In the matter of the Complaint of CORVUS Incorporated against TelCove Operations, Inc.	)))	Case No. U-14901 E-FILE/PAPERLESS

FORMAL COMPLAINT

CORVUS Incorporated ("CORVUS"), by and through its attorneys, Clark Hill PLC, and pursuant to Sections 101, 203, 204, and 205 of the Michigan Telecommunications Act ("MTA"),[1] Part 5 of the Rules of Practice and Procedure before the Michigan Public Service Commission[2] ("MPSC" or "Commission"), and other applicable law and authority, respectfully submits this Formal Complaint against TelCove Operations, Inc. d/b/a TelCove ("Defendant" or "TelCove").

OVERVIEW OF COMPLAINT

1. CORVUS brings this action against the Defendant for violations of Sections 502[3] of the MTA.

2. CORVUS also brings this action against the Defendant for violations of Section 505[4] of the MTA.

3. CORVUS brings this action to have the Defendant declared in breach of its Contract with CORVUS.

---

[1] MCL 484.2101 *et seq.*

[2] 2000 MAC R 460.17501 *et seq.*

[3] MCL 484.2502.

[4] MCL 484.2507.

4. CORVUS brings this action against the Defendant seeking to have a portion of the Defendant's Tariffs MPSC No. 1, 2 and 3 declared to be against the public interest and declared to be not just and reasonable and to have such tariff provisions invalidated.

5. And, CORVUS brings this action against the Defendant seeking to have other portions of the Defendant's Tariffs MPSC No. 1, 2 and 3, specifically enforced against the Defendant.

6. From December 23, 2003 through January 2006, CORVUS purchased various telecommunications services from the Defendant.

7. The Defendant provided collocation to CORVUS.

8. The Defendant provided to CORVUS certain dedicated facilities, including two (2) DS-3 and twenty-five (25) DS-1 circuits.

9. The Defendant agreed to provide local and intraLATA long distance service to CORVUS and CORVUS' clients

10. The Defendant agreed to route CORVUS and CORVUS' clients' interLATA long distance service to CORVUS' chosen interexchange service provider, Qwest.

11. After August 2004, Defendant agreed to route CORVUS and CORVUS' clients' intraLATA toll service to CORVUS' chosen interexchange service provider, Qwest.

12. The Defendant agreed to provide CORVUS with billing records for all calls routed by the Defendant on a timely and accurate basis.

13. The Defendant failed to provide all the services for which the Defendant agreed and contracted to provide.

14. On more than one occasion, the Defendant caused an unauthorized switch of CORVUS and CORVUS' clients interLATA long distance service.

15. CORVUS seeks a formal contested case hearing to determine that the Defendant's actions have violated the MTA.

16. CORVUS seeks a formal contested case hearing to determine that the Defendant's tariffs are against the public interest and are not just and reasonable and to have such tariff provisions of the Defendant's tariffs invalidated.

17. CORVUS seeks a formal contested case hearing to enforce portions of the Defendant's Tariffs.

JURISDICTION

18. This Commission has jurisdiction to resolve a dispute between providers pursuant to Sections 101,[5] 203,[6] and 204[7] of the MTA.

19. This Commission has jurisdiction to investigate and resolve complaints for violations of the MTA pursuant to Sections 101,[8] 203,[9] and 205[10] and 601[11] of the MTA.

20. The Michigan Supreme Court has held that this Commission has primary jurisdiction to resolve issues arising under the MTA and under tariffs on file with the Commission.[12]

THE PARTIES

21. CORVUS is a Michigan corporation with its principal place of business located at 25200 Telegraph Road, Third Floor SW, Southfield, Michigan 48034.

22. CORVUS is a telecommunications carrier and a "competitive local exchange carrier" ("CLEC") that provides, among other services, basic local exchange services to residential and business customers in various exchanges throughout the State of Michigan.

23. CORVUS was granted a license by this Commission to provide basic local exchange service in the zone and exchange areas where AT&T Michigan, Verizon North, Inc. and Contel of the South d/b/a Verizon North Systems are the incumbent local exchange carriers on March 7, 2001 in MPSC Case No. U-12716.[13]

24. CORVUS is a provider of services to less than 250,000 end-users in the State of Michigan.

25. Based on information and belief, Defendant is a Delaware Corporation with its principal place of business in Canonsburg, Pennsylvania.

26. Based on information and belief, Defendant is currently offering basic local exchange service, intraLATA toll, interLATA toll, and unregulated telecommunications services in the State of Michigan.

FACTUAL BACKGROUND

27. On December 23, 2003 CORVUS entered into a Service Agreement with Defendant to provide certain telecommunications services.

---

[13] *In the matter of the application of CORVUS, Inc., for a license to provide basic local exchange service througout the state of Michigan in the zone and exchange areas served by Verizon North Inc., Verizon North Systems and Ameritech Michigan*, MPSC Case No. U-12716, Opinion and Order, Mar 7, 2001.

28. On or about March 4, 2004, the Service Agreement was amended to include "Additional Terms and Conditions" (collectively the "Contract").

29. Under the Contract, Defendant was to provide certain dedicated facilities, including two (2) DS-3 and twenty-five (25) DS-1 circuits, to CORVUS.

30. Under the Contract, Defendant was to provide certain collocation services to CORVUS.

31. Under the Contract, Defendant was to provide local and intraLATA long distance service to CORVUS and CORVUS' clients.

32. Under the Contract, Defendant was to "port" all of CORVUS' direct inward dialing ("DID") numbers to the Defendant's system.

33. Under the Contract, Defendant was to "pass through" intrastate and interstate long distance to CORVUS' chosen IXC, Qwest.

34. Under the Contract, Defendant was to "forward billing data on acceptable media to CORVUS' billing processor . . . within ten (10) calendar days of [Defendant's] monthly billing cycle closure."

35. Under the Contract, Defendant was to deliver bulk call data to CORVUS' billing processor in a "generally acceptable billing format."

36. Under the Contract, Defendant was to assist CORVUS' billing processor with setup, testing, and commissioning of billing transactions.

37. Under the Contract, Defendant agreed to "bill calls in six (6) second increments of use without rounding up to the next highest minute."

38. In April 2004, Defendant began routing CORVUS' traffic over Defendant's network.

39. In April 2004, Defendant claimed to have tested billing procedures with CORVUS' billing processor.

40. In May 2004, CORVUS was informed by its Billing Processor that Defendant had not tested billing procedures.

41. Starting in May 2004, Defendant failed to successfully send billing records to CORVUS' billing processor to facilitate billing of CORVUS' clients.

42. In May and June of 2004, Defendant assigned incorrect and duplicate Billing Telephone Numbers ("BTNs") to CORVUS' clients.

43. Such duplicate and incorrect BTNs resulted in CORVUS' clients and other third parties being assigned to an incorrect and unauthorized interexchange carriers.

44. In May 2004, CORVUS complained to Defendant about service problems, including the inability to properly and correctly send accurate billing records to CORVUS' billing processor.

45. In June 2004, CORVUS discovered that Defendant was transporting CORVUS' and CORVUS' clients' long distance service without authorization.

46. In August 2004, CORVUS specifically requested that the Defendant cease transporting CORVUS' and CORVUS' clients' intraLATA Toll service.

47. From August 2004 through December 2004, Defendant was transporting CORVUS' and CORVUS' clients' intraLATA toll and long distance service without authorization.

48. Defendant repeatedly made misrepresentations that various service problems and billing issues would be corrected, when Defendant knew they would not, or could not be.

COUNT 1
VIOLATIONS OF SECTION 505 OF THE MTA
CAUSED BY DEFENDANT'S ASSIGNMENT OF BTNS

49. CORVUS repeats paragraph 1 through 48 as though fully set forth here.

50. Section 505[14] of the MTA provides that "[a]n end-user of a telecommunications provider shall not be switched to another provider without the authorization of the end-user."

51. Defendant used seventeen (17) unauthorized Billing Telephone Numbers ("BTNs") without purchasing said numbers from the North American Number Plan Administrator ("NANPA").

52. As a result of the use of unauthorized BTNs by the Defendant, CORVUS PICCed the seventeen (17) BTNs to its chosen interexchange carrier, Qwest.

53. When CORVUS PICCed the unauthorized BTNs, the long distance carrier for each of the seventeen (17) lawful users of said BTNs was switched without authorization.

54. None of the seventeen lawful users of said BTNs, nor their authorized local or long distance carriers, gave Defendant express oral or written authorization to utilize their BTNs.

55. CORVUS seeks an order finding that Defendant's use of unauthorized BTNs directly caused seventeen (17) violations of Section 505 of the MTA and caused "end-user[s] of a telecommunications provider [to] be switched to another provider without the authorization of the end-user."

COUNT 2
VIOLATIONS OF SECTION 505 OF THE MTA
CAUSED BY DEFENDANT'S REFUSAL
TO ROUTE TRAFFIC TO CORVUS' DESIGNATED IXC

56. CORVUS repeats paragraph 1 through 55 as though fully set forth here.

[14] MCL 484.2505.

57. Section 505[15] of the MTA provides that "[a]n end-user of a telecommunications provider shall not be switched to another provider without the authorization of the end-user."

58. Defendant's Contract with CORVUS required Defendant to route "CORVUS' Intra-State and Inter-State traffic through its Southfield Michigan switching facility to Qwest Communications over a separate trunk group provided by Qwest to CORVUS with no further charges to CORVUS or QWEST Communications."

59. After August 2004, this Contract was modified, to include the routing of intraLATA Toll traffic to Qwest as well.

60. From May 2004 through December 16, 2005, Defendant should have routed all long distance service for CORVUS, as an end-user, to CORVUS' authorized long distance provider, Qwest.

61. From May 2004 through December 16, 2005, Defendant should have routed all long distance service for CORVUS' seventeen (17) clients to their authorized long distance provider, Qwest.

62. From August 2004 through December 16, 2005, Defendant should have routed all intraLATA toll service for CORVUS, as an end-user, to CORVUS' authorized long distance provider, Qwest.

63. From August 2004 through December 16, 2005, Defendant should have routed all intraLATA toll service for CORVUS' seventeen (17) clients to their authorized long distance provider, Qwest.

[15] MCL 484.2505.

64. From May 2004 through December 16, 2005, Defendant switched CORVUS' (the end-user) long distance service to the Defendant, as the long distance provider, without CORVUS' authorization.

65. From May 2004 through December 16, 2005, Defendant switched CORVUS' seventeen (17) clients' long distance service to the Defendant, as the long distance provider, without authorization.

66. From August 2004 through December 16, 2005, Defendant switched CORVUS' (the end-user) intraLATA toll service to the Defendant, as the long distance provider, without CORVUS' authorization.

67. From August 2004 through December 16, 2005, Defendant switched CORVUS' seventeen (17) clients' intraLATA toll service to the Defendant, as the long distance provider, without authorization.

68. CORVUS seeks an order finding that Defendant's unauthorized switching of long distance and intraLATA toll service to the Defendant as the provider for CORVUS and CORVUS' seventeen (17) clients, constitutes thirty-six (36) violations of Section 505 of the MTA.

COUNT 3
VIOLATION OF SECTION 502(1)(A) OF THE MTA

69. CORVUS repeats paragraph 1 through 68 as though fully set forth here.

70. Section 502(1)(a)16 of the MTA provides that "[a] provider of a telecommunication service shall not . . . [m]ake a statement or representation, including the omission of material information, regarding the rates, terms, or conditions of providing a

[16] MCL 484.2502(1)(a).

telecommunication service that is false, misleading, or deceptive. As used in this subdivision, 'material information' includes, but is not limited to, all applicable fees, taxes, and charges that will be billed to the end-user, regardless of whether the fees, taxes, or charges are authorized by state or federal law."

71. Defendant's Contract with CORVUS required Defendant to "forward billing data on acceptable media to CORVUS' billing processor in Wallingsford, CT. within ten (10) calendar days of TelCove's monthly billing cycle closure."

72. From May 2004 through December 2005, Defendant failed to successfully forward accurate billing data to CORVUS' billing processor, Profitec.

73. From May 2004 through December 15, 2005, Defendant repeatedly made misleading and incorrect statements to CORVUS by informing CORVUS that they had worked with Profitec to resolve the billing issues.

74. From May 2004 through December 16, 2005, Defendant repeatedly encouraged CORVUS by assuring CORVUS that each month would produce accurate and timely billing in the correct billing format on or before the tenth day of each new billing month.

75. Defendant's Contract with CORVUS required Defendant to route "CORVUS' Intra-State and Inter-State traffic through its Southfield Michigan switching facility to Qwest Communications over a separate trunk group provided by Qwest to CORVUS with no further charges to CORVUS or QWEST Communications."

76. From May 2004 through December 16, 2005, Defendant failed to route long distance service from CORVUS and CORVUS' clients through Qwest.

77. From August 2005 through December 16, 2005, Defendant failed to route intaLATA toll service from CORVUS and CORVUS' clients through Qwest.

78. From May 2004 through December 16, 2005, Defendant repeatedly misrepresented to CORVUS that the Defendant could and would correct their inability to correctly route CORVUS and CORVUS' clients' traffic.

79. CORVUS seeks an order finding that Defendant violated Section 502(1)(a) of the MTA by repeatedly making statements and representations that Defendant could and would correct their routing and billing problems.

COUNT 4
VIOLATION OF SECTION 502(1)(I) OF THE MTA

80. CORVUS repeats paragraph 1 through 79 as though fully set forth here.

81. Section 502(1)(i)[17] of the MTA provides that "[a] provider of a telecommunication service shall not . . . [r]epresent or imply that the subject of a transaction will be provided promptly, or at a specified time, or within a reasonable time, if the provider knows or has reason to know it [would] not be so provided."

82. Defendant's Contract with CORVUS required Defendant to "forward billing data on acceptable media to CORVUS' billing processor in Wallingsford, CT. within ten (10) calendar days of TelCove's monthly billing cycle closure."

83. From May 2004 through December 2005, Defendant failed to successfully forward accurate billing data to CORVUS' billing processor, Profitec.

84. From May 2004 through December 15, 2005, Defendant repeatedly made representations to CORVUS that any billing issues would be corrected by the next months' billing cycle, when in fact Defendant knew, or had reason to know, that the issues would not be corrected.

[17] MCL 484.2502(1)(i).

85. Defendant's Contract with CORVUS required Defendant to route "CORVUS' Intra-State and Inter-State traffic through its Southfield Michigan switching facility to Qwest Communications over a separate trunk group provided by Qwest to CORVUS with no further charges to CORVUS or QWEST Communications."

86. From May 2004 through December 16, 2005, Defendant failed to route long distance service from CORVUS and CORVUS' clients through Qwest.

87. From August 2005 through December 16, 2005, Defendant failed to route intaLATA toll service from CORVUS and CORVUS' clients through Qwest.

88. From May 2004 through December 16, 2005, Defendant repeatedly represented to CORVUS that the Defendant could and would correct their inability to correctly route CORVUS and CORVUS' clients' traffic by the next billing cycle, when in fact Defendant knew, or had reason to know, that the issues would not be corrected.

89. CORVUS seeks an order finding that Defendant violated Section 502(1)(i) of the MTA by repeatedly representing or implying that the Defendant would correct certain deficiencies promptly, or at a specified time, or within a reasonable time, when the Defendant knew or had reason to know it will not be so corrected.

COUNT 4
BREACH OF CONTRACT

90. CORVUS repeats paragraph 1 through 89 as though fully set forth here.

91. On December 23, 2003 CORVUS entered into a Service Agreement with Defendant to provide certain telecommunications services.

92. On or about March 4, 2004, the Service Agreement was amended to include "Additional Terms and Conditions" (collectively the "Contract").

