

Gabriella Falvo
969 Bogie Lake
White Lake, Mi 48383

Dear Peter Lark, Laura Chapelle, and Monica Martinez,

I am writing to ask why in the case U-14838, DTE has not refunded the \$44 million it took from its customers through over-earnings. I am 15 years old and know if you owe someone money you should pay it back..

Also, I did science fair projects using wind power to produce energy. We need to put some ideas concerning energy production to save money, make energy cleaner, more efficient, and create more jobs. Thank you for your time and effort in this matter.

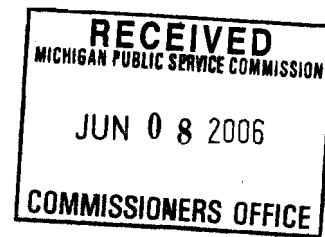

Sincerely,

Gabriella Falvo

Mr. Lark;

We are extremely concerned regarding the status of our states electric needs and the need for future planning. I would like to share some points with you.

Firstly in case U-14838, the Commission should insist the DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

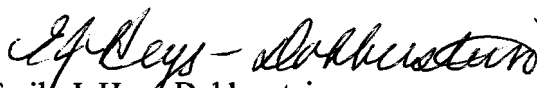

In developing it's 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

Finally, the Energy plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

As you already know it is the burning of fossil fuels and our countries dependency on them, that is contributing to the many environmental concerns we have now and for our future should we not invest in changing the focus of energy and electric needs.

Please reply to these concerns listed above, I would be willing to speak with you about them.

Thank you,

Emily J. Heys-Dobberstein

Dear Mr. Clark, My family and I support the issue of finding renewable and lower cost energy sources. We don't feel that this issue is being addressed aggressively enough. Please make this a priority as soon as possible. DTE has profited greatly and appears to have been price gouging. If this case, consumers should be entitled to a refund. The Energy Plan should also encourage and fund energy-saving programs. There is so much potential with sources such as wind energy. It would be a shame not to pursue better alternatives. We shouldn't let large companies like DTE make us feel like we have to stick with fossil fuels. It is time for a change for the better. Thanks for your time and service.

Sincerely,

The Howcroft's

Dear Commissioners,

I am concerned about the energy situation in our state. Our future needs should be considered and made a priority. As a member of the Public Service Commission, you have the power to lead our state in adopting energy-saving programs. We need to have a plan!

Price gouging by the DTE or any other Energy company should not be tolerated. A closer and stricter watch on these companies should be instituted to protect Michigan residents from price gouging.

I would appreciate hearing how your commission is planning for the future of Michigan's energy.

Thank you very much for the service you do for our state.

Sincerely,

Barbara L. Jones

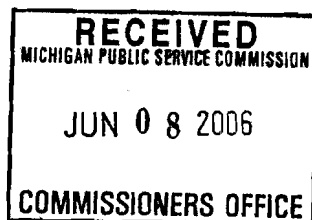

Barbara L. Jones

To: Commissioners Peter Lark, Laura Chapelle and Maurice Martiney
From: Michele Surace Marti
Date: June 6, 2006
Re: Action Plan for Michigan's Future Electric Needs

Please take time to consider these three most important points concerning our future electric needs.

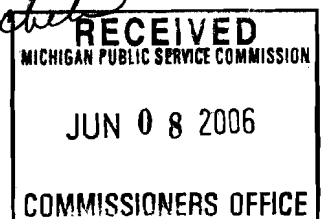

1. In case U-14838, the Commission should insist the DTE refund the 44 million it gouged from its customers through over-earning. The Commission should send a message to all utilities that price gouging won't be tolerated.
2. In developing the 21st Energy Future Plan, the Commission should make renewable energy and energy-saving a priority. The cost of wind energy is declining & will be cheaper in the long run.

Finally
3. The Energy Plan should encourage & fund energy saving programs. For every \$1.00 spent on energy-efficient customers should save \$2.00, this is better use of money.

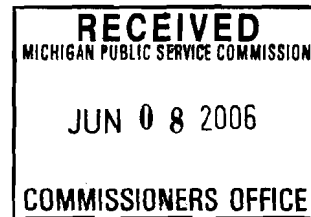

Thanks

Michele

Dear Commissioners;

I am very concerned about our reliance on the use of fossil fuels to generate electricity while generally neglecting alternative sources of electrical production.

1. In case U-14838, the Commission should insist that the DTE refund \$44 million from its customers through over-earnings. The Commission should send a message to all utilities that price gouging will not be tolerated.
2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority.
3. The energy plan should encourage and fund energy-savings programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

I would hope that you seriously consider the above and hope that you will take the time to send me a reply.

Sincerely,

COMMISSIONERS PETER LARK, LAURA CHAPELLE and MONICA MARTINEZ
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners,

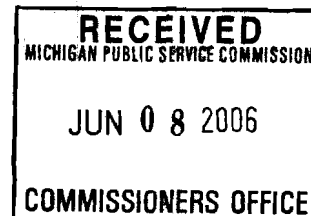

This letter is being written to state my support for clean, reliable and affordable energy. As the Commission develops its 21st Century Energy Plan, it should make renewable energy and energy-savings a priority. Wind energy costs are declining, and as demand increases, costs will be less in the future. The Energy Plan should encourage and fund energy-saving programs. Less money spent on energy-efficiency will leave more funds in customers' hands.

