Martinez

Regarding the efforts of the Michigan Consumer Federation I am requesting that your Commission address the three salient points, of we as consumers, study and express your opinions.

1. Case U-14838 regarding the refund of \$44 million through over- gouging.
2. Developing a 21st Century Energy Plan for renewable energy and savings as a priority.
3. The Energy Plan should encourage and fund energy-saving programs.
In this period of rising inflation and higher prices we as seniors need to watch every dollar. I have lived in my home for over 50 years and have seen my electric utility bills continually going UP UP UP.

A reply to this letter may be addressed to:

Commissioner Peter Lark
Commissioner Laura Chapelle
Commissioner Monica Martinez
Michigan Public Service Commission
PO Box 30221
Lansing, MI 48909

Dear Commissioners Lark, Chapelle and Martinez,

I am writing this letter as a plea for your attention to the future electricity needs of the State of Michigan. The cost of energy has been increasing dramatically and the geopolitical landscape we are currently in is painting a painful portrait on our dependence on foreign energy sources. It is time for us to take action where we can – right here on Michigan soil.

In the development of your 21st Century Energy Plan, the Commission should make renewable energy and energy savings its top priority. Wind energy costs are declining and could provide a cheaper electrical source in the long run.

Additionally, for every dollar spent on energy efficiency, customers save \$2. This is a much more efficient use of our funds and it is the fiscal responsibility of the commission to put the resources where they can make the biggest impact to the future needs of our State.

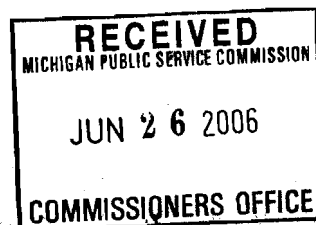

Finally, the Commission should insist that DTE refund the \$44 million it reported gouged its customers. The Commission should send a message to all utilities that price gouging will not be tolerated.

Thank you for your attention to this matter.

Sincerely,

Steven Marlette
3803 Bald Mountain Road
Lake Orion, MI 48360

June 20, 2006

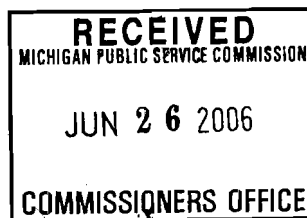

Attention Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

This letter is to encourage you to support clean, reliable and affordable energy programs. In developing a good sound energy program renewable energy should be top of the list. Wind energy has been effective in other parts of the world. Messages should be sent to DTE that price gouging won't be tolerated. It's time to move forward in our progress of energy efficiency .

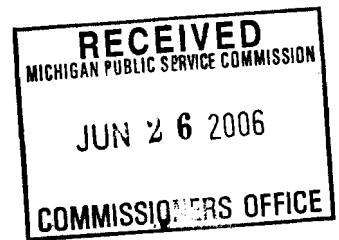

I would like to be informed by your as to what efforts are being made concerning Michigan's Future
Electric needs.

Thank You.

Jon and Jane Nason

June 19, 2006

Commissioners Peter Lark, Laura Chapelle
And Monica Martinez
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Mr. Lark, Ms. Chapelle and Ms. Martinez:

I am writing to urge the MPSC to make plans now to meet Michigan's future electric needs rather than wait for the utility companies to make plans that would fit their needs best. Presently, we count on out-of-state power to meet our demands: not only do we avoid responsibility for supplying our own needs, we send money outside of the state with a negative effect on our economy.

Renewable wind energy can provide long-term cost savings while keeping more money in the Michigan economy. The development of clean and affordable energy via wind power would not only support the environment and savings for consumers, it would also be a growth industry for the state.

A new energy plan should include conservations and efficiency programs, rather than building new power plants. Other states with programs save some \$2 for every \$1 invested along with consumer savings.

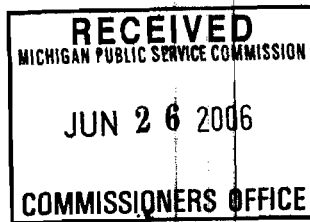

Finally, I urge the MPSC to insist that DTE refund the \$44 million it gouged from customers through over-earnings.

I look forward to hearing back from each of you on these matters.