93. Defendant's Agreement with CORVUS was to route "CORVUS' Intra-State and Inter-State traffic through its Southfield Michigan switching facility to Qwest Communications over a separate trunk group provided by Qwest to CORVUS with no further charges to CORVUS or QWEST Communications."

94. Defendant failed to route all long distance service to from CORVUS and CORVUS' clients to Qwest for the period from May 2004 through December 16, 2005.

95. Defendant's Contract with CORVUS required Defendant to "bill calls in six (6) second increments of use without rounding up to the next highest minute."

96. Defendant failed to "bill calls in six (6) second increments of use without rounding up to the next highest minute" for the period from May 2004 through December 16, 2005.

97. Defendant's Contract with CORVUS required Defendant to "forward billing data on acceptable media to CORVUS' billing processor in Wallingsford, CT. within ten (10) calendar days of TelCove's monthly billing cycle closure."

98. Defendant failed to "forward [accurate, complete, and readable] billing data on acceptable media to CORVUS' billing processor in Wallingsford, CT. within ten (10) calendar days of TelCove's monthly billing cycle closure" for the period from May 2004 through December 16, 2005.

99. Defendant billed CORVUS for services it did not render.

100. CORVUS paid Defendant for services Defendant did not render.

101. By failing to provide the services called for in the Contract, Defendant breached said Contract.

102. CORVUS seeks an order finding that Defendant breached its Contract with CORVUS and ordering the Defendant to reimburse CORVUS for any payments made under said Contract.

COUNT 4
ENFORCEMENT OF TARIFF PROVISIONS

103. CORVUS repeats paragraph 1 through 102 as though fully set forth here.

104. Section 2.6.1.A of the Defendant's Tariff MPSC No. 1 – Applying to Local-End-user Telecommunications Services (Section 2, Original Page 34) provides that:

> "A credit allowance will be made when an interruption occurs because of a failure of any component furnished by the Company under this tariff. . . . "

105. Section 2.7.1.A of the Defendant's Tariff MPSC No. 2 – Governing the Provision of Switched Access Services (Section 2, Original Page 47) provides that:

> "A credit allowance will be given when service is interrupted, except as specified in Section 2.7.2 following. A service is interrupted when it becomes inoperative to the Customer, e.g., the Customer is unable to transmit or receive, because of a failure of a component furnished by the Company under this tariff."

106. Section 4.7.1.A of the Defendant's Tariff MPSC No. 3 – Governing the Provision of Dedicated Services (Section 4, Original Page 38) provides that:

> "A credit allowance will be given when service is interrupted, except as specified below. A service is interrupted when it becomes inoperative to the Customer, e.g., the Customer is unable to transmit or receive, because of a failure of a component furnished by the Company under this tariff."

107. Defendant was required, pursuant to the Contract, to provide correct and accurate billing detail for CORVUS to CORVUS' billing processor Profitec.

108. Defendant failed to provide correct and accurate billing detail for CORVUS to CORVUS' billing processor Profitec for the period from May 2004 through December 16, 2005.

109. CORVUS seeks an order finding that Defendant's billing service was interrupted from May 2004 through December 16, 2005 and that CORVUS is entitled to a credit allowance or refund under the terms of the Defendant's Tariffs which are on file with this Commission.

COUNT 5
THE LIMITATION OF LIABILITY PROVISION IN DEFENDANT'S TARIFF IS NOT JUST AND REASONABLE AND IS NOT IN THE PUBLIC INTEREST

110. CORVUS repeats paragraph 1 through 79 as though fully set forth here.

111. Section 205(2)[18] of the MTA provides that "if the commission finds, after notice and hearing, that the rates, quality, general availability, or conditions for a regulated service violate this act, an order of the commission under this act, or is adverse to the public interest, the commission may require changes in how the telecommunication services are provided."

112. In *Rinaldo's Construction Co v Michigan Bell Tel Co*[19] the Michigan Supreme Court held that "relief from the presumptively valid limitations on liability [contained in Tariffs] must first be sought before the [Commission]."

113. Defendant allegedly issued its Tariff MPSC No. 1 under authority granted by this Commission.

114. Section 2.1.4.A of the Defendant's Tariff MPSC No. 1 – Applying to Local-End-user Telecommunications Services (Section 2, Original Page 4) provides that:

[18] MCL 484.2205(2)

[19] 454 Mich. 65; 559 N.W.2d 647 (1997).

> "The liability of the Company for damages arising out of the furnishing of its Services, including but not limited to mistakes, omissions, interruptions, delays, or errors, or other defects, representations, or use of these services or arising out of the failure to furnish the service, whether caused by acts or omission, shall be limited to the extension of allowances for interruption as set forth in 2.6. The extension of such allowances for interruption shall be the sole remedy of the Customer and the sole liability of the Company. The Company will not be liable for any direct, indirect, incidental, special, consequential, exemplary or punitive damages to Customer as a result of any Company service, equipment or facilities, or the acts or omissions or negligence of the Company's employees or agents."

115. Defendant has attempted to shield itself from liability for its illegal actions through the use of the clause contained in the Defendant's tariff that "The Company will not be liable for any direct, indirect, incidental, special, consequential, exemplary or punitive damages to Customer as a result of any Company service, equipment or facilities, or the acts or omissions or negligence of the Company's employees or agents."

116. Defendant has attempted to shield itself from liability for its violations of the MTA through the use of the clause contained in the Defendant's tariff that "The Company will not be liable for any direct, indirect, incidental, special, consequential, exemplary or punitive damages to Customer as a result of any Company service, equipment or facilities, or the acts or omissions or negligence of the Company's employees or agents."

117. Defendant has attempted to shield itself from liability for negligent actions of the Defendant's employees through the use of the clause contained in the Defendant's tariff that "The Company will not be liable for any direct, indirect, incidental, special, consequential, exemplary or punitive damages to Customer as a result of any Company service, equipment or facilities, or the acts or omissions or negligence of the Company's employees or agents."

118. It is not in the public interest to allow a provider to shield itself from illegal actions through the use of a clause in its tariff denying liability for such actions.

119. It is not just and reasonable to allow a provider to shield itself from illegal actions through the use of a clause in its tariff denying liability for such actions.

120. It is not in the public interest to allow a provider to shield itself from violations of the MTA through the use of a clause in its tariff denying liability for such actions.

121. It is not just and reasonable to allow a provider to shield itself from violations of the MTA through the use of a clause in its tariff denying liability for such actions.

122. It is not in the public interest to allow a provider to shield itself from the negligent actions of its employees through the use of a clause in its tariff denying liability for such actions.

123. It is not just and reasonable to allow a provider to shield itself from the negligent actions of its employees through the use of a clause in its tariff denying liability for such actions.

124. CORVUS seeks an Order declaring that the clause contained in the Defendant's tariff that "The Company will not be liable for any direct, indirect, incidental, special, consequential, exemplary or punitive damages to Customer as a result of any Company service, equipment or facilities, or the acts or omissions or negligence of the Company's employees or agents" is unlawful and unenforceable and Ordering Defendant to remove said clause from its tariff.

RELIEF REQUESTED

CORVUS respectfully requests that this Commission, following a contested case hearing held under Section 203 of the MTA[20] and the Michigan Administrative Procedures Act:[21]

A. Find that Defendant violated Section 505 of the MTA through the use of unauthorized BTNs which directly caused seventeen (17) "end-user[s] of a telecommunications provider [to] be switched to another provider without the authorization of the end-user."

B. Find that Defendant violated Section 502(1)(a) of the MTA by making statements or representations, including the terms, or conditions of providing a telecommunication service that were false, misleading, or deceptive;

C. Find that Defendant violated Section 502(1)(i) by repeatedly representing or implying that the Defendant would correct certain deficiencies promptly, or at a specified time, or within a reasonable time, when the Defendant knew or had reason to know it [would] not be so corrected.

D. Find that Defendant breached its Contract with CORVUS.

E. Find that that Defendant's billing service was interrupted from May 2005 through December 16, 2005 and that CORVUS is entitled to a credit allowance or refund under the terms of the Defendant's Tariffs which are on file with this Commission.

[20] MCL 484.2203.

[21] MCL 24.201 *et seq.*

F. Find that the clause contained in the Defendant's tariff that "The Company will not be liable for any direct, indirect, incidental, special, consequential, exemplary or punitive damages to Customer as a result of any Company service, equipment or facilities, or the acts or omissions or negligence of the Company's employees or agents" is unlawful and unenforceable and Order Defendant to remove said clause from its tariff.

G. Order the Defendant to pay a fine for the first violation of Section 505 of the MTA of not less than $20,000.00 or more than $30,000.00, pursuant to Section 506(2)(a)[22] of the MTA.

H. Order the Defendant to pay a fine for the each of the second (2nd) through fifty-third (53rd) violations of Section 505 of the MTA of $70,000.00 per violation for knowingly switching an end-users' telecommunications provider without authorization.

I. Order 50% of two (2) of the $70,000.00 fines assessed for knowingly violating Section 505 of the MTA, and assessed under Section 506(2)(a) of the MTA, be paid directly to CORVUS, as the end-user pursuant to Section 506(2)(c)[23] of the MTA;

J. Order the Defendant to pay a fine of $20,000 per day for each day between May 23, 2004 and December 15, 2005 for each violation of the MTA as outlined in this Complaint, pursuant to Section 601(a)[24] of the MTA;

[22] MCL 484.2506(2)(a).

[23] MCL 484.2506(2)(c).

[24] MCL 484.2601(a).

K. Order the Defendant to make CORVUS whole though reimbursement of any amounts paid by CORVUS to the Defendant under the terms of the Contract, as excess revenue pursuant to Section 601(c)[25] of the MTA;

L. Order the Defendant to make CORVUS whole by payment by the Defendant to CORVUS of CORVUS' revenue lost as a result of the Defendant's violations of the MTA, pursuant to Section 601[26] of the MTA;

M. Order the Defendant to make CORVUS whole by payment by the Defendant to CORVUS of CORVUS' attorney fees and actual costs incurred in bringing this Complaint to the Commission, pursuant to Section 601(f)[27] of the MTA;

N. Pursuant to Section 506(e)[28] and 601(d) of the MTA, revoke any license Defendant may have to provide telecommunications services in Michigan;

O. Order the Defendant to cease and desist from future violations of the MTA; and,

[25] MCL 484.2601(c).

[26] MCL 484.2601.

[27] MCL 484.2601(f).

[28] MCL 484.2506(e).

P. Order Such other relief as may be just and reasonable.

Respectfully Submitted,

CLARK HILL PLC

Attorneys For CORVUS Incorporated

STATE OF MICHIGAN

BEFORE THE MICHIGAN PUBLIC SERVICE COMMISSION

* * * * *

In the matter of the Complaint of CORVUS Incorporated against TelCove Operations, Inc.	)))	Case No. U-14901 E-FILE/PAPERLESS

DIRECT TESTIMONY OF DAVID C. HOOVER

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is David C. Hoover. My business address is CORVUS Incorporated, 25200 Telegraph Road, Third Floor SW, Southfield, Michigan 48034.

Q. By whom are you employed?

A. I am employed by CORVUS Incorporated (hereinafter, "CORVUS").

Q. In what capacity are you employed by CORVUS?

A. I am CORVUS' President.

Q. Please give a brief description of your job responsibilities and your background and experience.

A. My job responsibilities are to offer strategic direction to the Directors of the company for implementation consideration. I am also responsible for applying tactical business

management relating to corporate banking, financial elements, sales, operations, engineering and support in running the corporation on a day-to-day basis. I have approximately 25 years of experience in the business. I have been involved all phases of corporations in the computer, networking, communications and telecommunications fields. I have served as corporate president of CORVUS and its predecessor since 1994. My background is quite extensive and includes most regulatory and accounting aspects involved with operating a business.

Q. Please describe CORVUS for me.

A. CORVUS is a managed access service provisioner. We are licensed by the Michigan Public Service Commission ("Commission") to provide basic local exchange service throughout the state of Michigan in the zone and exchange areas served by Verizon North Incorporated, Verizon North Systems, and Ameritech Michigan, which is now known as AT&T Michigan. That license was granted in MPSC Case No. U-12716 on March 7, 2001. Primarily, CORVUS designs and installs customized communication networks for clients and manages those networks for those particular clients from the point of business inception through to business termination. Many of our core clients have been with CORVUS for over ten years.

Q. Please describe how CORVUS provides service to its clients.

A. CORVUS does not own its own telecommunications network facilities. CORVUS leases the network facilities needed to provide service to CORVUS' clients from other

companies. Under CORVUS' business model we do not invest in the core switching equipment but rather CORVUS invests in the leading edge equipment needed to groom and manage customers' circuits. We provide our customers with network monitoring as well as the ability to provide extremely detailed call analysis, trouble ticketing, fault analysis, and rapid remediation without customer intervention. CORVUS relies heavily on the local exchange carrier it chooses to provide telecommunications network facilities to switch, direct, and route call traffic from our customer sites out to the various points out on the national and international Plain Old Telephone Service ("POTS") network.

Q. How long has CORVUS been in business?

A. CORVUS was incorporated in December 1994 as a spin-off from its predecessor corporation, which was formed in 1989.

Q. Are you familiar with the complaint filed by CORVUS in this proceeding?

A. Yes I am. The complaint was drafted under my direction and supervision.

Q. Have you previously testified before the Michigan Public Service Commission?

A. Yes, I testified in support of the application of CORVUS for a license to provide basic local exchange service throughout the state of Michigan in the zone and exchange areas served by Verizon North Incorporated, Verizon North Systems, and Ameritech Michigan, which is now known as AT&T Michigan. That testimony was offered in MPSC Case No. U-12716 and admitted into the record on December 5, 2003. I have also offered

prefiled testimony in MPSC Case No. U-14875, in support of a Complaint that CORVUS filed against AT&T.

Q. Are you sponsoring any exhibits?

A. Yes. I am sponsoring exhibits C-1 through C-23.

Q. What is the purpose of your testimony in this proceeding?

A. I am testifying in support of CORVUS' complaint against TelCove. It is my sworn testimony that:

- TelCove did not deliver on its contractual obligation to provide correct billing detail for CORVUS;
- TelCove intentionally misrepresented to CORVUS that it could provide correct billing detail;
- TelCove did not provide billing detail in a timely manner, as promised under our agreement with them;
- TelCove intentionally misrepresented to CORVUS that it could provide billing detail on a timely basis;
- TelCove assigned duplicative BTNs, causing third parties long distance traffic to be "slammed";
- TelCove switched, without authorization, CORVUS and CORVUS' clients' interLATA long distance service to TelCove, as the long distance provider, and not to our chosen long distance provider ("IXC"), Qwest;

Q. What was the business relation between CORVUS and TelCove?

A. On December 23, 2003, TelCove and CORVUS entered into an agreement to have TelCove provide a variety of services to CORVUS. We also entered into an Addendum to that Agreement in March 2004, which set forth additional requirements. These two documents are attached hereto as my Exhibit C-1 and I will collectively refer to them as "the Agreement"

Under the Agreement, TelCove was to switch the local and long-distance traffic of CORVUS' clients and bill CORVUS a flat rate charge in 6-second billing increments, without rounding up, for local calls placed by CORVUS' clients. CORVUS' clients' local and long-distanced calls were to be routed to TelCove, and TelCove was to provide the appropriate routing for these calls to LATA-340 (local and local toll). TelCove also was to route long-distance calls to Qwest Communications, CORVUS' long distance carrier. It was agreed that billing for traffic on CORVUS' account would be in monthly increments from the first of each month to the last day of each month, consistent with CORVUS' established billing cycles, which had been in place since CORVUS inception. And it was agreed that TelCove was to forward CORVUS' billing data to CORVUS' chosen billing processor in a form that the billing processor could then issue bills to our clients.