DTE reported corporate earnings in 2005 were \$44 million greater than it had reported to state regulators, **AFTER** receiving a \$335 million annual rate increase (7% increase for residential customers. The Commission should request that DTE refund this \$44 million to its customers.

I will appreciate receiving a reply as to your immediate and future plans with regard to giving Michigan clean, reliable and affordable energy.

Yours truly,

Audrey Bowditch

To whom it may concern.

6-6-06

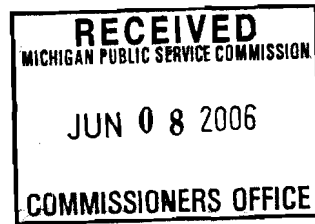

I am writing to voice my concern and support for clean, reliable + affordable energy for all Michigan residents. I am glad to see that someone is taking a stand to try and control the cost of the energy that we consume. I personally conserve as much as possible in my home. (water, gas + electricity) The rates still seem to go up in spite of my efforts. I would like to have a reply to this letter and be informed as to the progress that is being made toward this effort.

Thank You
Thomas Evans

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners:

In your deliberations of case U-4838, I urge the Commission to insist that DTE refund the \$44 million it usurped from its customers through over-earning. The Commission needs to make it clear to all utilities that price gouging will not be tolerated.

Also, in developing a 21st Century Energy Plan, I urge the Commission to make renewable energy and energy-savings a high priority. The cost of wind energy is decreasing and in the long run will be even less expensive.

In addition, the Energy Plan should be designed to encourage, as well as fund, energy-saving programs. For every one dollar spent on energy efficiency, customers can save two dollars. This is far better than using the money for building more and more costly fossil-fueled electric plants.

Thank you for your consideration of these concerns and suggestions.

Commissioners:

I am writing this letter requesting your support for taking action in planning for Michigan's future electric needs. This is something that affects everyone in the state and steps need to be taken to ensure that the rising cost of energy be curbed in the future.

I think that it is important that the commission send a message to all utility companies that price gouging is unacceptable. One example is DTE who gouged its customers \$44,000,000 in company over-earnings.

With much of our current energy sources being depleted, it is important to focus on renewable energy and setting it as a priority for the future. With energy prices soaring, solar energy and wind energy will be cheaper down the road and should be implemented on a larger scale than it is now.

At current, alternative sources of energy can be quite costly. Plans for the future should encourage the implementation of wind and solar energy through incentive programs. For example, for every dollar spent on energy-efficiency the customer saves two dollars. In doing this money is better spent on remedies for the future, as opposed to throwing more and more money into costly fossil-fueled electrical plants.

Thank you for your time.

Mary Jackson

Commissioners,

It is in complete disgust that I am writing this letter. The need for clean, reliable and affordable energy is in great demand and deserves your utmost attention.

For years your commission has done nothing, but watch our monster utility companies plan, gouge, and manipulate the common man whilst you sit in your cushy Lansing offices and ignore great concepts like renewable energy, ie: Wind. The cost of wind energy is declining and will be cheaper in the long run.

How about accountability? I would like the Commission to insist that DTE refund the \$44 million it gouged from its customers through over-earnings. Accountability sends a message. A message that will get other utilities to realize that we will not tolerate these types of practices any longer as long as your Commission exists. Thanks to you, now I'm crying "poverty" in 2006.

I want answers from your office. Where is the planning? Where is the forethought? Where is the common sense? Please reply, and thank you for your time and consideration.

Sincerely,

Carin J. Goodrich

Dear Commissioners,

The state of Michigan is falling behind in its energy policy. Price gouging, such as in Case U-14838, resulted in \$44 million taken from consumers like me. Also, with the threat of global warming, we need to decrease fossil fuel consumption. Coal power plants are expensive, dirty, and dangerous. Other sources such as wind and nuclear energy offer much better alternatives, especially as the price of wind energy goes down. Current attitudes towards nuclear energy border on idiocy. It is abundant, cheap, and despite public fears, very safe. Thousands of people die every year in coal mining accidents, compared with the couple hundred that have died in the entire history of nuclear power, and those only due to very poorly designed soviet reactors lacking containment buildings. The long-term danger of nuclear waste is negligible compared to the looming threat of climate change. We are lagging behind and have little excuse. Michigan is one of the best places for wind and nuclear energy yet we have done very little to capitalize on this. I would love to hear your outlook on the future of Michigan's energy.

Thank you,
Arend Voorman

2419 Carlyle Dr
Kalamazoo, MI 49008

To: Commissioners Peter Lark, Laura Chapelle, and Monica Martinez

I am writing concerning my support for clean reliable and affordable energy.

In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing the 21st Century energy plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The energy plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

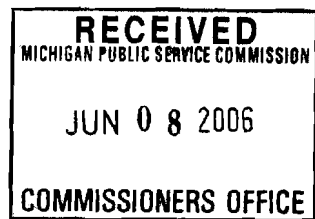

I appreciate your time and would like to hear a response to my concerns.

Sincerely,

Meredith Hutton

June 6, 2006

Commissioners,

It is in complete disgust that I am writing this letter. The need for clean, reliable and affordable energy is in great demand and deserves your utmost attention.