Sincerely,

Elaine Schuman

Lansing, MI 48909

Dear Commissioners,

I am writing to encourage you to make alternative and renewable energy sources a priority when developing the 21st Century Energy Plan. This concept can only help with energy savings throughout Michigan. Michigan has many resources, such as wind energy, to utilize for its' benefit. This could benefit the people of Michigan in jobs as well as savings.

The Energy Plan should encourage and fund energy-saving programs that are for the best interests and savings of Michigan residents. Please give consideration to long-term programs that are more than just a short term Band-Aid.

Please keep me informed of your progress.

Sincerely,

Lansing, MI 48909

Dear Commissioners:

As a Michigan resident, I am deeply concerned about our state's long-term energy needs, decreased emphasis on this issue, and most importantly, the need for a well-orchestrated strategy to address alternative energy sources.

As a result, I am contacting you to urge you to make renewable energy a priority in your 21st Century Energy Plan, to encourage you to insist on DTE's Refunding of \$40+ million it gained in over-earnings back to its customers, and to suggest that any energy plans emphasize energy efficiency/savings programs.

As our representatives to the power industry, Michigan residents, like myself, are counting on you to lead our state strategically to ensure we have safe, viable, cost-effective energy resources for years to come. I look forward to hearing an update on the Commission's progress.

Respectfully,
Nancy D. Stermer

Dear Commissioners;

This letter is to address my concerns regarding energy in our state. I feel that DTE must not be allowed to price gauge the citizens of Michigan and it is your duty to work in our best interest. They should be made to refund all over-earning funds back to its customers.

I also feel it is the responsibility of the commission to develop renewable energy plans for our state and to make certain that energy companies like DTE do not take advantage of their position at the expense of Michigan residents.

Thank you for your time in reading this letter and I look forward to your response.

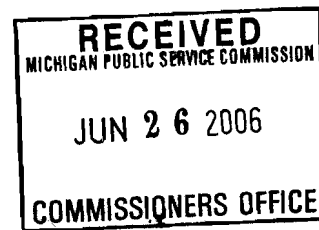

Sincerely,

RE: Michigan needs an action plan for it's future electrical needs

It is time for Michigan to become aggressive with researching the future needs of the residents for their future electrical requirements. We are tired having to live with the high costs forced on us by the utility companies.

We would like to see the price gouging come to an end! The commission should demand that DTE return \$44 million of over-earnings to it's customers (U-14838)

The Commission should concentrate on renewable energy and make energy savings a priority. Wind energy should be explored.

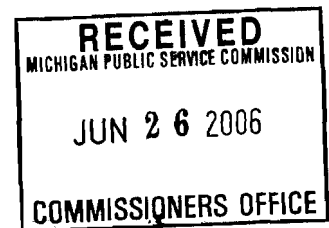

We would recommend that an energy plan be developed by the Commission which funds energy savings programs.

The courtesy of a response to our request would be appreciated.

Sincerely,

Frank/Gail Kunz

MICHIGAN PUBLIC SERVICE COMMISSION

FROM: THOMAS F. ALLPORT
TAX PAYER, ORION TOWNSHIP MICHIGAN

Commissioners,

I have some questions and suggestions for you.

- Why does the commission refuse to consider wind energy as a priority? It may not be instant gratification, but it would certainly be more cost effective in the long run.
- We are all aware of "price gouging" at the pump. It also exists with our electricity providers. We as consumers would benefit greatly if the commission sent a clear message to DTE that unfair billing policies will no longer be tolerated.
- The commission may also want to consider in The Energy Plan to fund an Energy-Saving Program. For every one dollar spent on energy efficiency, customers save two dollars.

I would be pleased to get a reply to this letter with information regarding my comments. Thank you.

Sincerely,

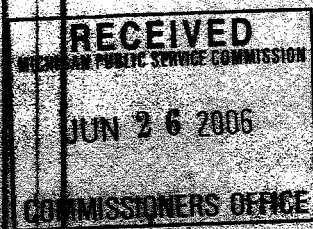

Thomas F. Allport

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled plants.

Michigan needs to start being a leader instead of declining to the bottom of the list, as we are in so many categories today. The auto giants are starting to finally wake up to the fact that we need cars that aren't oil dependent. Likewise the State needs to be cognizant of ways to reduce our use of fossil fuels. We need "winds of change" in our great state of Michigan.