TelCove was failed to deliver on these, and other, requirements of the Agreement. Despite repeated requests to TelCove to correct the problems, and despite repeated promises and assurances that they were working on the problems, TelCove never met their contractual and promised obligations.

Q. Was TelCove familiar with CORVUS' business operation and model at the time they entered into the Agreement?

A. TelCove reviewed CORVUS' business model and obtained authorization to accept the business model in its entirety at the CEO level within the TelCove organization prior to signing the Agreement. In fact, the Agreement was executed by John Glicksman, TelCove's Vice President and General Consel.

Q. Have you had contact with TelCove's CEO?

A. Yes, many times. The CEO of TelCove is Bob Guth. I have tried to work with him on several occasions in our attempts to resolve the many problems CORVUS had with TelCove's service. Mr. Guth has been unwilling to reach an amicable and mutual resolution.

Q. Why did CORVUS contract with TelCove for service?

A. We were experiencing many problems with our previous provider, AT&T. These problems included charging us the wrong rates for trunk groups; and the repeated accidental switching of our entire long distance trunk route from Qwest to MCI. After months of trying to correct these and other problems we choose to move our systems to TelCove.

Q. Please describe what was is involved in moving CORVUS' systems to TelCove?

A. First and foremost each and every trunk group we have in place for our client base needed to be moved over from AT&T to TelCove. This involved a sizable cash investment to purchase equipment and operate dual networks while the transfer occured. Then all of our billing and systems had to be reconfigured to work with TelCove's systems and processes. It is a very time consuming process to switch underlying carriers and takes months of negotiation and planning to complete. Though we made the decision to move to TelCove in December of 2003, the transfer was not completed until after May 1, 2004.

Q. When did CORVUS start sending traffic over TelCove's network?

A. I believe we went live on their service on or about May 1, 2004.

Q. Did TelCove and CORVUS test the system before you went live?

A. Yes we did some system testing before we went live. In addition there was some testing that was done before we awarded the contract to TelCove. TelCove had to prove to us they could connect and facilitate our basic fundamentals of the service, which is to connect to a customer PBX by a T-1 and then route call traffic out their network as a test.

Both parties agreed that CORVUS' own network and billing data would be the test site for live data, prior to transferring CORVUS' client base to the TelCove network. Between April 1 and April 15, 2004, we tested transport and billing. On April 9, 2004 TelCove certified that all call traffic was functional on the local trunks and the dedicated

long-distance trunk group to Qwest. They further indicated that their testing procedure was in accordance with CORVUS' specifications thereby establishing a smooth transition from AT&T to TelCove.

A billing test of CORVUS' traffic between April 1 and April 8, 2004 was forwarded to our billing company, Profitec, on April 9, 2004 to test how the billing records would work with Profitec's system. Profitec could not read the call data as the disk was corrupted. TelCove decided to wait an entire billing cycle prior to tendering another disk to Profitec. Those records also were inaccessible on the TelCove "e-billing platform." Following discussions with TelCove, TelCove's Skip Standriff, informed us that the April bills were inaccessible on the TelCove e-billing platform. (See Exhibit C-2). Following a meeting with TelCove's Pat Markey, Skip Standriff, and Kevin Magloughlin on May 7, 2004, we were assured that the billing problems were resolved. However, we also heard, for the first time, that TelCove could not make any changes in the formatting of the data. Hand written minutes of that meeting, taken by my assistant, Denise Fisher, are attached hereto as Exhibit C-3) TelCove did forward some billing data after that meeting on Microsoft Excel Spreadsheets. This data was inaccurate, not complete, and combined TelCove's clients into one record. However, Billie Williams, TelCove's Installation Coordinator, committed to CORVUS that all of the data corruption problems would be corrected by the June 2004 billing cycle. I am including a series of e-mails received from Billie Williams promising these corrections as my Exhibit C-4, as well as a selection of e-mails from Giovanni Daniels at Profitec demonstrating that this problem continued on for months (Exhibit C-5).

Q. Was TelCove able to send current data to your billing company Profitec during the test period?

A. No, they were not. As a matter of fact, they were never able to correctly send any reasonable level of CORVUS' traffic to CORVUS' billing company, Profitec. Not only were they never able to send all of our traffic, it took TelCove over six months of processing CORVUS' live traffic to get the proper billing format to Profitec. In addition, despite the fact that the Agreement required TelCove to forward all bills in generally acceptable format, we had to eventually pay Profitec to adapt TelCove's format so that we could bill our clients.

Q. Why did you go live in May of 2004 when the billing system had not yet been completed to your satisfaction?

A. TelCove made misleading and incorrect statements to CORVUS by informing us that they had worked with Profitec to resolve the billing issues. In addition to the reassurances provided by TelCove, we had already asked AT&T to disconnect all of our circuits. And, at that point in time we were assured that all of the steps in our time-line checklist that we had developed with TelCove had been or would be completed and in accordance with the Agreement. A copy of the initial time-line checklist is attached hereto as Exhibit C-6. The time-line was constantly updated due to delays, but nevertheless there was a specific time-line of tasks that TelCove had to perform as they went through this process and they either confirmed or denied that they had concluded

these processes and they had confirmed all the processes subsequent to turning up the first test circuit which was CORVUS. Unfortunately, despite TelCove's false assurances, major tasks on the timeline were not completed as promised. TelCove also made incorrect and misleading statements as to their committed levels of testing with Profitec prior to going live on their system.

Q. Who in TelCove confirmed that the TelCove billing reports could be read by Profitec?

A. Completion of testing and other requirements in the Agreement were confirmed by three different TelCove individuals, all at different times. Initially it was Pat Markey and Kevin Magloughlin. Pat Markey was the General Manager of the Southfield branch and Kevin Magloughlin was the Operations Manager of the Southfield branch and subsequently they brought in an individual previously with MCI. His name was Skip Standriff and Skip Standriff was the instrumental party in getting this program launched at all.

Q. Do you know if any of them are still with the company?

A. Skip Standruff is the only one that is with the company at this point to my knowledge.

Q. Did TelCove ever admit that TelCove was unable to develop the right billing format for Profitec to use, as required by the contract?

A. TelCove never admitted that they were incapable of forwarding correct billing formats and correct billing data to Profitec. Instead, TeleCove's representatives regularly encouraged CORVUS by assuring us that each month would produce accurate and timely billing in the correct billing format on or before the tenth day of each new billing month. If TelCove would have admitted that they were not capable of performing under the Agreement they signed, and had notified CORVUS, we would have selected another provider and avoided all of the pain and anguish we were compelled to endure.

However, TelCove regularly assured us that they could perform under the terms of the Agreement. Along with other representatives from CORVUS, I met regularly with representatives from TelCove. In most of these meetings my assistant, Denise Fisher, took detailed minutes. In one such meeting, on TelCove's Pat Markey, actually suggested that we just bill a previous month's amount until TelCove could correct the problems. Minutes from that meeting, held on June 11, 2004, are attached hereto as Exhibit C-7.

Q. Who at TelCove assured CORVUS that TelCove would be able to develop and send the right billing format to your billing agent Profitec?

A. It was mostly Pat Markey who continuously told us that he had been informed by his corporate personnel that TelCove was capable of performing the call routing as they had accepted and producing timely and accurate billing information to Profitec so that

CORVUS could re-bill its clients. Most of the conversations that we had with TelCove were through Pat Markey, TelCove's General Manager. Mr. Markey was present at all meetings, was involved in all conversations, and was the one who basically spoke on TelCove's behalf.

Q. But Mr. Markey continued to tell you they were working on getting the correct records?

A. Yes, Pat Markey informed CORVUS that the TelCove billing personnel at their corporate office had reviewed the application, that they had the correct record format, and that they had done a test with Profitec. During a June 25, 2004 conference call, Mr. Markey admitted that the accuracy of the records was never tested, only the ability of Profitech to pull bills from TelCove's e-billing system. Minutes from that June 25, 2005 conference call are attached as Exhibit C-8.

Profitec had looked at their original records and had approved that record format as potentially billable for CORVUS. At the point in time where we actually started billing live traffic, the formats first two months could not be read at all because the discs were corrupt. Subsequent to, I believe it was June, the billing format changed several times from the original version that Profitec approved. Consequently, CORVUS was compelled to spend more money and we authorized Profitec to modify their program to accommodate TelCove's billing format so that we could bill traffic.

I, and other representatives from CORVUS, met with representatives from TelCove on May 7, 2004, at which time TelCove assured us that we were all set with

Profitec and CORVUS' billing to its clients. See, Exhibit C-3. In addition at that meeting, we expressed a concern that TelCove must meet our billing schedule, as per Section 16 of the Addendum to the Agreement.

However, on May 21, 2004, TelCove's Skip Standriff, informed us via e-mail, that no long-distance traffic from CORVUS' clients was being routed via CORVUS' dedicated trunk group to Qwest, our chosen interexchange carrier. See Exhibit C-9. Rather the traffic was switched to TelCove as the long distance provider, however still utilizing Qwest as the underlying carrier. Unfortunately, this meant that we were unable to be the "billing" long distance carrier for this traffic as we were not getting the re-billing reports from Qwest. We were later told by various TelCove personnel that our traffic had not been moved to our dedicated trunk group to Quest because there was a configuration miss-match between the TelCove Southfield switch and the CORVUS network. We thought that this configuration was corrected and we were subsequently passing long distance calls to the Qwest dedicated trunk group within a few days, however, we now know that TelCove was not passing any of CORVUS or CORVUS' clients' long distance calls to Qwest on this trunk group.

On July 12, 2004, TelCove's Pat Markey again claimed that TelCove was still working on the billing problem, and promised to get corrected billings from the close of the April 20th billing cycle to CORVUS by the end of July. Exhibit C-10 is Mr. Markey's July 12, 2004 E-Mail making such a promise, a promise he did not keep. He reiterated the fact that there was a discrepancy in the minutes billed via e-mail on July 21, 2004 (Exhibit C-11). These problems, and promises to correct them continued on month after

month. See Exhibit C-12 for an example of the same type of e-mail from Mr. Markey on August 13, 2004.

Q. Please explain the billing issues with TelCove and how they affected CORVUS' operations?

A. CORVUS' business plan is dependent on the re-billing of long distance and intraLATA toll traffic for our clients. While we make a small markup on the provision of call management software and trunk groups, the main revenue stream for our company is based on re-billing toll calls. The way our system is supposed to work, and by the way did work for the prior 10 years, is that a customer uses the CORVUS system and intraLATA and long distance calls are routed through CORVUS' designated IXC, Qwest. Local calls should go out through TelCove's interconnection with the incumbent local exchange carrier, which in this case is SBC.

On a monthly basis, within the first 10 days of the month, TelCove is supposed to deliver to CORVUS a billing statement showing all intraLATA toll and in-zone calls that TelCove delivered to the Detroit LATA (LATA 340) on our behalf. Our billing agent. Profitec is then supposed to receive the billing data from the carriers and format, print, and mail bills for our individual clients. The interLATA, interstate, and international calls were supposed to be routed to Qwest. These interLATA, interstate, and international calls would then be billed to CORVUS by Quest and to Corvus' clients by Profitec.

At first Profitec was unable to read the data TelCove was sending. We believe that this data was not in a generally accepted format that Profitec could read. Based on information and belief, this could have been caused by the fact that TelCove's internal billing system was a proprietary system called Aurora, which was very loosely interfaced to TelCove's Southfield Lucent 5ESS Switch. Once we got the issue of reading the bills clarified, we discovered that the amount of long distance traffic we could bill had dropped significantly.

We later found out that the reason the volume of long distance traffic had dropped was because TelCove was mis-rating, misrouting and dropping the calls. Instead of sending the calls to Qwest, as they were required to under the Agreement, TelCove was handling these calls and rating them as local calls or not rating them at all; causing them to be misrouted through their network. Without these calls to bill, our revenue dropped precipitously. TelCove was never able to completely correct this problem through December 2005.

Q. What do you mean when you say that TelCove was handling the calls and rating them as local?

A. As an example, let's take a call from Southfield to Lansing. This call goes from the Detroit LATA (LATA Code 340) to the Lansing LATA (LATA Code 346) and should be a long distance call. As a long distance call, when the CORVUS client places that call, it should be handed off to Qwest. Then at the end of the month, the billing report should show the length of the call, the time of day, and the fact that it was a long distance call

handed off to Qwest. The problem was that something in the TelCove system would recognize this call as a "local" call and deliver it over the TelCove network to Lansing. It would never be transferred to the Qwest network and would show up in our billing report as a local telephone call. Since all of our customers pay a flat rate for local calls, Profitec would not bill the call out for us and the billing to CORVUS' clients was completely lost.

Q. How did this happen?

A. Based on my 25 years of experience in the industry and based on what I heard from Mr. Pat Markey and Mr. Kevin Magloughlin at TelCove, TelCove had a brand new Lucent 5ESS Switch in its Melrose Avenue, Southfield, Michigan collocation center. Though this switch should have interfaced with TelCove's proprietary billing system, Aurora, that interface was not correctly programmed by TelCove. The coding of what was long distance, what was interLATA toll, and what was local was not done correctly either in the switch or in Aurora. When changes needed to be made to correct the problem, a change in the switch would not necessarily be made in Aurora and vise versa. In addition, because of the way the TelCove network was configured, changes made to the Southfield switch and to Aurora also should have been promulgated throughout TelCove's other switches.

Q. Did all of CORVUS' calls go through the Southfield switch?

A. All of CORVUS' dedicated clients had T-1 circuits from their facilities to the TelCove switch, so all of their calls should have gone through that switch. Upon reaching the

Southfield switch, TelCove should have routed CORVUS' local and intraLATA toll calls to the appropriate ILEC for delivery to the destination phone number and should have routed any long distance call over the dedicated trunk group we purchased to our chosen IXC, Qwest for delivery. As we now know, most of our long distance calls were instead switched elsewhere and delivered to the destination number by TelCove, all the while being rated as local calls so we had nothing to bill our clients.

Q. How do you know that TelCove rerouted CORVUS' calls from Qwest through its own switch?

A. Because we wanted to figure out why our long distance call volume was so much lower than it had been prior to the switch-over to TelCove, we worked with Kevin Magloughlin to examine the raw switch data from TelCove's Lucent 5ESS Switch in Southfield. Kevin Magloughlin secured for us the AMA Data, the raw data of what traffic went through the switch on a nanodisk. Examining this data, Kevin Magloughlin discovered that calls that were supposed to go to Qwest were actually being switched up through the TelCove network and out through other egress points on the TelCove network. Fortunately for our clients, at no point in time were the calls refused a connection. However, because they were not going through the proper routing, CORVUS was not able to bill the calls to our clients.

Q. Did these calls show up on your billing record?

A. At first, their billing was so atrocious that it took them months to decipher it. TelCove had to assign a person in their Columbus, Ohio office to re-create the TelCove billing in Excel spreadsheets to even make any sense out of anything that came from TelCove's corporate billing platform. So if the calls did show up somewhere, the credibility of the local calls was in serious question and were difficult if not impossible to rebill. Besides, all the initial disks were corrupt or in the incorrect format so we were unable to even read them for some time. Any long-distance that did make it to Qwest was not delivered via our dedicated circuit with Qwest, so we can only assume they made it to our Qwest account out of the back-end of their switch on Feature Group D. We have no idea what happened to the other 80% of the traffic that was there before we moved to TelCove.