For years your commission has done nothing, but watch our monster utility companies plan, gouge, and manipulate the common man whilst you sit in your cushy Lansing offices and ignore great concepts like renewable energy, ie: Wind. The cost of wind energy is declining and will be cheaper in the long run.

How about accountability? I would like the Commission to insist that DTE refund the \$44 million it gouged from its customers through over-earnings. Accountability sends a message. A message that will get other utilities to realize that we will not tolerate these types of practices any longer as long as your Commission exists. Thanks to you, now I'm crying "poverty" in 2006.

I want answers from your office. Where is the planning? Where is the forethought? Where is the common sense? Please reply, and thank you for your time and consideration.

Sincerely,

A handwritten signature in black ink, reading "Matthew G. Goodrich". The signature is written in a cursive, flowing style.

Dear Commissioner Lark,

I am concerned about the energy situation in our state. Our future needs should be considered and made a priority. As a member of the Public Service Commission, you have the power to lead our state in adopting energy-saving programs. We need to have a plan!

Price gouging by the DTE or any other Energy company should not be tolerated. A closer and stricter watch on these companies should be instituted to protect Michigan residents from price gouging.

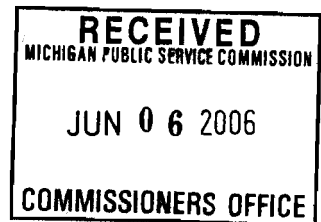

I would appreciate hearing how your commission is planning for the future of Michigan's energy.

Thank you very much for the service you do for our state.

Sincerely,

Barbara L. Jones

Susan Pierce

A handwritten signature in cursive script that reads "Susan Pierce".

Dear Commissioners; Mr. Lark, Ms. Chapelle, and Ms. Martinez,

We support clean, reliable, and affordable energy.

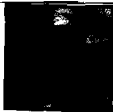

In the case U-14838, it should be insisted that DTE refund the \$44 million it took from its customers through over-earnings. There needs to be a message to all utilities saying that all price gouging won't be tolerated.

Also, renewable energy and energy-saving should be a priority. Wind energy costs are going down and will be much cheaper in the long run.

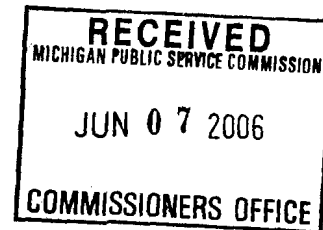

The Energy Plan should encourage energy-savings programs. For every \$1 spent on energy-efficiency, people save \$2. This is a much better use of money than building more costly fossil-fueled electric plants.

Sincerely,

Student
Resident Assistant

To Whom it may concern:

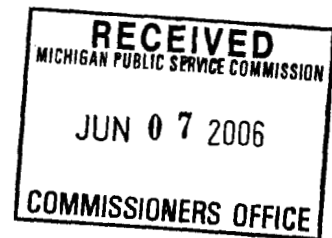

I believe that Utility Companies should be held accountable for price gouging. such as in the case of U-4832. I also believe that

Michigan should begin developing a 21st Century Energy Plan. With a clean, and renewable Energy source such as wind. This energy plan should encourage and also fund Energy-saving programs.

I hope that who ever reads this does not think of only their own pockets, but also think of the general populace and the environment.

Lansing, MI 48909

Dear Commissioners:

I am a ninth grade student at City High School and I am very concerned about the rising cost of energy. Americans need to develop a plan for more efficient energy to help control the rising costs. Many companies are earning money that they are basically stealing from other people. We need to develop a plan to stop this and help keep electricity affordable.

Michigan has a great potential for wind power; 11% of electricity could be wind powered but we let this opportunity pass us by. In addition to developing a plan, there needs to be more research about alternative fuel sources.

Please do something about this issue for the environment's and the people of Michigan's sake. Thank you for reading this letter. I would appreciate it if you would reply.

Sincerely,

Marjorie Biel

I believe that as customers + consumers we should be treated fairly and not have to pay large amounts for fuel. I also believe that we as dependents of oil and fossil fuels should find other sources of energy such as electric, solar power etc. For the customers who where taken advantage of and had to pay large amounts for fuel and oil, they should be reimbursed in some way.

Ronald D Robinson

6/5/06

Commissioners Peter Lark, Laura Chapelle and
Monica Martinez:

I urge you to insist that The DTE refund the \$44
million it gouged from its customers through over-earning
in case U-14838.

Please also make renewable energy ~~energy~~ and energy-
savings a priority in developing The Commission's 21st
Century Energy Plan. Wind energy will be cheaper in the long
run.

For every \$1 spent on energy efficiency, customers save \$2.
Please encourage and fund energy-saving programs in the
Energy Plan, rather than spend more money building
fossil-fueled electric plants. I look forward to your reply.

Sincerely,

Sandra Borden

2421 Waite

Kalamazoo MI 49008

Commissioners Peter Lark, Laura Chapelle,
Monica Martinez,

I am writing to let you know how disgusted we are with the price of electric. We don't understand how come you cannot force companies to put a set limit and they cannot go over that. My electric bill budget year was a reasonable 54.00 per month. We just got our new bill and they raised the budget to 69.00 per month. We never went over our 54.00 limit, so I called and the person I talked to blamed the cost increase on higher electric cost. I told them that I would not have the extra 15.00 per month I already live on a very fixed income. My husband is the only one that works and we're raising a family. My husband is not getting a raise to keep up with the high cost

of fuel and increasing
Cost of living.

