Regarding Case U-14861

Dear Mr. Peter Lark

The enclosed petition is in support of the Hartland Township Board and their ordinance. Although I personally will not be able to attend the July 13th due to other obligations at this time, I sincerely hope that this petition be put on the record. In some small way this petition should indicate to you and your fellow commissioners of our great concern over these proposed power lines. As with most grass root efforts these petitions started late, only days ago and could have been organized better, still we were able to get many signatures. You will be receiving other parts of this petitions from other petition recruiters mailed directly to your offices given that time constraints did not allow us to consolidate all these in one package. Sorry if this present a problem for you.

We the residents of Hartland understand that judgment will be based on many other issues presented by the Township legal team and ITC. Still we hope that these petitions will in some way express our concerns to everyone on the board, we all find these power lines being proposed by ITC at this time offensive and not in the best interest of our community. We hope that some kind of mutually beneficial compromise will be found that will locate these lines in other locations, such as along I 96 so that far fewer homes, schools, churches, clinics and daycare centers will be affected. If all the commissioners could come here and see first hand the fact we already have big 60ft wooden power poles to the south of our main street (M59) just too now have these 120ft steel towers installed on the north side of M 59 is truly repulsive. I know of no other main street anywhere in Michigan, that will have been subjected to this type of indifference by having such steel monstrosities running through their down town area.

We all feel that not only will property values be impacted but the health concerns associated with such towers have mothers to be, families and the general population very upset here. We know these lines will impact the wild life, the endangered species in the area and will waste tax payers money given all these towers will have to be moved again in two years, when M 59 will be widened. Who knows what the environmental impact of that line move will be then. In short we ask that the MPSC board support the Hartland ordinance, and reject ITC's present routing in lieu of better and shorter routs the township has identified.

Sincerely
Pierre Koudelka

**TOWNSHIP OF HARTLAND
NOTICE OF ADOPTION
ORDINANCE NO. 59**

UNDERGROUND CONSTRUCTION OF UTILITY LINE ORDINANCE

ADOPTED: March 21, 2006

EFFECTIVE: March 24, 2006

An Ordinance to require the underground construction of all utility lines, wires and related equipment and facilities in the rights of way of driveways, alleys, streets, roads, and highways (collectively hereinafter "streets") in the Township of Hartland, Michigan.

HARTLAND TOWNSHIP ORDAINS:

Section 1. Title. This Ordinance shall be known and may be cited as the Underground Construction of Utility Lines Ordinance.

Section 2. Legislative Findings and Purpose.

(a) The Township of Hartland ("Township") encompasses residential areas and business districts in which the Township's citizens reside and conduct business. Various streets, with utility rights of way, are also located in the Township, often in close proximity to residential areas, business districts, residences and businesses.

(b) The Township has determined that, except as provided by Section 2(c), it is necessary for the public health, safety and welfare that all new utility lines, wires and other related equipment and facilities be constructed underground instead of along, across, adjacent to and/or over streets, intersections, and private property adjacent to streets. Etc.

Open WWW.HARTLANDTWP.COM to see the ordinance in full

WE the residents of Hartland Township have serious **safety/environmental concerns** associated with High Voltage Power Lines planned for M-59 and Pleasant Valley Rd. now and in the future. WE the undersigned residents request MPSC support our concerns and the Hartland ordinance. WE ask that ITC's request to install High Voltage Power lines above ground be denied. **We oppose ITC's request for an expedited schedule.** WE want all high voltage lines now and in the future placed underground:

Section 1. Title. This Ordinance shall be known and may be cited as the Underground Construction of Utility Lines Ordinance.

Section 2. Legislative Findings and Purpose.

(a) The Township of Hartland ("Township") encompasses residential areas and business districts in which the Township's citizens reside and conduct business. Various streets, with utility rights of way, are also located in the Township, often in close proximity to residential areas, business districts, residences and businesses.

(b) The Township has determined that, except as provided by Section 2(c), it is necessary for the public health, safety and welfare that all new utility lines, wires and other related equipment and facilities be constructed underground instead of along, across, adjacent to and/or over streets, intersections, and private property adjacent to streets. Etc.