Q. So CORVUS did not pay for these calls?

A. Not at first. However, we ended up paying TelCove for calls that we later discovered were unable to be billed or were unrated. These calls showed up on the TelCove billing statements as local calls, for which we paid a flat rate. However, since TelCove actually became the unauthorized long distance carrier for these calls, they had to route the calls at zero cost. So all those calls were actually recorded through the TelCove switch, they were routed and billed as zero dollar cost. Of course this eliminated all revenue we were expected to receive from those calls.

Q. Can TelCove actually keep track of any calls that are handled through their switch?

A. A built-in feature of a Lucent 5ESS Switch, such as the one that TelCove was using to route CORVUS' traffic, is the ability to track every call, on every trunk route, over which any individual call is processed. It is my understanding that TelCove is required to keep this data for seven years.

While I have been given copies of TelCove's AMA Data on nanodisk, I do not have the technical means to read them or to decode the data. However, TelCove does have that technical means and should be able to confirm my testimony. CORVUS also forwarded this disk to FireSteel Technologies, LLC in South Dakota. Their initial review indicated that indeed CORVUS' data from TelCove was not compliant with industry standards and some records were doubled up and others did not have record locators at the proper locations in the file. A copy of FireSteel's report is attached hereto as my Exhibit C-13. We also asked TelCove to participate in an analysis from FireSteel, as an unbiased third-party billing company, to validate TelCove's trunk group routing. TelCove declined to participate in this audit.

Q. Why didn't CORVUS have FireStone re-create the billing and trunk routes for the initial periods from the AMA Data?

A. Corvus did not have the available funds to finance a reconstruction of these billing records due to our inability to bill traffic to our clients. A copy of FireSteel's proposal to reconstruct these records is attached hereto as my Exhibit C-14.

Q. If the calls were mis-rated and the bills were not properly formatted for Profitec to read, how was CORVUS billing its clients?

A. Unfortunately, we were unable to bill our clients for many of the calls they made. Let me first emphasize that for our clients' behalf, CORVUS tried not to air its dirty laundry in public. At all times providing seamless telephone service to our clients was CORVUS' top priority. So with the exception of a lack of billing or much smaller long distance bills, our clients were unaware of what was happening. Prior to moving our service to TelCove, CORVUS billed 956,393.4 minutes over our dedicated circuit to the Qwest Dedicated LD network the four months between December 2003 and March 2004. These months are traditionally slower due to the end of the year and the holidays. The four months after moving to TelCove, May 2004 through August 2004, CORVUS was only able to bill 337,289.4 minutes, and these calls were routed through to Qwest via another method – not over CORVUS' dedicated circuit to the Qwest Dedicated LD network. This represents a 65% drop in traffic with the exact same number of clients used in each model. Our customer trends show that traffic over the latter parts of the year are traditionally slower and the summer months usually much higher. So in essence, this is a greater impact as evidenced by our prior year numbers during the same period, one year earlier, May 2003 through August 2003. During the summer months in 2003, CORVUS reported 1,455,549.5 minutes over our dedicated circuit to the Qwest Dedicated LD network. A comparison from traffic delivered in 2003, before we were served by TelCove, to 2004 when we were served by TelCove, shows a 76% drop in billing minutes. Also keep in mind, that none of CORVUS intrastate traffic actually was

transported over the Qwest trunk group that we had built for that purpose. We believed that it was delivered over other TelCove circuits and was somehow billed to CORVUS while the remainder was not even billed to us..

Q. Did the clients complain about not receiving their long distance usage bills?

A. No they did not. We were very fortunate that we had built up such a good relation with our clients. In fact, our clients were delighted that CORVUS was saving them so much money.

Q. Was CORVUS eventually able to bill something to their clients?

A. After some time of not getting the proper billing data from TelCove, we began to work with Profitec and asked them to start filtering clients' call records that were not consistent with call records that they had previously produced. Any calls that were not consistent were discarded as not valid for the particular customer, and CORVUS ate the cost of that call. The calls we discarded may have belonged to another client or in some cases we saw traffic come in from all 25 of these T-1 circuits all billed to one client. In the beginning they were all billed to CORVUS. As we went on, they were all billed to one of CORVUS' clients and what we would notice was that these anomalies of being heavily billed by TelCove, not only at the wrong price pursuant to our contract, and the wrong pricing for the facility's T-1s and so forth, but also charges that were not part of the program. As an example of how inaccurate TelCove's billing was, our billing transactions for the period from October 20, 2005 through November 19, 2005. During

that period TelCove informed us that they handled 45,625 call records for 115,946.46 minutes of use, but only 4,169 call records, accounting for 15,332 minutes of use were sent to Profitec to be billed – all under one client. This is a failure rate of over 80% and even of the calls that were sent Profitec, most of those calls were toll calls which were supposed to be forwarded to Qwest over our dedicated circuit. I have attached as my Exhibit C-15 an invoice from TelCove showing the number of calls they claim to have handled and have attached as Exhibit C-16 the billing proof from Profitec for the same period. Exhibit C-10 is a July 12, 2004 e-mail from Pat Markey acknowledging similar irregularities in our billing from TelCove earlier in our relationship with TelCove.

In addition, during the four months prior to moving over to TelCove, CORVUS was able to bill 729,957 in local intra-LATA toll over our prior provider's system. This is in contrast to 172,000 records during the four months after moving to TelCove. Most of the TelCove records were unable to be billed and almost all of the traffic TelCove handled for CORVUS was flagged as local-in zone calling and rated at a flat rate call instead of a per minute toll call.

Q. Let me return to the subject of the interLATA long distance calls made by CORVUS' clients. Who actually ended up delivering these calls?

A. We believe that TelCove ended up delivering a majority of these calls, without our authorization. Since all of the traffic emanated on dedicated T-1 circuits and TelCove routed the data through their switch. Based on the reduction in billing from Qwest for traffic routed through our dedicated circuit with Qwest, we do not know who else could

have delivered these calls, as we had no complaints of our clients being unable to make long distance calls. We believe that TelCove must have switched the long distance provider without authorization. Our original agreement was that TelCove was suppose to deliver local and local toll calls through its network and bill CORVUS for those calls. Any long distance call, and by long distance I mean interLATA calls that terminated outside of the Detroit LATA 340, were to be routed directly to Qwest. Qwest was to bill us for these calls. However, based on billing records provided from TelCove and Qwest to Profitec, Profitec could not find any billing link from Qwest to TelCove or vice versa. See my Exhibit C-17, which is an e-mail from Giovanni Daniels at Profitec confirming the fact that traffic was not going over our dedicated circuit to Qwest.

Because TelCove could not properly route or rate these calls, TelCove ended up transporting them over its own, or someone else's, long distance network. TelCove could not bill us for many of these toll calls and as we understand it, TelCove converted many of them to zero minute calls with zero costs. Consequentially we could not bill our clients and our Qwest dedicated circuit was showing no usage at all. We first raised this with TelCove in a meeting held on July 13, 2004, the minutes of which are attached as Exhibit C-18. On August 2, 2004, we again met with TelCove to discuss the billing problems. At that point, Suzanne Rivchin, TelCove's Business Financial Manager, based out of Columbus, Ohio, provided us with a spreadsheet acknowledging the many billing problems we were having. A copy of that spreadsheet, with notes, is attached to Exhibit C-19, which also include the minutes from that meeting.

After August of 2004, we instructed TelCove to put everything over a Feature Group D. See Exhibit C-20, which is the e-mail I sent to Pat Markey requesting this change and Exhibit C-21 which is his e-mail acknowledging receipt of the request. This meant that they were to route all toll calls, inter and intraLATA through Qwest and only bill us for any local calls that they were able to bill.

In the process of doing this, the quality and reliability of CORVUS' billing process and our bill tracking and monitoring systems — something we prided ourselves on over ten years of business before coming on board with TelCove — had been pretty much breached.

Q. Am I correct that TelCove was not authorized to provide long distance service to any of CORVUS' clients?

A. That is correct: TelCove was not authorized to provide long distance service to any of CORVUS' clients.

Q. For how many of CORVUS' clients did TelCove switch long distance service without authorization, so TelCove was carrying the traffic?

A. Including Corvus' own long distance traffic, TelCove switched 18 end-users without authorization. These end users were Corvus, Lee Steel, Noble International, Bob Sellers, K&S Industrial, Apac Paper, Motor City Electric, HB Stubbs, Crest LM, Superior Ford, Ray's Electric, Philips, TTI, South Oakland, Utica Enterprises, Crest Volvo, Quantium Industries Bloomfield Hills, and, Quantum Warren. CORVUS also has many long

distance customers who were not part of the transfer to TelCove and were not affected by TelCove's change of service.

Q. What about CORVUS' own service, did TelCove also switch your long distance service?

A. CORVUS, as an end user of services out of its own office, also would have had its long distance service switched without authorization.

Q. After August 2004 was the problem of TelCove delivering long distance calls without authorization corrected?

A. We believe that TelCove switched our long distance provider without authorization and continued to deliver intrastate/interstate calls throughout the term of our relationship. The reason we believe this is due to the substantial loss of billing through the dedicated circuit to Qwest. For instance, the year prior to moving to TelCove and after the Feature Group D change over as the comparison, (September 2002 to Sept 2003) CORVUS billed 3,170,375 in local and toll minutes and 4,682,408 in long distance and international minutes. During the same period in the following year, while receiving service from TelCove, September 2004 to September 2005, CORVUS delivered and was able to bill less than 20% of the previous totals using the same clients in the model. The example that is fresh in my memory is the period from October 20, 2005 through November 19, 2005. During that period TelCove informed us that they handled 45,625 call records for 115,946.46 minutes of use, but only 4,169 call records, accounting for 15,332 minutes of

use were sent to Profitec. Of the calls actually sent to Profitec, which were all rated as local calls, about half of which were long distance calls that should have been routed to Qwest using the Feature Group D. This data was what TelCove reported to CORVUS and to Profitec and represented approximately 15% of the figures that were billed to CORVUS by TelCove.

Q. And this drop in the volume of long distance calls continued for how long?

A. This drop in long distance calls from our historical volumes went on throughout the entire time we were with TelCove, from May of 2004 through December 16, 2005.

Q. I assume you raised this concern with TelCove, what was their reaction?

A. I raised it numerous times. There are several emails and correspondence attached herteo highlighting their "concern" about what was causing this. They kept saying that they had to get to the "root cause." I don't believe they ever discovered what was the "root cause."

Q. Can you give me an example of the people at the company that promised that they would correct this problem?

A. Pat Markey primarily, and as this went on in time I did involve the president – chairman and CEO of the company Robert Guth. He was notified of our problems, apologized for our problems and said that he had his entire senior management team working on correcting this problem.

Q. Did they give you any time frame for when they would correct this problem?

A. TelCove promised that the problem was fixed each and every month. It never did get corrected though. It seems like whenever they tried to fix one problem they caused others.

Q. Did TelCove ever correct these billing problems?

A. No! We do not believe that TelCove ever corrected their billing and routing problems as evidenced by the substantial drop in traffic throughout our time with TelCove. Every week, every month, we were assured that things were going to be corrected and obviously they never were. Even after we confirmed the misrouting and incorrect rating issue, TelCove's response was that they were still working on it. After Pat Markey left TelCove in April 2004, nothing, from that point forward, was done to correct our problems and we were virtually ignored by the company. It was about that time that we made the decision to search for another provider and leave TelCove.

Q. Was there also a problem with how TelCove billed individual calls, for those calls they actually billed?

A. Under paragraph 19 of the addendum to the Agreement, "TelCove agrees to bill calls in six (6) second increments of use without rounding up to the next highest minute." TelCove was unable to do this. In addition, billing for traffic on CORVUS' account from TelCove was originally agreed to be in monthly increments from the first of each month

to the last day of each month; consistent with CORVUS' established billing cycle since its inception. However, TelCove was only able to provide billing from the 20th of one month to the 19th of the next. This billing cycle was unacceptable to CORVUS, as the company has billed its clients from the first to the last day of each month for all preceding billing since the company began operations in 1994. TelCove effectively subtracted 10 days from the billing interval causing additional lag time in the billing cycle which results in additional costs to CORVUS to provide services to its clients on an ongoing monthly basis. Most aggravating was that this was mentioned to CORVUS in a casual matter over a year from the start of handling CORVUS' traffic. Pat Markey stated to me, "oh by the way, TelCove cannot bill in six second increments or meet your requirement for the billing cycle we agreed to." Furthermore, any data that could be billed was late and we had to wait for the following month to generate a billing for it.

Q. Did you ever point out these problems to TelCove and inform them that the Agreement provided for different billing cycles?

A. Yes, we did.

Q. And what was their reaction to that?

A. Their official corporate response was to state that they could not conform to the contract.

Q. When you went live in May of 2004, were there any problems with number assignments?

A. Yes there were.

Q. Would you please explain those problems?

A. In June of 2004 we discovered several incorrect caller IDs for our clients. When they would call third-parties, the caller ID would display the wrong name. For example, a call made by CORVUS' client APAC Paper & Packaging Corp, whose phone number is (313) 982-6400 would show up on caller ID as Neuman Funeral Home, whose phone number is (313) 982-1000. In fact this problem occurred for seventeen (17) of our clients.

CORVUS Client	CallerID Name Displayed	CallerID Number
APAC	Neuman Funeral Home	(313) 982-6400
Bob Sellers	Alliance Material Handling	(248) 478-1000
Crest Lincoln Mercury	Photography by Lacada	(586) 939-1000
Crest Vovlo	Certified Metals	(586) 598-1000
H.B. Stubbs	Michigan Mortgage	(586) 575-1000
K&S Industrial	Cingular Wireless	(734) 374-1000
Lee Steel	Master Petroleum Iv Inc	(313) 925-1000
Motor City Electric	An unlisted private residence	(313) 923-1000
Noble International	Rocco Tool	(586) 751-1000
Philips	Jervis B. Webb	(248) 553-1000
Quantum (Bloomfield)	Heritage Construction and Devl.	(248) 593-1000
Quantum (Warren)	Ralph Roberts Realty	(586) 751-1002
Ray's Electric	Nu Tech Auto Service	(586) 739-1000
South Oakland	St. John's Macomb	(586) 573-1000
Superior Ford	Dr. Joseph Salerno	(734) 782-1000
TTI	Coldwell Banker Schweitzer	(586) 268-1000
Utica Enterprises	First Choice Insurance Group	(586) 566-1000

Not one of the Caller ID names displayed represented CORVUS' clients. When CORVUS notified TelCove of this problem initially, TelCove misinformed CORVUS by explaining that these were merely old TelCove clients that had not been removed from their switch. CORVUS spent over thirty (30) man hours investigating this problem and found out that TelCove had used these third-party's telephone numbers to represent our client's Billing Telephone Number ("BTN") within the TelCove switch. At first we assumed that the North American Numbering Plan Administrator ("NANPA") had assigned these duplicate numbers and several of TelCove's technical support personnel agreed with this assumption. However, on June 4, 2004 TelCove admitted that they had intentionally "made up" BTN numbers to use in their switch rather than purchase valid numbers from the North American Numbering Plan Administrator ("NANPA") as they were required to do. Unfortunately for us and for TelCove the numbers they "made-up" were actual numbers in use in the rate centers in which our clients were located. While TelCove never should have been making up numbers to begin with, I find it equally irresponsible that no one at TelCove checked to see if these "made-up" numbers were actually in use.

Q. Did the same thing happen for CORVUS' own telephone lines?

A. Because we used CORVUS' own traffic as the test site, CORVUS, was not assigned a duplicative BTN. However, CORVUS' BTN was re-assigned subsequent to TelCove's receipt of new numbers from the NANPA. In essence, we also received a bad BTN and we were the "test-site."