Please put a stop to
the high rise cost of
utilities before we're all
on the unemployment
line and filing for
bankruptcy.

Please think of the
family generation before
thinking of the \$ signs.

Lansing, MI 48909
June 5, 2006

Commissioners: Peter Lark, Laura Chapelle, Monica Martinez

Urgent action is needed for Michigan's future electric needs. I propose the following:

The commission should insist DTE refund the \$44 million it gouged from its customers through over-earnings. The Commission should send a message to all utilities that price gouging will not be tolerated (Case U-014838)

The 21st Century ~~energy~~ plan should make renewable energy and energy-saving a priority. The cost of wind energy is declining and is cheaper in the long run.

The energy plan should encourage and fund energy-saving programs. For every \$1.00 spent on energy-efficiency, customers save \$2.00.

This is a better use of money than
building more costly fossil-fueled
electric plants.

Please reply to these following
proposals.

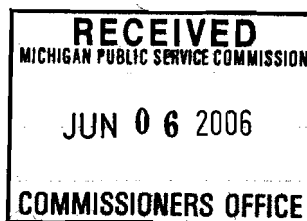

Sincerely

Cynthia R. Buch

Ms. Cynthia Buch
10603 Cora Dr.
Portage, MI 49002-7320

To Commissioners:
Peter Lark
Laura Chapelle
Monica Martinez

I am concerned about Michigan's future in providing clean and affordable electricity for the public. Michigan has never had a planning process for addressing long-term needs for electricity and new power plants, a process that looks at what types of plants are cost-effective and what role energy conservation and efficiency can play. As a result, the public ends up paying for whatever decisions are made for them by utility companies. It is time for a change.

In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. We need the Commission to send a clear message to all utilities that price gouging will not be tolerated. Without a strong commitment from regulators and elected officials, deregulated utilities will do whatever is best for their executives and shareholders, not for their customers.

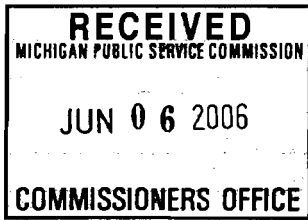

The Commission also needs to make renewable energy and energy-savings a strong priority. The cost of wind energy is declining and will be cheaper in the long run. Renewable energy, particularly wind, will keep more money in the Michigan economy. Our state can be a leader in developing clean and affordable renewable energy.

Michigan's energy plan should encourage and fund energy-saving programs. For every \$1.00 spent on energy-efficiency, customers can save \$2.00. This is a better use of money than building more costly fossil-fueled electric plants. Michigan customers are presently facing the ever-increasing costs of upgrading aging coal plants. We are saying "enough is enough."

Please listen to the voices of Michigan residents to support clean and affordable energy!
I look forward to your reply to my letter.

Sincerely,

Michele S. Nedervelt

Lansing, MI 48909

Dear Commissioners:

Please send a strong message to DTE
that price gouging won't be tolerated.

Or demand that the \$44 million
it gouged from customers be
used to develop wind energy
and other renewables.

Renewable energy and energy-savings
should be a priority of the
Commission in developing 21st
Century Energy Plan.

This plan needs to include
energy saving programs and
convey the absolute necessity
of such programs.

Thank you for your attention
to this matter.

Sincerely,
Gerena Ocampo

5-30-06

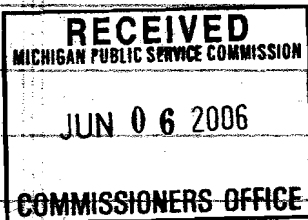

DEAR COMMISSIONERS,

EACH DAY, THE HUMAN RACE USES UP
OUR NATURAL RESOURCES FASTER THAN IT
CAN REPLENISH ITSELF. ALTERNATIVE WAYS
FOR PRODUCING ENERGY ARE NEEDED. UTILITIES
ARE RECORDING RECORD PROFITS. THIS PRICE
GOOGING SHOULD BE STOPPED. MORE MONEY
FROM THESE PROFITS SHOULD BE USED
FOR ALTERNATIVE ENERGY STUDIES. PEOPLE
OF THE FUTURE SHOULD NOT SUFFER
FOR OUR MISTAKES.

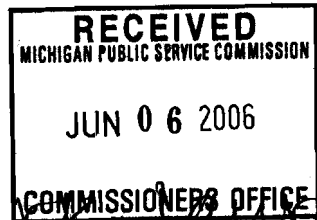

SINCERELY

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

In Case U-14838 the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The Commission should send a message to all utilities that price gouging won't be tolerated.

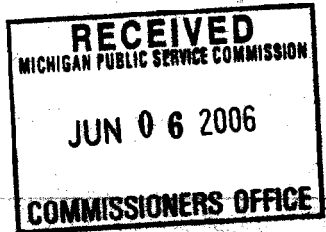

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The energy plan should encourage and fund energy saving programs. For every \$1 spent on energy efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Please reply to the above issues and let us know the plan to correct them.

