Re: Case No. U-14899

Dear Ms. Kunkle:

Your Memorandum dated June 1, 2005 and postmarked June 5th came to my attention today.

Pursuant to your Memorandum and the Erratum dated June 1, 2006, please be advised that Global is offering basic local exchange service to its prospective customers. As proof that Global is complying with the Commission's recent order, Global offers the following:

1. When a prospective customers calls Global, the customer service representative enters the customers address in the computer. Global's software is programmed to show the various packages available in areas throughout Michigan and therefore, immediately displays the packages available to that particular customer. The customer is informed of the available packages in their area by Global's customer service representative. Basic local exchange service is offered to customers, as is Global's Platinum Choice package.

There is no written material that Global can present to the Commission to show that basic local exchange service is offered, as it's proof is part of it's software program.

2. Attached is a copy of a report generated by Global that shows Basic Choice (basic local exchange service) customers as of April 30, 2006. As you can see, Global had 392 customers with basic local exchange service; 337 regular customers and 55 lifeline customers. This is proof that Global is offering this service to its customers.

Global has no way of tracking the number of requests for primary basic local exchange service. Its' software only records the customer's purchased service – not all services offered.

~~Global also offers the attached report as evidence of the number of customers that are receiving~~
primary basic local exchange service as of May 1, 2006.

If there are any questions regarding the information contained herein, I may be contacted as indicated above.

Sincerely,