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

June 21, 2006

Dear Commissioners,

Please consider the following points when developing the 21st Century Energy Plan. Renewable energy and energy savings are a priority to residents and taxpayers in Michigan. Developments in the area of wind energy and wind generated power are reducing the cost of implementation resulting in cost savings in the long run. The Plan should encourage and fund programs that support energy-saving. For example, every \$1 spent on energy-efficiency might result in cost savings for customers of \$2. Would this be a better use of money than building more and increasingly costly fossil-fueled electric plants. It would certainly be better for the environment as well!

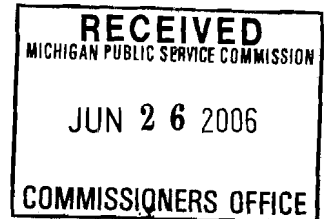

Regarding case U-14838, DTE should be held accountable for the \$44 million it wrested from its customers through over-earnings. Capitalism is fine, but this is also a service industry. The commission should send a message to utility companies that price gouging won't be tolerated.

Thank you for your attention to these matters and your careful consideration of issues on behalf of the rest of us citizens of the state. I would appreciate hearing from you regarding your action in these matters.

Sincerely,

Dear Commissioners,

Point 1. Case U-1438 - the Commission should insist DTE Regard \$4 billion its gouged from its customers through deregulation & reduced services to cost! The Commission should let all utilities know that price gouging won't be tolerated.

Point 2. At a time that Michigan develop 21st Century Energy Plan - don't wait for Washington. We need renewable energy - solar, wind and energy saving programs. The cost of solar + wind energy is decreasing & will be cheaper in the long run.

Point 3 The Energy Plan should encourage and fund energy-saving programs. Example: For every one dollar spent on energy-saving, customers save \$2.00. This is a better use of money than building more costly fossil-fueled electric plants. Solar water heaters, portable solar lighting for outside of homes & for inside use too! Please send a reply.

Sincerely - Javis Ripple

June 21, 2006

Dear Commissioners;

I am writing because I am concerned about Michigan's electricity needs in the future. I strongly feel that renewable energy is the ONLY way to go... when we take a step back and look at our resources versus our consumption, it is obvious that something has to give. NOW is the time to make renewable energy and energy-savings a priority!

It is no secret that DTE has been overcharging its customers. I think they should be required to either refund the \$44 million to their customers, or invest the money on renewable resources that are not only better for the planet, but would dramatically reduce consumers' cost.

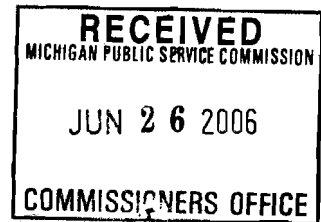

It makes such good sense to me... Please help to make this a reality.

Thank you so much for your time.

TO: COMMISSIONERS PETER LARK, Laura Chapelle, and
monica martinez,

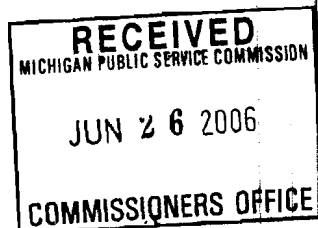

OVER The Past Three years I have seen
an constant increase in our Energy Bill.
In 2005 DTE reported corporate earnings
that were \$44 million greater than it had told
State Regulators. I would like to see the
Commission insist DTE Refund the \$44 million
to its customers, and further, create legislation
preventing this from occuring again.

The commission should make renewable energy
and energy-savings a priority.

The cost of wind energy is declining and will
be cheaper in the long run.

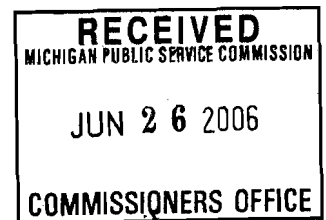

I would like to see the commission develop
a plan that would incorporate wind energy
and save michigan residents from increasingly
costly energy bills.

Thank you for your time...

- ① I feel DTE should refund the \$44 million it earned while customers struggled to make increased utility payments to them. This is case # U-14838.
- ② Make renewable energy (and energy savings in the near term) a priority.
- ③ Instead of building more fossil fueled electric plants, spend the money on energy-saving programs. I have heard that for every \$1 spent supporting energy efficiency, customers save \$2. That is 100% return.