P. Bliss
513 Gabbardine Dr
Portage MI 49024

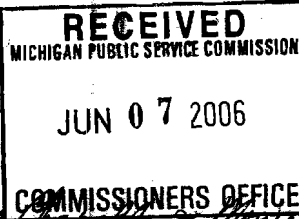

Thank you,
Rebecca Bliss

Dear Commissioners

1. In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The Commission should send a message to all utilities that price gouging won't be tolerated.
2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
3. The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Thank you
Sheila K Scollard

Commissioners Peter Lack, Laura Ingalls, & Monica Martinez,

In case U-14838 the Commission should ^{the} ~~use~~ the DTE refund 44 million it gouged from its customers through over-earning. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Please reply

6/2/06

Dear Commissioners,

Electric rates are rising beyond what most citizens can afford without cutting out other necessities. I am writing to ask you to support for cleaner, more reliable and less costly energy.

I would like you to make alternative energy sources a priority similar to what happened during the 1970's.

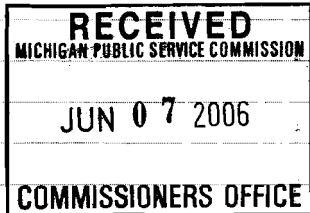

Tax incentives for both private citizens and companies involved in alternatives would be a good start.

Michigan needs a multi

year plan to address
energy sources and
costs.

Please contact me with
anyway I can help
or with information
on any actions you
may take.

Commissioners Peter Lark, Laura Chapelle, Monica Martinez
Michigan Public Service Commission
PO Box 30221
Lansing, MI 48909

Dear Commisioners:

You have a tough job but there are ways to help consumers keep energy affordable! Please consider making renewable energy and consider wind energy as one of the sources. The cost of wind energy is declining and will be cheaper in the long run. The Energy plan that is being considered needs to encourage and fund energy-saving programs. You are the people that can help make this happen.

Please also insist that DTE refund the millions of dollars it gouged from its customers through over-earnings. Please send a message to all utilities that price gouging will not be tolerated.

Your attention to these matters is appreciated. Please keep the consumers informed.

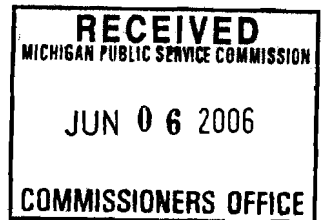

Sincerely,

A handwritten signature in black ink that reads "Ivan Van Duyn". The signature is fluid and cursive.

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez:

As you are all well aware, clean, affordable energy is of huge concern to many Michigan residents. While developing the 21st Century Energy Plan, I urge you to make renewable energy and energy-savings a priority. Please consider all forms of renewable energy, but especially consider wind energy. Please also encourage and fund energy-saving programs, programs that promote energy-efficiency will save consumers and will make happy constituents. Please also send a message to utility operators that price gouging will not be tolerated by insisting in case U-14838, that DTE refund the \$44 million it gouged from customers. Michigan really needs a strong 21st Century Energy Plan that relies on renewable energy and that promotes energy conservation. Please respond to my letter and tell me what you are doing to ensure that Michigan has a bright energy future.

Sincerely,

A handwritten signature in black ink, appearing to read "Katrina A. Button". The signature is fluid and cursive.

.....

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez

I wish to express my concern in the lack of leadership our State Government has displayed with regards to our energy needs and security. We as state must start now looking to the future with respects to clean and renewable energy. In particular the following are relevant to this issue.

- 1) In developing its 21st Century Energy Plan, the commission should make renewable energy and energy-savings a top priority. The cost of wind and solar energy is declining will be cheaper and considerably more environmentally friendly in the long run.
- 2) The Energy Plan should encourage and fund energy-savings programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Please think of our children's future rather than the Utilities Companies when developing an energy plan. Please also keep me informed of your plans.

Sincerely,

A handwritten signature in black ink, appearing to read "Todd Raeker".

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners:

As a 63 year-old who grew up on a farm in Pennsylvania in the 1950's, I find it appalling that so many Americans are so wasteful and unconcerned about our natural resources. In the 1950's it was a given that we recycle, renew and regenerate everything we could. Your commission should have an Energy Plan for the 21st Century for our State. Renewable energy and energy-savings should be a priority. The wind is out there and we should take full advantage of the power it can supply us.

This Energy Plan you come up with should encourage our citizens to save energy. You must fund energy-saving programs.

About price gouging in case 14838 ^(DTE) the Commission should make sure Detroit Edison refunds the \$44 million it gouged from its customers. All utilities should be aware that price gouging will not be tolerated.

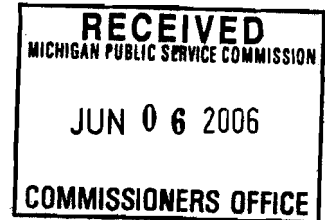

Please let me know that you will work on these issues.

Thank you!

Sincerely,
ANNE BIRD (Anne Bird)

To Commissioners:
Peter Lark
Laura Chapelle
Monica Martinez

Michigan Public Service Commission
PO Box 30221
Lansing MI
48909

The State of Michigan needs to be cognizant of an number of issues surrounding the use and development of energy in this State. The State needs to respond to consumers' concerns regarding the following three items:

First, funds granted to organizations for the development of alternative energy sources must be accounted for by showing a clear plan for research and development with clear and attainable goals.