Q. Do you know why TelCove did not just purchase new numbers from the NANPA?

A. Approximately a month prior to the first series of customer cut-overs we were notified that TelCove had not yet purchased any numbers for the Detroit switch from the NANPA for direct inward dial and various numbers that are used for identification purposes and calling purposes. We offered them the use of the original AT&T numbers that we were bringing with us from TCG/AT&T. They refused to accept those because they did not believe that some of them were assigned to the correct rate center. TelCove informed us that they were just going to have to bite the bullet and purchase additional numbers. Pat Markey informed CORVUS that TelCove had purchased the numbers, and on April 2, 2004, Skip Standriff of TelCove gave us written confirmation of those BTNs (attached hereto as Exhibit C-22). Subsequently we found out TelCove had not purchased any numbers at all. Rather, TelCove used numbers that were duplicative of numbers that were already out there, assigned to other parties, and in use. The numbers that TelCove assigned to our clients were supposed to be "place holders" in TelCove's own switch, as Pat Markey informed us.

Q. Were there any other consequences of TelCove's use of "made-up" BTNs?

A. Yes, after CORVUS was supplied the new, supposedly pure NANP BTNs assigned to its leased DS-1 services, CORVUS authorized the PICC of these BTNs to our account with Qwest so we could bill the long-distance traffic that TelCove was supposed to send to Qwest. As soon as these "made-up" numbers hit the Qwest network they ended up as

duplicate BTNs and the unwitting owners of those duplicate numbers had their long distance service slammed. CORVUS PICCed these numbers with Qwest, thinking that these numbers now belonged to our end use clients. While we had authorization to PICC the long distance carrier for our clients, we obviously did not have any authorization for end-users whose numbers were the victim of TelCove's made up numbers. Since TelCove was not switching long-distance service over CORVUS' direct trunk group to Qwest, as they were contractually obligated to do, the long distance traffic for these third parties that was billed to CORVUS was minimal. However, the third-parties whose' BTNs had been duplicated received notices from SBC that their long-distance carrier had been changed to Qwest. All of the issues surrounding the slamming problem are directly related to TelCove declining to purchase numbers from NANPA as they had promised to CORVUS many months prior, and instead TelCove's making up of numbers. CORVUS never billed any of the slammed third-parties for any traffic. However, CORVUS was billed by Qwest for all of the long-distance calls made by these third-parties from their locations that were slammed.

Q. How did you find this out?

A. Qwest called CORVUS as soon as they received notification from the Michigan Public Service Commission that Qwest had allegedly slammed these third parties. At first, we called TelCove and TelCove blamed it on their numbering department. Only after CORVUS matched the caller ID to the duplicative BTNs did we finally put it together of what actually happened. TelCove finally admitted that they had issued duplicative BTNs

because their corporate office would not approve the expense of purchasing new numbers for the Michigan region.

Q. Are you saying that when your clients would make a long distance call, the third-parties would get billed by Qwest?

A. Actually no. CORVUS was billed by Qwest for calls made by the true owner of the BTNs.

Q. So for example, when Neuman Funeral Home made a call to California, CORVUS' client APAC Paper & Packaging Corp, would be billed for it?

A. Actually CORVUS would be billed for Neuman's long distance calls.

Q. Did TelCove eventually correct this problem?

A. Yes they did. TelCove eventually bought pure numbers from the NANPA and assigned those as the BTNs. Some of those numbers took up to six weeks to assign. We were stuck and not able to re-route calls from these third-parties so they continued to make free calls on the Qwest network under CORVUS' account during that time.

Q. Do you know if Neuman Funeral Home or any of the other third-parties received their long distance billing during this time?

A. During that period of time, as we understand it , Newman Funeral Home or any of the other third-parties that were on that list would not have received any bills for long

distance calling at all. Their entire long-distance calling was charged to CORVUS. Since CORVUS did not have those third parties set up in its computer system, and did not have authorization to carry their long distance traffic, we were unable to re-bill them for that service. For the time frame in question, these third-parties received free long distance, at CORVUS' expense.

Q. Who paid for these third-parties long distance traffic?

A. CORVUS paid Qwest.

Q. Do you know how it was brought to the attention of the Michigan Public Service Commission?

A. It is my understanding that the owner of Rocco Tool raised an informal complaint with the Michigan Public Service Commission. Attached as my Exhibit C-23 is a copy of a letter Qwest sent on May 25, 2004 to the Commission in response to Rocco Tool's informal complaint.

Q. How did Rocco Tool know that they had been slammed?

A. Since they never received a long distance bill from Qwest or CORVUS, the only way they would have known was that the change of carrier should have shown up as a notation on their local telephone bill.

Q. Did Rocco Tool file a formal slamming complaint?

A. I do not believe he filed a formal complaint. I believe we resolved the problem while it was still at the informal stage.

Q. How did you resolve the informal complaint?

A. CORVUS settled the matter with the Rocco Tool in a confidential settlement. We also agreed to pay Qwest for the traffic that was not authorized on their system. In addition, CORVUS sent a letter to the Michigan Public Service Commission, explaining our position. I also had a conversation with a member of the Michigan Public Service Commission Staff, I believe his name was Don Casterline. I further explained this verbally to him and he explained that it probably would not go any further within the Commission.

Q. This happened less than a month after you had switched to TelCove. Did you consider leaving them at that point?

A. We were still new to TelCove and the process of changing local exchange carriers for our business model is quite intensive. If we had chosen to leave TelCove, we would have had to move collocation equipment, reconfigure and move all of our clients' trunk groups, and run dual networks again for a period of time at a new carrier's collocation site. These steps are very, very labor intensive, and very costly. This is not a situation where just after a few months of doing business with TelCove and going through all of

the headaches of the transition process that CORVUS was able to go back to AT&T or find another secondary local exchange carrier in any reasonable amount of time.

It had taken us over a year to move from AT&T to TelCove and when we made the decision to move off of TelCove in the fall of 2005, it took us several months to move to McLeodUSA. Besides we did not want to inconvenience our clients further by changing out their T-1s again so soon after placing TelCove circuits in.

Q. To your knowledge is TelCove disparaging your business now that you are no longer using their service?

A. I have heard from various people both in and out of TelCove that some of their collocation clients had asked why CORVUS had left the collocation site. After all we had a great deal of equipment in that site, we were informed by TelCove that CORVUS was one of their largest client in Michigan. We were also used as a non-participating reference for TelCove's sales efforts. As we were informed, TelCove has told its other clients and prospective clients that CORVUS hadn't paid their bills. There was also an operations manager in Columbus who indicated that during one of our meetings that he was told that CORVUS was not receiving the level of service that TelCove had promised to provide because CORVUS wasn't paying its bills.

Q. Had CORVUS paid all its bills?

A. We have filed several billing disputes with TelCove. However, CORVUS has paid its bills over $123,000 for approximately $156,000 worth of alleged services during the

period we were with TelCove. We believe we are entitled to at least $33,000 in credits for which we have applied to TelCove and are pending. In fact the reason we paid our bills was that TelCove threatened us with cut off if we did not pay. Cut off would have meant that our clients would have lost their service, so that was never an option. So we paid TelCove for an inadequate level of service contrary to almost every element in our Agreement with them to avoid disconnection of services and a loss of services to our clients, including Internet services carried on the same T-1 and forwarded to our Internet carrier, Level3.

Q. For what type of service did you file bill disputes with TelCove?

A. We disputed any charges for usage. Clearly if TelCove cannot distinguish between local, local toll, and long distance, all usage billed by TelCove is suspect—if it was indeed valid usage from CORVUS clients, after all it didn't correspond to each client individually and we had no way of verifying it. Since we could not re-bill that traffic, we could not in good conscience pay for the traffic on behalf of our clients. After August 2004, our billing was better, but the amount of traffic TelCove delivered to Qwest over that dedicated circuit never reached the traffic levels we had re-billed prior to moving our service to TelCove.

Q. When did CORVUS make the decision to leave TelCove?

A. In April of 2005, when Pat Markey left TelCove, we made the decision to look for another company that could better, and more accurately, meet our needs. We actually left TelCove when our final circuit was cut over on December 16, 2005.

Q. Who is CORVUS' local exchange carrier now?

A. We are with McLeodUSA.

Q. Are your call records returning to the level they were before you switched to TelCove?

A. Our reported traffic immediately increased. For the first four months of service with McLeod we have billed a total of 953,270 minutes. Our Traffic may not have increased to the levels prior to moving to TelCove, due to lost clients associated with CORVUS perceived billing irregularities caused by TelCove during the time we received service from them, but the traffic has increased.

Q. What has been the impact on your customer based as a result of the poor service from TelCove?

A. Our customers were elated while we were with TelCove, because we could not bill them for most of their long distance traffic. We had clients spending $15,000 a month with CORVUS that went down to $6,000 a month because CORVUS was unable to bill a large percentage of their local toll and long distance usage. The majority of CORVUS' income

comes from re-billing local toll and long distance traffic. Without this income stream, CORVUS lost over $130,000 worth of equity on its financial statements during the period we were with TelCove.

Q. Why do you think TelCove was unable to comply with the contract and provide the proper billing data to CORVUS?

A. I was told by the President of TelCove, Robert Guth, that the model CORVUS uses was not compatible with TelCove's business model. According to Mr. Guth, TelCove is not in the business of supplying switched telecommunications services, but usually operates as more of a conventional competitive local exchange carrier. Not knowing what the difference was, I did not explore this statement.

Q. Do you feel that TelCove was negligent in the way they conducted themselves toward CORVUS?

A. Yes I believe that TelCove was negligent because I believe that they entered into an agreement that they knew that they were not capable of fulfilling. Nonetheless, TelCove has claimed that their Tariff gives them complete exoneration for any negligent actions they commit toward their clients. In fact they have a clause in their tariff that provides:

> "The Company will not be liable for any direct, indirect, incidental, special, consequential, exemplary or punitive damages to Customer as a result of any Company service, equipment or facilities, or the acts or omissions or negligence of the Company's employees or agents."

If the company, or its employees, were negligent, they should not be able to hide behind their tariff. TelCove's tariff also states that if they cannot provide the service that they had agreed to, TelCove's liability would be to refund all the monies paid by CORVUS for the services TelCove was unable to render.

Q. Were you aware of those clauses in TelCove's tariff when you first entered into the contract?

A. No I was not.

Q. Would you have entered into the contract if you were aware of the provision in TelCove's tariff that limits TelCove's liability in the event of negligence?

A. No! I would not have, most especially if regulatory authorities condone protection from overt acts such as negligence.

Q. What would you like this Commission to do as a result of your complaint?

A. I feel that this Commission should find that:

- TelCove intentionally and without authorization switched the long distance service of CORVUS and each of CORVUS' dedicated service clients to TelCove;
- TelCove's negligent act of making up BTNs caused CORVUS to inadvertently and unknowingly switch other end-users to Qwest without authorization;

- TelCove repeatedly misrepresented that they could and would correct their routing and billing problems. Because of their negligence CORVUS was unable to correctly bill usage for the entire duration of the relationship. This inability for CORVUS to properly bill its clients for 100% of the traffic that was presented to TelCove for routing and billing caused CORVUS to loose a substantial amount of income during the period;
- TelCove's Limitation of Liability provision in their Tariff is not in the public interest and should be invalidated;
- TelCove should refund to CORVUS all amounts paid to TelCove for TelCove's failure to perform according to TelCove's Agreement with CORVUS and pursuant to TelCove's tariff.
- TelCove should make Corvus whole for the amount of lost revenue we incurred as a result of TelCove's inability to perform pursuant to our Agreement.

In addition the Commission should fine TelCove for its violation of the Michigan Telecommunications Act, award a portion of that fine to CORVUS, and order TelCove to pay CORVUS' attorney fees and actual costs of having to bring this proceeding to the Commission.

Q. How much has Corvus lost in revenue as a result of TelCove's inability to perform pursuant to your Agreement?

A. I have made the following calculations for the 20-month period we were utilizing TelCove as our underlying carrier. My basis for the numbers are taken from the 12

month average prior to engaging with TelCove. The other expenses are based on our hourly wages multiplied by the hours to correct the issues. The Qwest loss is based on the actual out-of-pocket costs. Below is CORVUS' calculated lost revenue:

Description of Claim	Amount
Additional Profitec charge to modify previously approved billing program	$ 600.00
Complaints and productivity losses due to duplicative BTNs	3,750.00
Excessive technical resources to correct T-1 failures	6,250.00
Qwest Trunk Group mis-match lost profits	1,000.00
Lost Traffic profit loss (Apr. 1, 2004 to Dec. 16, 2005)	133,000.00
Qwest trunk group profit loss	11,880.00
Compelled to incur un-necessary out-of-pocket costs to change vendors	30,000.00
Lost productivity, lost opportunity and excessive resource utilization to correct problems caused by TelCove	416,660.00
Total Lost Revenue	**$ 603,140.00**

Q. Do you think TelCove is qualified to be licensed as a local exchange carrier?

A. No I don't. I do not believe that TelCove is qualified to perform the basic fundamentals that a competitive local exchange carrier is supposed to be able to provide. The activity CORVUS hired TelCove to perform falls into the basic fundamentals of what a provider of basic local exchange service is supposed to perform. There was no magic in our business model, it was a basic fundamental of routing and billing. In addition to all of the issues I have testified to, TelCove also had basic problems with incorrect VNH coordinates, provisioning lines and interfacing and interconnecting with other carriers such as SBC, Verizon Wireless, and Cingular and in fact at one time was unable to deliver our calls to some of those carriers too. Further, as we later discovered TelCove had no direct interconnection not only to Qwest but also to any long-distance carriers at

their switch in Southfield, Michigan. This caused CORVUS to spend over $11,800 in costs to Qwest for a useless trunk group that TelCove was incapable of routing traffic over. It is my opinion, based on two years of working with TelCove and over 25 years of direct industry experience, that TelCove does not have the manpower nor the corporate talent required to correctly program their Michigan based Lucent 5ESS Switch so they can correctly route traffic. I also believe TelCove's billing system, only known as Aurora, is archaic and loosely interfaced to their switches causing significant billing errors to compound the routing errors they create. All this as evidenced by all the problems that CORVUS had with them. As stated earlier in this testimony, their president, CEO and chairman, admitted to me via a telephone conversation that took place on April 7, 2006 that TelCove had no business entering into this agreement with CORVUS and that TelCove was unable to deliver the services they had committed to CORVUS even though, as we have been informed, he personally approved the business transaction to obtain a large sale for their Michigan office. During that same phone conversation, he then subsequently laid blame to members no longer employed with TelCove for all TelCove's shortcomings with CORVUS. I believe that the Commission should revoke TelCove's license to provide basic local exchange service to avoid any damages they may once again, inflict on end-users and/or re-biller clients in the future.

Q. Do you have any further comments?

A. Not at this time. This concludes my prefiled direct testimony.

STATE OF MICHIGAN

DIRECT TESTIMONY OF DAVID C. HOOVER

EXHIBIT C-1

Service Agreement dated December 23, 2003 and Addendum to the Agreement dated February 6, 2004 between Corvus and TelCove (the "Agreement").

TelCove

Service Agreement

This agreement ("Service Agreement") between you Corvus, INC., ("Customer") and Adelphia Business Solutions Investor LLC, Debtor-in-Possession, d/b/a TelCove ("TelCove") is for the provision of telecommunications service ("Service").