I hope you consider these items seriously as I am sure I am not alone in my concern over a longer term energy plan.

Sincerely,

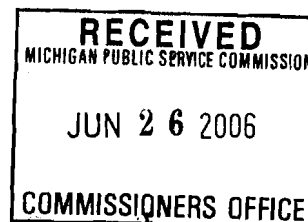

Steven P. Wilkie

Commissioners Peter Lark, Laura Chapelle and Monica Martinez
Michigan Public Service Commission
PO Box 30221
Lansing MI 48909

Dear Commissioners,

I am writing to strongly urge you to support clean, reliable and affordable energy for the state of Michigan. As you work to develop an energy plan for this new century, please encourage and fund both renewable sources of energy and energy-savings programs to make our country more self-sufficient in meeting its energy needs.

It is truly outrageous that DTE Energy's 2005 earnings were \$44 million greater than projected/reported. This sounds like price gouging and now Michigan citizens will be paying an additional 7% to DTE. Please address this egregious situation immediately and thoroughly. Our state's natural resources and our citizens need to be placed at the top of this food chain.

We need your commission to focus on moving Michigan ahead in how we use and pay for our energy. We need to have safe, efficient and renewable energy sources to meet the demands today and in the future. Thank you for your time.

Sincerely,

A handwritten signature in black ink, appearing to read "Christie L. Blanchard-Kendall". The signature is fluid and cursive.

Christie L. Blanchard-Kendall

June 21 2006

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commission
Lansing, MI

Dear Commissioners:

In case U-14838 please support the return by DTE of \$44 million to its customers by via refund. This will send a message that price gouging will not be tolerated. Excessive earnings and malfeasance by energy companies has become a trend that must be stopped.

Please continue to make the support of renewable energy and energy savings a priority. Support of wind energy is an important part of decreasing our reliance on fossil fuels. I would also ask that you support energy saving programs. Incentives to reduce energy use are a better use of funds than supporting the establishment of additional, fossil fuel burning, electric plants.

Thank you for your time and consideration,

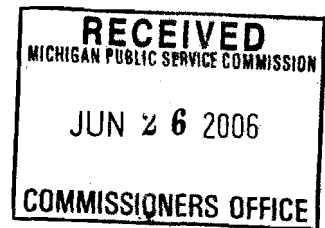

I look forward to hearing about your thoughts on these issues.

Sincerely,

A handwritten signature in black ink, appearing to read "Brent Lynch". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

June 21, 2006

To Whom It May Concern:

It seems, especially in the last year, the Michigan public has no control over what decisions are made by the utility companies and it is costing us dearly. As in case U-14838, the commission should show that price gouging will not be tolerated by insisting on a refund for the \$44 million it gouged from over-earnings to its customers.

It doesn't make sense that we are not taking advantage of all the renewable energy resources we can such as wind power. Why should we be at someone else's beck and call when we, Michigan, can take control of our own destiny and use resources in our very own back yard.

We need an Energy Plan that encourages and funds energy saving programs where the money is spent on energy-efficiency as opposed to more costly fossil-fueled electric plants.

What is Michigan doing?!

Sincerely,

Kimberly Mars (a concerned citizen)

Commissioners:

Peter Lark

Laura Chapelle

Monica Martinez

Being an advocate for energy efficiency, I run my household to keep my energy ^{costs} down - it would be good to see our state do the same.

You, as our commissioners could enforce DTE to lower costs to consumers by cutting the fat. I certainly have had to, to keep from being overcharged.

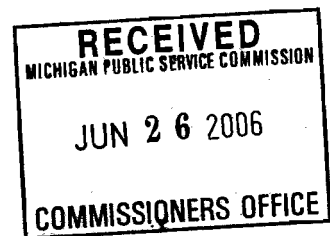

As for Consumers - the gas prices for natural gas were horrible this past winter. An alternative energy source should be top priority in Michigan. We have an enormous amount of natural resources - we should use them to our advantage instead of paying high prices for energy so the huge companies can profit.