Energy sales companies should be forced to put their profits into research and development for alternative energy systems. DTE needs to be accountable to the public to show this type of activity and justify their \$44 billion in over-earnings.

Funding for energy-saving programs like the Energy Plan needs a broader scope to allow people to take advantage of renewable energy resources such as solar and wind power.

Please take the time to respond to these concerns. Renewable and sustainable energy must be a priority. The public has an expectation that their elected leaders are taking care of the future.

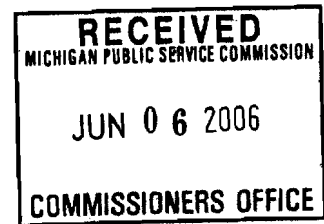

Thank you,
Victoria Campbell

June 1, 2006

Michigan Public Service Commission
Box 30221
Lansing MI 48909

Subject: Michigan's Future Electric Power Needs

Your constituents are concerned about the future electrical power needs in the state, and ask that you do the following:

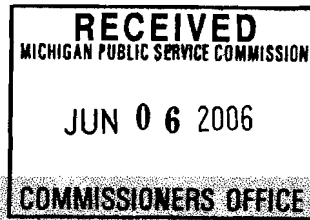

- In case U-14838, please insist that DTE refund to its customers the \$44 Mil excess profits that were generated through price-gouging. There needs to be a message to *all* utilities that price gouging will not be tolerated.
- Make renewable energy and energy-savings a priority when developing the plan for the 21st century. Give serious consideration to the use of wind power, which is becoming more cost-effective with the passage of time.
- Encourage and fund energy-saving programs. Information now available indicates that the savings to customers exceeds the cost of implementing these programs by a 2:1 margin. This is far better than subsidizing the cost of additional fossil-fueled electric plants.

Please reply with an outline of your commission's plans. Your cooperation is appreciated.

Sincerely,

A handwritten signature in black ink that reads "Douglas C. Imlach".

Dear Commissioners:

Thank you for taking the time to read this letter. I appreciate the difficult job that you have before you; balancing the environment and cost analysis must be very complex. In developing the 21st Century Energy Plan, please make renewable energy and energy-savings a priority. I think just about everyone in the United States is aware of the non-renewable nature of fossil fuels. Now is the time to make long-term decisions that will impact the environment for our children. Wind energy costs are declining and will be less expensive down the road; geo-thermal energy is also a very viable option. The new Energy Plan should also encourage (and subsidize, where possible) energy-saving programs. This will be a much better use of money than building more fossil-fuel electric plants. As a message to the energy industry, DTE should be made to pay back the money that they overcharged consumers. At all times but especially in this economy, utilities and other companies should be made to understand that price gouging will not be tolerated.

Thank you again for your time. I trust that you will consider all of the angles as you form the new Energy Plan. Kindly remember that the decisions made affect not only us, but our children and their children, as well.

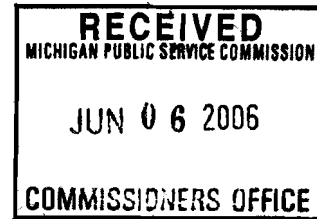

Sincerely,

A handwritten signature in black ink, appearing to read "Sara F. Meyer". The signature is fluid and cursive, with a large, sweeping "S" at the beginning.

Dear Commissioners,

I am writing to voice my support for clean, reliable and affordable energy. Our nation's dependence on fossil fuels is frightening and our leaders are doing nothing about it. We are ruining our earth and our way of life by refusing to face this critical issue. Hopefully the State of Michigan will do what our national leaders cannot and take steps now to confront this crisis.

I urge you to insist that the DTE refund the \$44 million it gouged from its customers through over-earnings. This will send a message that price gouging will not be tolerated. In addition I would urge you to make energy and energy savings a high priority. The cost of wind energy is declining and will be cheaper in the long run.

Please encourage and fund energy savings programs. For every \$1 spent on energy efficiency, customers save \$2. This is a better use of money than more costly fossil fueled electric plants.

Please take a stand for the future of this nation, the earth, and all of her children.

June 2nd, 2006

Commissioner Peter Lark,

I am writing in regards to renewal energy, particularly wind, which would provide long-term cost savings while keeping more money in the Michigan economy. I believe that Michigan needs to be a leader in developing clean and affordable renewable energy.

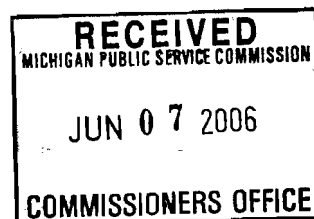

I also believe that we could save energy through conservation and efficiency programs and that it would be cheaper than building new power plants. In other states, these programs save \$2 for every \$1 invested, with customers saving money year after year.

Without a strong commitment from regulators and elected officials, such as you, deregulated utilities will do what is best for their executives and shareholders, not for their customers.

When developing the 21st Century Energy Plan, the commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run. The Energy Plan should encourage and fund energy-saving programs.

In closing, I believe the Commission should insist that DTE refund the \$44 million dollars it gouged from it's customers through over-earnings.