In consideration of the mutual promises and covenants contained herein, the parties agree to the purchase of Service(s) at the cost(s) and term(s) as set forth in the following:

Quantity	Service	Term	Installation Cost	Total Installation Cost	Monthly Recurring Cost	Total Monthly Recurring Cost
1	Co-Location	1 yr	$1,000	$1,000	$500.00	$500.00
2	DS-3 Internal CO	1 yr	$100.00	Waived	$100.00	$200.00
25	DS-1 Private Line	Spec	$689.00	Spec.	$325.00	$8,125.00
	Blocks/20/DID	N/A	$20.00	Waived	$5.00	$300.00
53,338	Avg. Local Calls/by Call				$.06 per call	$3,200.28
153,232	IntraLata Calls/per Min				$.0259 per Minute	$3,968.71
		Total*		$1,000		$16,293.99

Local, State, and/or Federal taxes and/or surcharges not included

Additional Terms and Conditions

1. **Payment.** Payment for Service(s), including applicable federal, state, and local taxes, is due upon receipt of invoice. Beginning thirty (30) days after the date of invoice, interest on late payments will accrue at the rate of 1.5% per month, or the highest rate allowed by law on the unpaid balance, whichever is lower.

2. **Additional Charges.** Customer is subject to the applicable charges for moves, adds, changes, and upgrades for those items covered by this Service Agreement. All Service(s) other than those stated herein will be provided at the prevailing charges.

3. **Tariffs.** Additional terms and conditions of this Service Agreement are set forth in TelCove's tariffs which are subject to change and are on file with the applicable state and/or federal regulatory authorities. Except for the cost(s) of Service(s) on a term of more than month to month, these tariffs fully determine the rights and obligations of Customer and, in the event of any conflicts between this Service Agreement and these tariffs, the tariffs shall control.

4. **Total Service Resale.** In the event that Service(s) are sold to Customer via Total Service Resale, TelCove reserves the right to transfer Customer, at no additional charge, to TelCove's partial or total on-net Service(s).

5. **Assumption/Purchase of Contract.** In the event that TelCove assumes or purchases an existing contract between Customer and another telecommunications carrier, Customer shall be indemnified and held harmless against any and all termination liability associated with said contract so long as Customer enters into a Service Agreement with TelCove for a term equal to or greater than the remaining term of Customer's existing contract.

6. **Notice of Termination.** In the event Customer intends to terminate this Service Agreement prior to expiration of the term set forth herein, if more than a month to month term, Customer shall provide TelCove three (3) months written notice. In the event that Customer does not so notify TelCove, Customer shall owe TelCove an additional three (3) months of charges in addition to the termination liability outlined below.

7. **Termination Liability.** If Customer terminates Service(s) prior to the fulfillment of the term, then a termination liability will be due to TelCove from Customer. The termination liability shall include any previously waived charges for the cancelled Services(s) plus the greater of the following:

   a.) The difference between the term period and the actual number of months the Service(s) has been in effect at the time of termination multiplied by the monthly rate for such Service(s); or

   b.) The termination liability charges associated with such assumed or purchased contract.

Addendum to the Agreement between TelCove and CORVUS, Incorporated
Dated December 23, 2003; as amended.

1. TelCove will switch CORVUS' Intra-State and Inter-State traffic through its Southfield, Michigan switching facility to Qwest Communications over a separate trunk group provided by Qwest to CORVUS with no further charges to CORVUS or Qwest Communications;

2. The data used on the face of the TelCove Agreement in the areas of DS1 line count and DID numbers require final confirmation. Under no circumstances is CORVUS committing minimum circuit volumes to TelCove with this data. The data used in these areas is accurate however, used for illustrative purposes only;

3. The data used on the face of the TelCove Agreement in the areas of minutes of use are based on 12 month averages. Under no circumstances is CORVUS committing minimum monthly revenue commitments (MMRC) based on this data. The data on the TelCove Agreement is accurate however used for illustrative purposes only;

4. TelCove will transfer services from CORVUS' current C-LEC to its network with no further charges other than those listed on the face of the agreement;

5. CORVUS has chosen to commit our facilities and traffic to TelCove with the confirmed conceptions that TelCove can process the traffic pursuant to the following items.

    a) Order, provision and install private line DS-1 service from CORVUS' clients (list to be provided) to the TelCove facilities and meet CORVUS at TelCove's co-location facilities at Melrose Avenue, Southfield, Michigan over one or more DS-3 circuits to be provided by TelCove to CORVUS;
    b) Order, provision and install two (2) DS3 circuits from TelCove's facilities to CORVUS' facility at the TelCove co-location via two (2) 1 pair coax terminated with male BNC connectors. The cost to CORVUS for these circuits is $100.00 each billed monthly for a minimum of one year.
    c) Provide one 7'(H)x23(W)" free standing relay rack equipped with fused -48Vdc electrical power panel capable of supporting multiple power outputs and a minimum of 300 watts and 15 amps for a cost of $500 per month;
    d) Provide CORVUS personnel 24hr x 7 day/week access to CORVUS' co-located equipment at no additional cost to CORVUS;
    e) Provide contact personnel for provisioning all facilities for CORVUS clients through CORVUS' customer care team assigned to this project;
    f) TelCove shall provide contact personnel for provisioning and installation of six (6) DS1 circuits from Qwest and four (6) DS1 circuits from SBC; with a cross-connect and termination fee no greater than $25/mo for each cross-connect; to CORVUS' co-location facilities (patch panel) at the TelCove facilities on Melrose Avenue, Southfield, Michigan.

g) TelCove agrees to establish industry standard; generally accepted Signaling System #7 (SS7) trunking connectivity between TelCove and Qwest Communications, or other carrier that CORVUS may elect, during the period of this Agreement; activated on the facilities provided by CORVUS and leased through a third party. This trunking connectivity is provided as part of the TelCove service with no additional charges to CORVUS.

h) The patch panel is to be supplied by CORVUS and TelCove has agreed to provide the connection from the Bell demark to the Patch Panel at no additional charge;

i) TelCove shall assist CORVUS with the transfer of service and shall protect CORVUS from loss of service subsequent to the transfer of Service to its network. For the purposes of this document, transfer of service shall be defined as; completion of provisioning and installation of each client's service and subsequent transfer of traffic (calls) to the TelCove network;

j) TelCove shall assist CORVUS with the "porting" of all CORVUS' direct inward dialing (DID) numbers to the TelCove system using generally accepted transfer methods and enable these numbers for use on the TelCove network with no additional cost to CORVUS;

k) TelCove shall provision individual DS1 service on its DS3 service to correspond to each of CORVUS' clients and provide the following DID/DOD characteristics on that service;

- Inbound DID service from the TelCove network;
- Inbound 800 service from the Qwest network;
- Outbound Intra-LATA service billed by call on the TelCove network;
- Outbound Intra-LATA service billed by minute on the TelCove network;
- Outbound pass-through of Intra-State and Inter-State traffic pursuant to destination number dialed to the Qwest network.

l) TelCove shall provision each client and assign a specific trunk group number and shall provide CORVUS the ability to assign more than one trunk group per DS1 on the DS3 used for switching traffic;

m) CORVUS shall purchase two DS3 circuits from TelCove and these circuits shall be used as follows:

l-1: DS3-1 shall be used to collect and deliver private line service from CORVUS' clients to CORVUS' co-location service;

l-2: DS3-2 shall be used to transfer traffic from the CORVUS private lines (DS1's on DS3-1 for the purpose of routing calls to LATA 340 and Intra-State/Inter-State to back to CORVUS' DACS for transfer to the Qwest DS1 services. Switching of all ANI and NPA/NXX call routing shall be performed by the TelCove 5ESS switch located on Melrose Avenue in Southfield, Michigan.

n) CORVUS shall perform the cross connects from each circuit element to each other circuit element for the purpose of call transfer from each of its clients to the facilities delivered by TelCove. CORVUS shall also cross connect data channels that will travel on the private line DS1 service to its Level(3) trunk group and TelCove shall not interfere with this transfer;

o) TelCove has agreed to allow both standard format DS1 and Primary Rate Interface (PRI) mix pursuant to provisioning order from CORVUS without further charges to CORVUS;

p) TelCove has agreed to extend current pricing to each new client that CORVUS adds to the service and will add additional clients without further expense to CORVUS with the exception of the private line DS1 ($325.00 each) and the additional traffic that will be billed to CORVUS at the current rates of .06 per call for Local non-toll, .0259 per minute for local toll and $100 for each additional DS3 circuit that conform to previously purchased.

q) TelCove shall provide appropriate electrical generation to CORVUS' equipment at the Melrose co-location even in the event of commercial loss of power for an indefinite period with no further charge to CORVUS.

6. TelCove agrees to place DID/800 calls on the back channels of each DS1 circuit and also allow CORVUS to provide 2 way backward hunting for 800 service assigned to DID numbers; through available channels on the DS1. CORVUS will identify each DID number that will be used as an RTN for each 800 facility;

7. TelCove agrees to place outbound call traffic starting on the first channel of each DS1 with two way forwarding through to available channels on each DS1;

8. TelCove agrees that all services provided will allow DID/DOD functionality;

9. TelCove accepts the CORVUS application in its entirety and does so with the full authority to process call traffic under State and Federal regulations.

10. CORVUS represents and warrants that it is a registered C-LEC and Intra-Exchange carrier under the regulations set-forth by the Michigan Public Service Commission (MPSC). Both companies agree that they are within regulatory guidelines to provide the CORVUS service.

11. TelCove confirms that its local calling tables are maintained and that CORVUS will be charged for local and local-toll calls according to the North American Number plan for calls made to exchanges in the SBC and Verizon North; LATA boundaries as described by the MPSC and incorporated into CORVUS' Tariff #1.

12. TelCove agrees that any disputes that may arise from boundary billing shall be reconciled pursuant to the LATA boundaries as set forth by SBC and Verizon North and accepted by the MPSC for local zone and Intra-LATA calling.

13. TelCove agrees to credit CORVUS for any charges that are discovered to be outside of the boundary calling scope for local zone and/or Intra-LATA calling without restriction and up to 6 months in arrearage if overcharges are discovered and claimed by CORVUS and validated by section #11.

14. CORVUS agrees to pay TelCove for monthly re-occurring charges as specified and local calls billed by call and local toll calls billed by minute used in the course of servicing its clients. Disputed charges shall be handled pursuant to the terms and conditions of the Service Agreement. CORVUS recognizes receipt of TelCove's invoices subsequent to billing media receipt at CORVUS' billing processor in Wallingsford, CT.

15. CORVUS agrees to pay invoices for local call billing and agreed to monthly re-occurring charges within 30 days from the date the billing media is delivered to CORVUS' billing processor in Wallingsford, CT.

16. TelCove agrees to forward billing data on acceptable media to CORVUS' billing processor in Wallingsford, CT. within ten (10) calendar days of TelCove's monthly billing cycle closure.

17. TelCove agrees to identify each of CORVUS' clients in the exact exchange the customer resides assigning NPA/NXX switch data to allow the client to make local non-toll calls to their region at per call billing.

18. TelCove agrees to provision outbound caller ID in generally acceptable formats that shows the caller the name of the company and/or the number of a pilot DID assigned by CORVUS that resides on the T-1 assigned to the client.

19. TelCove agrees to bill calls in six (6) second increments of use without rounding up to the next highest minute.

20. TelCove agrees that each of CORVUS' clients will be assigned account numbers and that each respective account shall contain that client's call data in the following detail;
    a) Customer account number
    b) Number dialed
    c) Duration of call in incremental time
    d) Cost of call
    e) Total Minutes
    f) Total cost for each account

21. TelCove agrees that bulk call data that is forwarded to CORVUS' bill processing company will be generally acceptable billing format. TelCove billing representatives shall assist CORVUS' bill processing company with the setup, testing and commissioning of the billing transactions between the two companies;

22. Non-Disclosure/Non-Compete: Neither party shall disclose to any third party during the Term of this agreement and for two years following the expiration or termination thereof, any of the terms of the Agreement, including pricing, or other Proprietary Information of the other Party, unless such disclosure is required by any state or federal governmental agency, is otherwise required to be disclosed by law, or is necessary in any proceeding establishing rights or obligations under the Agreement. Neither party shall knowingly directly solicit with existing clients of the Detroit market that are under separate agreement with each party, including renewal periods, during the term of this Agreement and for two years following the expiration or termination. Should a customer of one Party have multiple business locations, only the locations served by that Party shall be considered as protected from solicitation by the Agreement. The other Party shall not be encumbered from directly soliciting any other locations or facilities of the party's customer. Since a breach of the material obligation may cause irreparable harm for which monetary damages may be inadequate, in addition to the other available remedies, the non-breaching Party may seek injunctive relief and terminate the agreement and any other agreements between the parties for any disclosure in violation thereof.

23. The CORVUS application consists of supplying to end user clients; consolidated local and long-distance with Internet access and direct inward dialing services on a single DS-1 circuit combined with consolidated monthly statement of use (usage and facilities billing). TelCove agrees not to duplicate this application in whole or part for financial gain with new or existing wholesale accounts by soliciting collocation to those accounts with the method and application of the CORVUS application using Newbridge 3600, 36120, 3645 multiplexers, frame relay switches or 460120 network management systems; without the express written consent of CORVUS, Incorporated.

24. The TelCove Agreement and this Addendum to the TelCove Agreement shall automatically renew at the current rate(s) in annual terms unless either party tenders written notice to the other, ninety (90) days prior to its annual expiration date including renewal periods.

Subject: RE: Profitec Billing

All of the 4/20 bills are not yet accessible on the e-billing platform. The physical bills have not yet been sent out either. Once the bills are on the e-bill platform, Billie and Suzanne will set up the reports on each of the accounts, and Giovanni, or whoever is going to download the info and supply to Giovanni will have to access each of their e-bills, and pull the data to be billed.

These are the 7 Corvus accounts that made it for the 4/20 bill run.

2004022407312772	Corvus Inc./Motor City Electric
2004022316112750	Corvus Inc./Noble International

Denise,

I will rectify this issue. This will take a little bit of time, but everything should be rectified by the June billing cycle. I'm sending a new detail report to Giovanni to show the difference between the different customers that you guys have so when he pulls his report you guys can bill accordingly. Thank you for you patience.

Subject: Update

Good Afternoon Giovanni:

Hopefully this message finds you in the best of health. Is there an update on the progress relative to obtaining data from the latest disk forwarded from TelCove? I have spoken to Kevin Magloughlin a few times and was hoping that the two of you got together to work out any issues.

Please update me at your earliest convenience.

Best Regards,
Dave

Conversation: Update

David,

The arrangement is not necessary. I will give Kevin a call if necessary at my earliest convenience. I apologize for the length of time it is taking to complete your request.

Kevin - In case you did not receive any of my messages or emails, we are unable to read the binary data sent over on the last CD without layouts and field descriptions. On February 25, 2005, I requested to have the data sent over the same as the CD sent in September (with data from 6/12 - 8/20). I do not think it would be efficient or expeditions to spend a week or two programming data and then more time researching data that may or may not exist. Due to the complexity of binary data to differ between customer and switches, I prefer to receive data in ASCII text fixed width.

If this requires a follow-up call, I will be available after Thursday for a conference call.

Thank you,

No, I am not sending him anything until he tells me he can read the binary file. When he tells me that, I will provide field definations from Lucent documentation.

I have called him several times and then, last week, asked for your help to get him to get with me.

Let's get togeather and make this happen.

Minutes from meeting held on June 11, 2004.

Meeting w/ TelCove 6/11/04 Pat Markey, Kevin, Skip, Billie, Dave & Myself

BTN update regarding TelCoves "made up" BTN issues related. - Still too early to tell extent & damages ordered #s for last © cust. MCE/Lee Steed

Corvus local or local TEL calls - TelCove looking into why we are being billed for calls that are not ours.

Colo Equip will be taxable as well as Corvus service (E&DS 39)

Credits - Billie provided credit forms for our pending credits

Billing - Bills are not credible due to BTN issues and also on TelCoves local / TEL.
Pat suggests we tell cust there are billing record error and to bill exactly as last mo perhaps suggest 10% discount

(1) Dave requested TelCove to pull a pic from SE to determine how much traffic went through our trunk group. by btn would be great (call count)

BTN problem - Dave request Pat to provide an official statement to explain this. Pat will do whatever necessary to correct TelCoves error.