Sincerely

Peter Lark

1220 Elkhorn St Rd

Lake Orion Mi 48362

Commissioners -

In case U-14838, the Commission should insist DTE refund ~~the~~ million it paid from its customers through over-earnings. The Commission should send a message to all utilities that price gouging won't be tolerated.

The Commission should make renewable energy + energy saving a priority. The cost of wind energy will be cheaper in the long run. The energy fund should encourage + fund energy-saving programs.

Thank you

Ann

Commissioners PETER LARK, LAURA CHAPPELLE, &
MONICA MARTINEZ

FIRST I WOULD LIKE TO SAY THANK YOU FOR
YOUR TIME READING THIS,

IF THE COMMISSION COULD/SHOULD INSIST D.T.E.
REFUND THE \$44 MILLION IT GOUGED FROM ITS CUSTOMERS
THROUGH OVER-EARNINGS. THE COMMISSION SHOULD
SEND A MESSAGE TO ALL UTILITIES THAT PRICE GOUGING
WILL NOT BE TOLERATED.

FOR OUR FUTURE THE COMMISSION SHOULD
MAKE RENEWABLE ENERGY & ENERGY SAVING A
PRIORITY THE COST OF WIND ENERGY IS DECLINING &
WILL BE CHEAPER IN THE LONG RUN

A ENERGY PLAN SHOULD ENCOURAGE ENERGY-
SAVING PROGRAMS. CUSTOMERS SAVING MONEY FOR USING
ENERGY-EFFICIENT PRODUCTS SHOULD GET MORE
KICK BACKS FROM PROVIDERS FOR SAVING THE
FUTURE.

MONIES FROM CUSTOMERS IF NOT GIVING
BACK SHOULD BE USED TO UP DATE OUT DATED
SYSTEMS WITH MORE EFFICIENT SYSTEMS

PLEASE REPLY TO SV4COM PANY @ YAHOO.COM

SCOTT FIELER

21 June 13

Peter Lark, Laura Chapelle & Monica Martinez -

I encourage all three of you to be supportive of all forms of non-fossil-fuel energy research and development. We must focus our efforts on new energy sources. Wind power is a clean, inexpensive source for energy. Scandinavian countries have had tremendous success w/ wind power.

DTE energy has gouged millions of dollars from its customers through over-earnings. This needs to be STOPPED immediately & the energy companies need to be sternly told THIS WILL NOT BE TOLERATED!!

America is far behind on where we should be for responsible, energy efficient sources of energy. It is up to you, our representative, to ensure we develop new sources of energy, and prohibit DTE from irresponsible profits.

Thank you,

Pam Larsen

MICHIGAN PUBLIC SERVICE COMMISSION

JUN 26 2006

COMMISSIONERS OFFICE

Dear: → Commissioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commission
P. O. Box 30221
Lansing, MI 48909

Please review these points, and bring down our Energy Costs!
Some points to make in your letter:

1. In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.
2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
3. The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

1. Write one letter addressed to all three commissioners. Encourage each family member to write a letter.
2. A short paragraph (3-5 lines) *G. Kropf*
10268 Country Club Dr
Livonia, MI 48154
3. Ask for a reply! *Thanks*
Angie
4. Please write the letter by 8:00 tonight. We will pick it up so that it can be bundled with all the other letters written by your neighbors.
5. Put the letter in an addressed, stamped, and unsealed envelope. This allows us to make copies of letters for our records for use when advocating on this issue.
6. Tape the letter to the outside of your door by 8:00 tonight. Leave the porch light on and our organizer will pick up your letter. Can you donate extra stamps for letters we collect without postage? Thanks!

Tuesday, June 20, 2006

Commissioners:

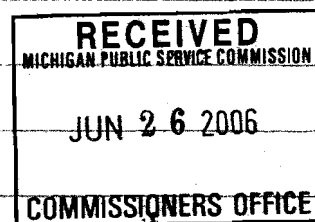

Case U-14838: Please insist that DTE refund the \$44 million it over charged its customers. We need to send a message to all utilities and other companies that price gouging won't be tolerated.

We also need a 21st century energy plan - and make renewable energy and energy-savings a priority. Lets consider more wind energy as Michigan has the 14th most wind available among all states. Michigan has the ability to be a leader in - in energy savings - an area that's just being tapped.

The energy plan should encourage and fund energy-saving programs.

Please reply and let me know what you plan to do in these areas.