Sincerely,
Gail Welton

Dear Commissioners Lark, Chapelle and Martinez,

I am concerned about the cost of energy and the need for clean energy. Please support the important and critical actions listed below.

1. In case U14838, the Commission should insist that DTE refund the \$44 million it earned when many people were barely making ends meet. Hopefully, this will send a strong message that price gouging will not be tolerated by any utilities in the future.
2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-saving a priority. The cost of wind energy is declining and should be considered as a viable alternative in the future.
3. The Energy Plan should encourage and fund energy-saving programs. It is imperative that we find alternatives to costly fossil-fueled electric plants.

As a mother of two boys 8 and 9 years old, I want to leave their generation better off than ours. Please show the leadership and critical thinking required to effectively plan for a better future for all children.

I am counting on you to take the right action.

Best Regards,

RE: High cost energy

I am a concerned energy user and I would like to bring to your attention the following;

1. **In case U-14838**, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

2. **In developing its 21st Century Energy Plan**, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

3. **The Energy Plan should encourage and fund energy-saving programs.** For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Please respond. This is a very important issue and needs your attention.

Thank you for your time.

Commissioners Peter Lark, Laura Chapelle
And Monica Martinez
Michigan Public Service commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners:

In the U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Sincerely,

Kathy Pross

Dear Commissioners P. Lark, L. Chapelle and M. Martinez,

In Case U-14838 there are accusations that DTE overcharged consumers by \$44M. The Commission should thoroughly investigate and if the charges be true, then the Commission should insist that DTE fully refund the amount to the consumers. This would send a strong message to utilities that unwarranted charges will not be tolerated.

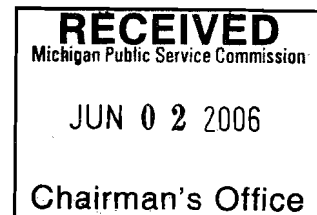

In developing an energy plan for the 21st Century, the Commission should make renewable energy and energy saving priorities. Examples include wind and solar energy and potentially wave energy. The Energy Plan should also encourage and fund energy saving programs.

Fossil fuels are scarce and becoming scarcer. Prolonging America's dependence on fossil fuels and therefore on foreign supplies puts us at risk. In addition, fossil fuels are polluting. Rather than spending increasing amounts of money on trying to clean up fossil fuels; please consider spending the equivalent in discovering, developing and implementing alternate sources. If the public, the energy companies and the Michigan Government work together, we could make Michigan a leader in energy independence and greenhouse abatement. We could send a strong message to the rest of the nation.

I would appreciate if you would do me the honor of a response and I look forward to receiving your thoughts on this very important issue.

Respectfully submitted,
Dr. Clifford E. Sacks

Commissioners: Monica, Laura and Peter,

I had the opportunity of talking with a young lady from Michigan Consumer Federation the last of May. She explained some interesting facts I was not aware of. Let me share what I learned.

We were taken advantage of in the DTE asking for assistance when they ended up making a profit of \$44 million over earnings. Would be great if you could send a message to the utilities that we consumers won't accept that kind of behavior.

The cost of wind energy is declining and will be cheaper. Sounds like the commission should make renewable energy-savings a # 1 priority.

For every \$1 spent on energy-efficiency, we customers save \$2. Boy, that sounds great to me. My Consumers bills were high this year.

One last thing I didn't pay attention to is that our utilities have had the power to plan our future and this has led us in higher and higher rates. That is something I am very angry about. They have their own and stock holders interests and not we the consumers. Why do we allow them to remain in power?

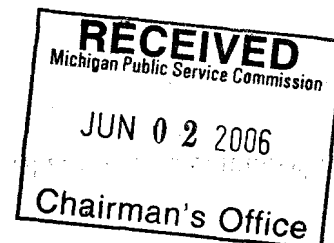

Please reply to me by mail or E-mail. I'm interested to hear what you as a commission are planning to do about these issues. Look forward to hear in from you.

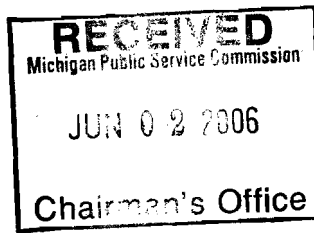

Thank-you for your time,

Raymond Lage

May 31, 2006

Michigan Public Service Commission
P. O. Box 30221
Lansing, MI 48909
Attention:
Mr. Peter Lark, Commissioner
Ms. Laura Chapelle, Commissioner
Ms. Monica Martinez, Commissioner

Dear Mr. Lark, Ms. Chapelle, and Ms. Martinez,

As a DTE consumer and citizen of Michigan with children (who will in the future find energy resources much more challenging than we do today) I have the following concerns. We have become dependent on DTE and the status quo concerning our day-to-day energy use. Therefore, I am asking that the Commission, regarding case U-14838, insist that DTE refund the \$44 million dollars that it gouged from its' customers through over-earnings. The Commission should send a message to all utilities that price gouging won't be tolerated.

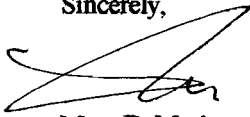

As well, our renewable energy resources are being ignored. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

As an incentive to consumers, the Energy Plan should encourage and fund energy-savings programs. For instance, every \$1 dollar spent on energy-efficiency efforts could result in customers saving \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

We are in the middle of an oil crisis, when we have plausible alternatives not being explored. We are in the 21st Century, not the industrial age. Ours is not a third-world country, surely we can use our scientific knowledge toward an effort to find alternatives. We must act now.