Pat requested a copy of MPSC letter from Dave

Minutes from Conference Call held June 25, 2004.

Denise Fisher

From: Denise Fisher [dfisher@corvusinc.com]
Sent: Monday, June 28, 2004 3:34 PM
To: 'dchoover@corvusinc.com'
Subject: Meeting minutes 6/25/04

Meeting Minutes 6/25/04 conference call w/ TelCove

Attendees: TelCove; Pat Markey, Billie Williams, Kevin McGloughlan, Suzanne (Ohio office)
Corvus: Dave Hoover, Denise Fisher & Don Hoover

Rate changes:
- Correct rate changes did not make the 6/20/04 bill.

Tax Exempt Issue:
- Going to forward to TelCove Tax dept.

Usage:

- Per Pat Markey they are taking a proactive approach by manually validating the calls.
- Time frame is 2 weeks for the 4/20/02 and 5/20/04 billings and another 2 weeks for the 6/20/04.
- Per Pat Markey TelCove still hasn't found root of the problem. Dave inquired how this did not get caught when TelCove did the billing
  validation according to the TimeLine. Pat responded all that was tested was Profitech being able to pull records from the E-bill, the validation of
  the accuracy of the bill was not tested. TelCove has their own IT Department that develops the billing program in Buffalo. It appears to TelCove that
  there is a "software glitch in the Aura Billing System"
- Suzanne from Ohio is working on the Corvus file first by downloading usage from the E-bill and is comparing call by call with the switch data, she
  will provide Corvus with a spreadsheet of her findings.
- Dave inquired to Pat what escalations have been made on these matters, Pat evaded question.

Payment to TelCove

- Per Pat's expectations he believes a reasonable amount should be paid (non disputed). Dave responded that we are still not sure what
  to dispute and suggested paying only the MRC, Pat agreed to this.

BTN issue

- The 2 remaining incorrect BTN's will have new BTN's on 7/12/04

Summary: Pat will continue to make weekly calls until all matters are corrected.

Denise Fisher
CORVUS, INCORPORATED

6/28/2004

TelCove 4/25 Conf call Suzanne Dias

Rate changes did not make 4/20/04 bill run

Tax exempt going to forward to their tax dept

Usage - Proactive approach, manually validating calls & vols will have 4/20 & 5/20 bill. Still do not know problems so 4/20 bill will be wrong will take 30 days for that correction

Regarding pmt. Per Pat expectation reasonable amt. (non disputed) Dave argues not sure what to dispute and suggested paying MRC ok per Pat

Cust not billing traffic goes to same

Dave? accuracy

Suzanne from Dias is working on Corvus file by downloading usage from E-bill and is comparing (call by call) w/ Scotch Data she can provide us w/ a spreadsheet

Meeting minutes

Dave asked why this wasn't done according to our Time Line Sheet as previously agreed on on past meetings. Pat responding that all that was tested was Projtech was able to pull records from & fill. We are 3rd cust. on this program - also the largest
* he doesn't know what problem is "Software glitch in Cura billing system."
IT Dept
Have their own IT that develops billing program (in Buffalo)

Pats commitment is to rebuild files

BTN's for 2 customers remaining to be corrected 7-10

Dave asked if escalations has been made Pat evaded?

Pat will continue to make weekly calls.

So.... what has been done in last 2 wks?

Ballin? = 50% Error

July 12, 2004, e-Mail from Pat Markey re Status Update.

David Hoover Wed, Apr 19, 2006 3:30 PM

Subject: FW: Status Update
Date: Monday, July 12, 2004 4:51 PM
From: Pat Markey <Pat.Markey@telcove.com>
To: <dchoover@corvusinc.com>
Conversation: Status Update

David:

As requested, I have attached our company's progress. As you and I have discussed, we have identified irregularities with our usage records/billing with the 4/20 and 5/20 bill cycles. We are doing everything possible to get this matter corrected. Let me assure you that the TelCove team has taken this project very seriously. To that point, we have dedicated and spent many man hours among four different regional and corporate offices to solve this issue. I mention this only to show our unwavering effort to serve your company. The following are highlights of our progress:

1. Routing translations for the 5ESS have been verified and tested.
2. TelCove billing platform has been verified.
3. Local switch entries for Corvus accounts have been verified.
4. Study indicators have been built for the Corvus office account.
5. Delivery of 5/20 usage is as follows:
   a. 4 accounts 7/12/04
   b. 4 accounts 7/14/04
   c. Balance of 5/20 accounts to be delivered between 7/22 and 7/26
6. 4/20 accounts to be delivered before month end.
7. Verification of 6/20 records are to be completed before month end.

David, I thank you for patience in this matter. Your company's continued success is our goal. I am on vacation this week but I am accessible via my wireless phone and e-mail. Please feel free to contact me anytime.

Pat

Subject: RE: 6/20 bill run

David, I picked up your voice mail last night and I read this e-mail the evening before. Thank you for your observations on the 6/20 billing. The discrepancy in minutes is of great concern. As discussed, last week we are reviewing all fixes/changes that have occurred over the past several weeks to get a fix on when we can expect accuracy (the date you asked for). We hope to have that information very soon. With regard to escalation, I notified my RVP of this issue and the systematic approach that is/has taken place in the month of June and July. I had this conversation a week or two before I left for vacation. Yesterday, I talked with the SVP and discussed this approach with him. I am writing to him this morning outlining our concerns and a request for a senior level review of this issue. Certainly I am hoping that this review validates that on a "going forward" basis that the usage issues have been resolved.

I am in Columbus today. My understanding is Billie went home sick yesterday. I will get her status this morning so she can review the rates and any other fixed billing issues that remain. I will call you later this morning so we can talk.

Pat

-----Original Message-----
From: David Hoover [mailto:dchoover@corvusinc.com]

To: Pat Markey
Subject: 6/20 bill run

Pat:

We are still being billed the incorrect rate for all of our billings from TelCove. Additionally, the following customer's are not billing any traffic.

- South Oakland Billing
- Utica Enterprises
- Bob Sellers
- Motor City Electric (they may have switched their traffic directly to SBC)

You had indicated that most if not all of our problems would be fixed in this bill run, unfortunately this does not appear to be the case. We also are in the process of matching historical data to current data for local minutes of use. As a preliminary, In March we had approximately 180,000 minutes with AT&T and during the month of June it appears we only have 64,000 minutes on TelCove. As mentioned in prior conversation, our overall billing revenue is substantially off from what was budgeted with the new pricing. Denise has requested confirmation that Billie can meet with her next week Wednesday and attempt to make sense out of the last billing. I would suggest that you authorize this meeting.

It looks like we have hurried up to stay in place. Do we need to escalate to a higher authority within TelCove to get these problems corrected?

To: David Hoover <dchoover@corvusinc.com>
Subject: RE: Conversation Summary

David:
Thank you for the summary. I have added a few items that I feel were missed as well as some additional comments for clarification.

I agree with item one.

With regard to item two, I mentioned that we are running a proforma bill giving us the rates and usage up to this point for the month of August. I mentioned that we are taking additional steps to assure that our billing (the 8/20 bill) is correct. This action allows us to manage and monitor our progress as we approach our billing cut off date.

Item three. You did pass this information to me. I asked what you thought this meant and you commented that you were not sure. Let me suggest that we get together and verify that we are talking about the Qwest portion of the LD calls and how these calls might relate to our records.

Item 1A ..I agree.

Item 2A . We did not talk about putting call records on CD but you did mention this in a previous e-mail. Lets talk about how these records can help to serve both of us.

Item 3A. This point is perfectly clear. As mentioned, we are making every effort to correct this issue as quickly as possible.

Item 4A. You talked about this option and you have mentioned this is in a previous message. My comment was "we will get this billing problem corrected". We both agreed that correcting the billing problem was the right solution.

Item 5A You did talk about all these items.

As mentioned David, we have worked very hard and will continue to work hard correcting our billing issues. I am confident that we can get these issues behind us and I look forward to our continued relationship.

Pat

To: Pat Markey
Subject: Conversation Summary

Pat:

In summary to our conversation yesterday afternoon:

1. You did not think that your MIS department would have our records ready for Profitec however, they were going to try to have them completed by 5pm on 8-13-04. I then informed you that we would not wait for the billing past that date to process our August billing for July Traffic.
2. I have the impression that TelCove has not discovered the "ROOT CAUSE" or our local billing problems as you indicated that they were waiting for the 8/20 billing to see if it is billing correctly.

3. We talked about our preliminary findings relative to our long-distance traffic from the switch records provided to CORVUS for the period 4/6/04 to 6/11/04. Below is the preliminary discovery for the dedicated trunk group;

TELCOVE Switch -vs- Profitec Billing Analysis for Long-Distance Traffic

Type	Billing Period	Switch Record Count	Billed Record Count	Descrepancy	% Billed
Dedicated	4-6-04 to 6-11-04	172,476	32,155	140,321	19%
Dedicated	4-6-04 to 6-11-04	24,690	-		0%

1. I had further stated that we were also analyzing the switched traffic to determine if some of these records showed up there.
2. You had agreed to forward the switch records on CD in the same format as before for the period 6/12/04 through 7/30/04.
3. We had discussed the importance of obtaining results to correct our billing problems caused by TelCove;
4. We had discussed our option to move the traffic to another carrier as a last resort; leaving the private lines and collocation in tact at TelCove;
5. And finally we spoke about the financial burden that TelCove's inability to bill CORVUS' traffic has placed on our company. We had also discussed CORVUS submitting a claim subsequent to the closure of our lost traffic study. We will require the aforementioned switch records to complete our study. Please forward at the very earliest convenience. We closed the conversation with dialog relative to TelCove's inability to produce prior records that can be read by Profitec. Obviously, as we have stated many times, CORVUS cannot remunerate TelCove for traffic that CORVUS cannot rebill. This was agreed to by both parties on numerous occasions.

If these depictions of the summary of the conversation between Dave Hoover and Pat Markey on 8-10-04 are not accurate, please notify the sender at once. Otherwise we will consider the summary dialog written here as the facts.
?

To: David Hoover <dchoover@corvusinc.com>
Conversation: CORVUS deliverables
Subject: RE: CORVUS deliverables

Good Morning David,

We have encountered some problems with the AMA provided by TelCove. The call records appear to be ok, however the standard AMAT headers that are on the file have been doubled up in some cases and in other cases are not located in the expected locations within the file. We will contact Kevin to see if there is anything they can do to remedy the situation and if not then we will have to do some programming in our pre-processor to get around the erroneous headers.

Based on our past conversations it sounds like Profitec uses SMDR for their billing records and therefore getting AMA from them is likely out of the question. If they have the ability to produce Industry Standard EMI (which is in ASCII) then we can process the usage and do a record for record comparison of the calls. Otherwise some combination of total billed calls and minutes of use by trunk group and BTN will probably work. With that we would try to generate the same totals from the processed AMA from TelCove and then compare the two sets of totals for you.

I will try to get the service proposal out to you shortly. Once you sign off and fax back the proposal we'll be ready to charge ahead on this project.

Joe

To: Joseph D. Neubauer
Subject: CORVUS deliverables

Good Morning Joe:

Attached is the local calling area in Excel format. The exchanges in LATA 340 (our calling area) are 313-248-734-586-810.

We placed a call to our contact at Profitec to obtain the billing data from June 1 to Dec 31, 2004 however, they were not available until Monday. We will follow-up with them and have them send you a disk with the data on it. I doubt the data will be in AMA format, most likely ASCII. If this is a problem, please advise. Our trunk dedicated trunk group to Qwest is 700. TelCove does record the originating trunk group and BTN on each call, or so they say. You may want to search for type 074 calls which is unbilled toll calls. Our local trunk group is 608 (they believe) any call identified as a 3700 call does not belong to CORVUS. As I understand, CORVUS calls have a 110 call code and 625 for the structure code. If you require further information or clarification of this data, please call Kevin Magloughlin with TelCove at 248-864-0041 or cell 248-910-7675. Please introduce yourself as working with the Martin Group.

I will follow up on the Profitec stuff early next week. In the interim, if you require any further information, please advise.

Thanks,
Dave

Proposal dated April 4, 2005 from FireSteel Technologies LLC

FIRESTEEL TECHNOLOGIES, LLC

324 West 10th Avenue
Mitchell SD, 57301

Phone: 605-996-2927
Fax: 605-996-2938

www.FireSteelTechnologies.com

Service Proposal

Client Company: Corvus Incorporated
25200 Telegraph Road
Third Floor SW
Southfield, Michigan 48034

Client Contact: David Hoover
President

Date: April 4th, 2005

Overview:

This proposal is for FireSteel Technologies to provide Corvus with Call Processing, Reporting and Data Analysis services to assist them with the verification of telecommunications traffic recorded by TelCove.

AMA data received from TelCove will be processed through the FireSteel Call Processing Center to perform format translation, data validation, usage identification, and error handling. Billing data from Profitec will be provided in a summarized form and compared to the results of the AMA data which had been processed.

Reports and/or data files will be created to show results and provide a mechanism for data analysis. Operational reports showing the disposition of all data records processed will also be available.

All data received from Corvus is the property of Corvus. FireSteel Technologies will keep all data secure and confidential. FireSteel Technologies will maintain emergency backup copies of the usage data and any company configuration data required for processing the usage.

Cost and Service Summary:

One Time System Configuration Charge - $7500

System configuration includes the setup of our production systems for Corvus and the loading of all pertinent information required to process and report on the usage data. This includes information for exchanges, trunk groups, local calling areas, wireless carriers, and interexchange carriers. FireSteel Technologies will be responsible for loading the configuration data into the system. Corvus will be responsible for providing the data in an electronic format such as a text file or Excel Spreadsheet.

Monthly Usage Processing Charge - $1000.00 for each month of usage processed.

$1000 per month for up to ten million records per month.
$200 per month for each additional million records or fraction thereof

The monthly processing charge includes the following services:

1. AMA Processing
2. Monthly processing summary reports showing the disposition of all records processed.
3. Up to ten standard usage summary reports.
4. Up to ten usage data dumps.

Standard Usage Summary Reports

Usage Summary Reports will contain any combination of the following data fields for the date range and print order desired by Corvus.

Traffic Type	
Exchange	Call Direction
Trunk Group	Jurisdiction
Carrier	Conversation Minutes of Use
Interconnect OCN	Carrier Access Minutes of Use
Usage Date	Message Counts

Usage Data Dumps:

Usage data dumps (if required) will be in a previously agreed upon format. These data dumps may include any combination of data fields contained in the call detail.

Software Development and Consulting Fees:

FireSteel Technologies will bill Corvus at their standard rates for any software development and consulting services that may be required for the Call Processing, Reporting, and Data Analysis services.

Software Development Rate:	$100 per hour.
Consulting Rate:	$125 per hour.

We anticipate that some amount of programming will be required to process and compare the billing totals from Profitec with the raw AMA from TelCove. Programming may also be required to support non-standard AMA header information found in the files from TelCove. FireSteel does not expect this development effort to exceed 40 hours and will inform Corvus ahead of time if costs are expected to exceed that amount.

Terms:

By signing and returning this proposal, Corvus Incorporated authorizes FireSteel Technologies to perform the Call Processing, Reporting, and Data Analysis Services outlined within this document and to invoice them accordingly. FireSteel will invoice monthly for services rendered and Corvus will be responsible for payment in full (plus any applicable taxes) within 30 days of receipt of the invoice. A late payment fee of 1.5% will be assessed monthly on any past due balances.