Thank you -

Commissioners Peter Lark, Laura Chapelle
and Monica Martinez
Michigan Public Service Commission
P. O. Box 30221
Lansing, MI 48909

Dear Commissioners:

In an effort to support clean, reliable and affordable energy for all Michigan residents, I am urging you to take action to ensure the State of Michigan's future electric needs.

In this atmosphere of highly volatile energy costs, our state needs a renewable energy plan, making energy savings a top priority. Utilizing wind energy is a viable solution. Michigan needs to be a leader in developing clean and affordable renewable energy.

I also urge you to insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The Michigan Public Service Commission should send a message to all utilities that price gouging will not be tolerated.

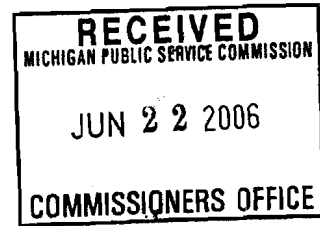

Finally, the energy plan should encourage and fund energy-saving programs. For every \$1 spent on energy efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Thank you for your consideration and support. We are counting on you to ensure Michigan's future electric needs by voting for clean, reliable and affordable wind energy.

Sincerely,

Dear Commissioners:

I am writing in support of clean, reliable and affordable energy for Michigan's consumers. In pursuit of this goal, there are three specific actions that I ask you to take:

1. In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The Commission should send a message to all utilities that price gouging will not be tolerated.
2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
3. The Energy Plan should encourage and fund energy saving programs. For every \$1 spent on energy efficiency, consumers save \$2. This is a better use of money than building more and more costly fossil fuel electric plants.

Please contact me at the address listed below and let me know what action you as Commissioners plan to take on these important issues.

Thank you for your consideration.

Sincerely,

Dear Commissioners,

I am writing to show my support for clean, reliable and affordable energy. In case U-14838, the commission should insist that DTE refund \$44 million it gouged from its customers through over-earnings. This would send a message to all utilities that price gouging will not be tolerated!

The Commission should make renewable energy and energy-saving a priority. The energy plan should therefore encourage and fund energy-saving programs. This is a better use of money than building more and more costly fossil-fueled electric plants.

Thank you for your
Attention,

Lori D. Martin

Lansing, MI 48909

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

SUBJECT: RENEWABLE ENERGY

Thank you for taking an interest in listening to your constituents and recognizing the serious need to find alternative energy sources for the citizens of Michigan.

I hope that you will take the necessary steps to make the necessary changes that we need today! We are woefully behind other states in this matter, and providing a CLEAN and AFFORDABLE source of energy will only improve the lives of ALL the citizens.

Please note the following points provided by the Michigan Consumer Federation:

1. In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.
2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
3. The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more an more costly fossil-fueled electric plants.

Sincerely,

A handwritten signature in cursive script that reads "Allison Smith".

Commissioners Peter Lark, Laura Chapelle & Monica Martinez,

In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price-gouging won't be tolerated.

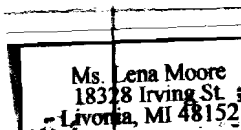

Further, in developing its 21st century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long-run.

Lastly, the Energy Plan should encourage and fund energy-savings programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

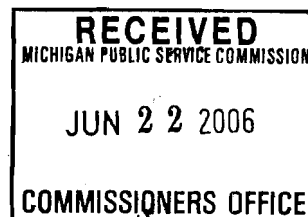

Sincerely,

Lena A. Moore

My wife and I write to encourage you on several issues:

- 1. Encourage you to have DTE refund overcharges in case U-14838.*
- 2. Develop a 21st century energy plan that includes wind power*
- 3. Encourage energy and fund energy saving programs in Michigan.*
- 4. Change existing laws that would force electric utilities to buy back excess power at reasonable rates for those home/business owners whose units produce more than 80 kw of power. My undersatanding is that the current regs only apply to units < than 80 kw; they should be expended to units >80 kw up to 500-1000 kw. Companies such as McKenzieBay Intl (Farmington Hills, MI) currently produce 200 kw wind turbines and their prospective clients, including many Mich school distrtricts, who used these units would be unable to sell excess power back to the utilities during summer months.*

Regards,

Bob & Teri Carris