Please respond to this letter and do the right thing. Please reply to me about the course of action that you are going to take regarding this matter.

Sincerely,

Mary B. Marine

Attention Commissioners Peter Luch
Laura Chapelle
Monica Martinez

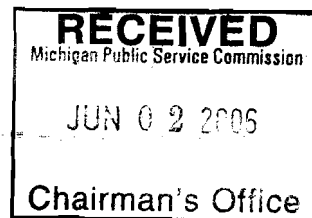

I am requesting a plan for action for Michigan's Future Electric Needs. The commission should send a message to all utilities that price gouging won't be tolerated! You need to make renewable energy and energy-savings a priority! Programs must be developed for energy-savings.

Thank you for your time

Jennifer A Krause

Jennifer and Jim Krause

Portage, MI 49802

To the Commissioners Peter Lark, Laura Chapelle, and Monica Martinez:

In the case of U-14838, the Commission should insist that PTE refund the \$44 million it gouged from its customers through over-earnings. The Commission should send a message to all utilities that price gouging will not be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long-run. Also, the Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more fossil fueled electric plants.

With the information provided to me it appears that we rely on an exhaustable and expensive energy system, and that not much has been put into alternative energy options. I do not have much to offer for input as far as facts, but I appreciate what the Michigan Consumer Federation is doing and has accomplished. I would like to see fair charges applied to services.

Thank you for your time.

5/30/06

Dear Commissioners:

I encourage in Case U-14838 that you vote in favor of having DTE refund the 44 million dollars to its customers as a result of over earnings so that a strong message to other utilities that overcharging will not be tolerated.

I also support the development of renewable energy such as wind and solar power which I believe would be more cost effective and environmentally friendly.

Sincerely:

W. Gasparini

Mr. Commissioner Lark,

I've been asked to write a letter to request that you take action for Michigan's future electrical needs. Please insist that DTE refund money to its customers through over-earnings.

Please try to make renewable energy and energy-savings a priority.

Thank you for your time and contributions to our state and country.

Commissioners Peter Lark
Laura Chapelle and Monica Martinez
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners:

It is imperative that your commission begin working toward energy conservation and energy saving programs for the citizens of Michigan. As a starting point, DTE should be required to refund to its customers the \$44 million it obtained through over-earning. There should be closer monitoring of all utility companies to protect the consumer and avoid price-gouging.

Renewable energy and energy savings should become a number one priority. Wind energy is a viable option and should be explored further. An energy-saving program should be funded by the commission to benefit customers. This should be explored to ease the dependency on fossil-fueled electric plants.

It would be greatly appreciated if I could receive a response to better understand what the commission is doing to address these important issues. Our state and country has too much dependency on fossil-fuels and other alternatives are greatly needed.

Thank you.

Sincerely,

Dear: Commissioner Peter Lark
Commissioner Laura Chapelle
Commissioner Monica Martinez

I support the planning and implementation of renewable energy sources for Michigan, specifically, construction of wind-powered turbines for energy needs in the next 10 to 50 years. Michigan economic development requires energy expenditure. I do not support the idea of the state continuing to be entirely dependent on out-of-state, fossil-fueled energy sources. The 21st Century Energy Plan must also include energy savings programs encouraging financially rewarding the use of energy efficient appliances or activities that lower and save energy consumption by households or businesses.

Please also follow-up the \$44 million refund DTE owes its customers from price gouging (Case U-14838).

Yours truly,

June Escara-Wilke

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

I am writing in regards to case U-14838, the commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

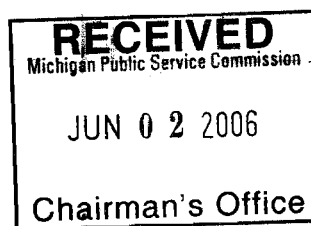

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper to in the long run.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money then building more costly fossil-fueled electric plants.

Please address these issues and send me a reply. Thank you for your concern for our environment and your help on energy savings.

Sincerely,

Janice Wildermuth

5/24/06

Dear Commissioner Martineau

I am writing in support of the
Michigan Consumer Federation.

In case U-14838, the Commission should
insist that DTE refund the \$44 million
it has gouged through over-earnings.

The Commission should send a clear
message that price gouging will not
be tolerated.

In developing its 21st Century
Energy Plan, the Commission should
make renewable energy & energy-
savings a priority.

The Energy Plan should encourage
& fund energy-savings programs.

Thanks for your time,
Ellen Patrick

Peter Lark
Laura Chapelle
Monica Martinez

5-24-06

Dear Commissioners,

My letter is in support of clean, reliable, and affordable energy.

Please consider the following:

1. In case U-14838, the Commission should insist that DTE refund the \$44MM it gouged from its customers through over earnings. The commission should send a message to all utilities that price gouging won't be tolerated.
2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
3. The Energy Plan should encourage and fund energy-savings programs. For every \$1.00 spend on energy efficiency customer save \$2.00. This is a better use of money than building more and more costly fossil fueled electric plants.

Thank you for your time.
Heather Lisk