Notations regarding this material:

1. This page is the last of 672 in the report
2. Random testing from the SBC local calling area indicates that many records here are outside the local area making them toll records that should be passed to Qwest
3. All 4,169 call records represented on this report are billed to a single client and no other client call records were passed to Profitec for the billing cycle.

October 19, 2004 E-Mail from Giovanni Daniels re TelCove Data Disk

Subject: RE: TelCove Data Disk
Date: Tuesday, October 19, 2004 9:45 AM
From: Giovanni Daniels <GDaniels@Profitecbilling.com>
To: David Hoover <dchoover@corvusinc.com>
Conversation: TelCove Data Disk

Hi David,

The surgery was successful but it required a longer rest time than I anticipated. As for the test, I did not find any billing link from Qwest to Telcove or vice versa. There were no duplicates or overlapping call records. The summary of corvus spreadsheet is correct with it's findings because it does list the problems and missing usage. As for what is really missing, there is nothing that I can use to compare numbers to give you what is accurate or not. I will review the 9/20 billing and see if any of the usage that was suppose to be captured in the past was done. Does Qwest and Telcove provide you a bill with total amounts and usage dollars for the month? If so, could you provide me the amounts broken down by usage categories if possible.

I will send you an updated on my findings with the 9/20 invoice. Please let me know if there is anything you need in the meantime.

Thank you,

Giovanni

Subject: TelCove Data Disk

Good Morning Geovanni:

I have not spoken to you since prior to your surgery. I do trust that everything was successful. Please write back and let me know. Can you also advise as to your progress with the 8/20 data disk from TelCove. I was awaiting your analysis on what traffic was presented to the switch –vs- what was billed by Qwest. We have the understanding that the local could not be billed however, should there be data that is noteworthy for further discussion, please include. If you need me to forward the spreadsheet used in the prior analysis, please advise.

Looking forward to your positive results on both forefronts.

Best Regards,
Dave Hoover

Minutes from July 13, 2004 Meeting.

Subject: Outstanding Issues with TelCove
Date: Tuesday, July 13, 2004 3:29 PM
From: Denise Fisher <dfisher@corvusinc.com>
Reply-To: <dfisher@corvusinc.com>
To: <dchoover@corvusinc.com>

ISSUES:

"PHANTOM BTN's", Corvus, MCE and Lee Steel still have the "Phantom BTN", which seems to be root cause of inaccurate usage.
Progress - None so far, issue came to light immediatley upon cutover, problem was confirmed in the beginning of June. On June 6, Pat
Markey told us the new BTN's would be available in 30 days. Then on June 25, Pat informed Corvus the BTN's would be available on July 9th.
the BTN's are still not available as of today.

USAGE, validating actual usage vs. billed usage. Discovered and made TelCove aware of problem 6/3/04
Progress - None, per Pat we on 6/25/04 we would have the corrections for the 4/20 - 5/20 billings on 7/9/04 and for the 6/20 billings on 7/23. On 7/13 we received an
Excell spreadsheet with what looks like the same inaccurate data on it.

CUSTOMER'S NOT BILLING TRAFFIC, Sellers, Utica & MCE, discovered and informed TelCove 6/3/04
Progress - None, per Pat on 6/25 this would be corrected on 7/9/04, as of today it is has not been corrected.

BILLING, incorrect rates, and separate billings
Progress - Non, per Pat on 6/11/04 this would be corrected immediately, as of today it has not been corrected.

Subject: Status Update

Pat:

Please confirm, in writing, your company's progress during the past two weeks in correcting our billing problems. Two weeks ago today, you had committed to have the April, 2004 billing completed by today. You had also committed to have the May billing complete two weeks from today. We remain unsure if TelCove has completed the analysis required to insure that our new service is accurately billing traffic from our clients.

I will look forward to receiving your written update by the end of business on Monday, July 12, 2004.

Thank you,
Dave Hoover

------ End of Forwarded Message

Outstanding TelCar Issues 7/13/14

Issues

- "Phantom ETN's" Lorain, MCE & Lee Steel still have
  Progress - None so, Last heard on 6/25 (first heard on 30 days than)
  per Pat Markey, we will have MCO ETN's 7/10

Usage - Validate actual vs billed usage
  Progress - None, per Pat Markey, we would have corrections 7/9 for 4/20 & 5/20 invoice and 7/25 for 6/20 invoice. Received Excell spreadsheet 7/13 w/ 4 customers all inaccurate usage still on there

Cust. rt billing, traffic, Sellers, Lorain, MCE (Accounts)
  Progress - None, per Pat Markey, this would be corrected 7/10 it is not

Billing - Incorrect rates and (Documents) separate billers,
  Progress - None, per Pat correct rates and Coordinator limits, will be in test mode
  at 6pm

MEETING MINUTES 8/2/04

CONFERENCE CALL ATTENDEES: Pat Markey, Suzanne, Billie Williams, Dave Hoover and Denise Fisher

BILLING
- Ready today on e-bill, includes 6/4-7/20 missed billing in a billable format.
- South Oakland's usage is triple as usual, Suzanne will look into.
- Local Toll, Quantum Warren, APAC, South Oakland all billing toll after the 8/17 switch, Pat does not know how this is happening for some reason TelCove "missed a step" Pat will look into.
- Dave questioned whether calls are leaking into another trunk. Pat said that is not happening.
- Confirmed with TelCove that billing all billing issues are not resolved, Suzanne going to pull the billing proof to see how things look and let us know.
- Pat will have back billing cd to us by Tuesday 9/7/04
- Suzanne will verify next week that the PRI upgrades (Crest, Volvo, Superior) are billing correctly

MCE Outage
- Suzanne will investigate why this took so long for TelCove to have repaired, all agreed that 1 week is not acceptable time to repair

Noble DID's
- Dave wants to verify if DID's are coming in on back side of the T-1, Pat will check with Kevin

9/2/14 Bekie Suzanne

Markey, Dave, M, SF

6/12 - 8/20/14 cd to us by Tuesday

Suzanne

Corvus - Mod 104 to verify today

- Billing ready by Tuesday to Procter she will verify
- to call Suzanne
- South Oakland truck as regular Suzanne will verify w/ MOD 104

MCE - 1 week outage Suzanne will investigate

Mobile - [illegible] to verify if DID's come in on back side of T-1

Network Suzanne will ✓ to see if upgraded MCE's are [illegible] correctly

Local Toll - Stuart Warren, AT&C, SoOak

All [illegible] toll [illegible] this is happening ~~Mobile~~ for some reason. TelCove ~~missed~~ missed a step Pat will look into

- All questioned weather calls are "Warning [illegible]

1st usage 8/17

1st usage 8/17

1st usage 8/18

✓ Questions 12

1) Utica, Noble, Crest, Superior, TTI, Sellers, Quantum BH, APAC, K&S, Rays, Lee, Volvo all state "need to reopen ticket" why was ticket closed w/out verification of corrections.

✓ 2) Lee Steel "should not bill" what does that mean?

3) Quant Warren, APAC, SoOak all billing Toll, how is that possible?

Summary Of Corvus 8/20/04 bill.

1. Eight of the 18 accounts have usage dating back to 6/4/04, and will continue to bill usage correctly going forward.
These accounts are: HB Stubbs, Crest Lincoln Mercury, Quantum Bloomfield, Quantum Warren, APAC, Ray's Electric, and K & S Industrial. Is it going to be sent to Prof Inc billable for it?

2. The Corvus account was never disconnected, and billed usage continuously. NOT our usage! Who's is/was

3. Three accounts billed usage correctly this month, and billed a partial month of usage on the 7/20 invoice. I am going back to our IT department asking why the few weeks of usage noted on the spreadsheet were not on this invoice, and requesting that it is re-captured.
These accounts are: Bob Sellers, Lee Steel, and Superior Ford. When expected? Can't tell maybe by Tuesday.

4. Two accounts are billing Toll usage, but no LMS. I am requesting that Kevin take a look at the calling plans set up for these customers to make sure that the LMS is not being billed as toll. Otherwise we may need to look to see what the PBX is doing.
These accounts are: Quantum Warren, and South Oakland. PBX is programmed to send local & toll out PBX

5. One account (Utica Enterprise) had the incorrect BTN in the switch until 8/18/04. There is only usage from 8/18, and 8/19 on the invoice.
Contacting IT Billing to see if we can re-capture usage from incorrect TN input in the switch. How did this happen? What was the incorrect #? If it wasn't in Qwest Where did LD go? (586)

6. Noble billed very little usage due to the PBX sending the usage to one of the Quantum locations.

7. Motor City Electric is still billing no usage. We have verified that ther is no usage going through the switch for this customer.
I have also check to see if the TN's were ported to another carrier in NPAC, and they were not. Requested Pat speak with David to check the PBX.

8. Four accounts billed this month, but the usage for the entire month is not there. I have sent to IT Billing to re-capture old usage.
TTI, Crest Volvo, South Oakland, and Philipps [redacted] re? So Oak 7/27-8/19

9. LMU, and Intralata discount orders, and IT tickets complete, but credit still off .
Billie will write OCC's.

10. Lee Steel has a duplicate account that is billing $1 for directory assistance. This location was removed from the account, and should not show up on the 9/20 invoice. Should not or will not?

Subject: Change in Switch Profile for CORVUS
Date: Monday, August 16, 2004 11:44 AM
From: David Hoover <dchoover@corvusinc.com>
To: Pat Markey <pat.markey@telcove.com>
Conversation: Change in Switch Profile for CORVUS

Pat:

We are requesting that you place an order internally within your company to route our local toll and long-distance traffic out your switched trunks so that we can bill these on a two-PICC arrangement we have had established with Qwest Communications. Since Qwest cannot bill local non-toll this will remain on your network until further consideration is given to the matter. This request is due to TelCove's inability to bill CORVUS for local traffic and the concern from prior evidence that only a portion of our long-distance traffic is actually being routed to our dedicated Qwest trunk group. I will call you to confirm your estimated time to complete this request within the next hour.

Thank You,

Dave Hoover

RE: Lawrence Bucciero (586) 751-1000

Mr. Casterline:

Please be advised that Qwest has completed a review of the complaint made against Qwest by Mr. Lawrence Bucciero. After investigation, Qwest has determined that this ANI was provisioned on behalf of a Qwest reseller called Corvus Inc. Qwest cannot respond to this complaint as Qwest acts solely as a provider of transport services for Corvus Inc. The company in question is reselling Qwest and is currently offering reseller services to other regionally based switchless resellers.

As a general rule Qwest never interfaces with the end user nor do we have access to the Letter of Agency for account numbers provisioned on behalf of the reseller. For legal reasons, Corvus Inc has the ultimate responsibility as the reseller and not Qwest. Any future correspondence regarding this case should be directed to the following:

Corvus Incorporated
29777 Telegraph Road
Suite 2151
Southfield, MI 48034
(248) 358-8500
(888) 426-7887

Qwest regrets any inconvenience that this may have caused. Should you have any further questions, please do not hesitate to contact this office.

Sincerely,

Louis Armenta
Customer Advocacy Manager 517-241-6180

In the matter of the Complaint of CORVUS Incorporated against TelCove Operations, Inc.	)))	Case No. U-14901 E-FILE/PAPERLESS

DIRECT TESTIMONY OF KEVIN MAGLOUGHLIN

Q. Please state your name and business address.

A. My name is Kevin Magloughlin. My business address is 28505 Schoolcraft Road, Building 6, Livonia, Michigan 48150.

Q. By whom are you currently employed?

A. I am currently employed by MetroPCS.

Q. Were you previously employed by TelCove?

A. Yes, I was employed at TelCove for almost five years. I left TelCove in June of 2005.

Q. What was your role at TelCove?

A. I was TelCove's Operations Manager for the Michigan area. In this role, I was responsible for site engineering, requirement planning, and ordering of equipment and lines. I basically did everything required to get service provisioned to a customer, except for issues related to the outside plant and account maintenance.

Q. Did you have hands-on responsibility for all of TelCove's customers in Michigan?

A. While I did not necessarily have hands-on responsibility for all aspects of each customer, for those customers for which I did not have hands-on responsibility, I had oversight for most of the TelCove personnel who were responsible for provisioning their service. I did not have responsibility for those who built and maintained dialing plan translations for line and trunk routing. This function was done by a gentleman in the corporate office in Pennsylvania.

Q. Was the CORVUS account one of the accounts assigned to your oversight?

A. Yes it was. I not only had oversight for the CORVUS account, but I was personally responsible for cutovers and transfer of service for each of CORVUS' lines. The only areas delegated, with respect for the CORVUS account, was that other people within TelCove, under my supervision, ordered the actual circuits used and created the accounts under the CORVUS parent account.

Q. Were you responsible for TelCove's monthly bills to CORVUS and for the transmittal of billing data to CORVUS?

A. I was not involved in billing. Billing was the responsibility of administrators in TelCove's Pennsylvania home office. The billing was done using TelCove's proprietary billing software. This software package, which was called Aurora, took its data from the BILLDATS system that was fed via the internal data network from the Lucent 5ESS switch. Because of all of the problems with and related to Aurora, I tried to stay as far

away from it as possible. Billie Williams at TelCove was the person who performed the day-to-day account setup and takedown as needed by submitting the order spreadsheets to the Aurora data entry group. However, I was often briefed by Mr. Hoover at CORVUS about the billing problems they encountered and in my role as TelCove Project Manager I was required to become familiar, on a high level basis, with what was causing such problems within the Aurora system or the local switch.

Q. What were the problems with Aurora?

A. Aurora was a proprietary system and was written by contractors for TelCove for TelCove's specific operations. It was very unwieldy and difficult to work with. For example, if an account had to been removed or something with the account had to be changed, the Aurora software had to be manually reprogrammed to get the correct information into the system. All in all, it was a screwed up system that was very difficult to work with because development was never completed due to the loss of funding because of the Adelphia Business Solutions bankruptcy. This is the name TelCove was previously known as before it became TelCove.

However, let me be specific to CORVUS' problems with the Aurora system. Mr. Hoover frequently complained to me and others at TelCove that the number of long distance calls, both intraLATA Toll and InterLATA Toll, that TelCove was reporting to CORVUS' billing processor was much lower than before Coruvs had switched its service to TelCove. In many instances, the configuration of the software in TelCove's switch was just plain wrong. TelCove used engineers and programmers out of Pennsylvania to

setup and maintain the switch and its database. As soon as we, on the local level, heard the problem with CORVUS' billing, we could tell that the rate centers programmed into the switch by the database administrator were messed up.

Q. How could you tell that the rate centers were incorrectly programmed?

A. Each geographic rate center is assigned a number value in the switch translations which identifies what it is. For example, if the Southfield, Michigan rate center is programmed in as RAX 7, calls to anywhere else from a line assigned to RAX 7 are rated based on the digits dialed by the end-user.

When we were doing tests on the system to try to figure out why CORVUS was not achieving the correct level of billings, and to resolve an issue with calls dropping, we found out that in some instances when you dial the call from Southfield RAX 7 it was translated and rated properly as a toll call, but when a call was made from another RAX specifically setup as a CORVUS RAX it was rated by the Aurora system as a local call, even when it should have been long distance, as is possible by having rating errors in the switch database.

Since CORVUS was on a measured rate local package with TelCove, when those calls were flagged as local, the calls were not recorded properly and never made their way through Aurora and on to CORVUS' bill. IntraLATA long distance was not billed properly either and did not show up in CORVUS' long distance billing records. Since it did not show up in the long distance billing records, CORVUS' call volumes, the call volumes on which the profitability of their business is based, plummeted. Basically long

distance calls were flagged as local, but were still delivered to their long distance destination.

Q. Have you reviewed CORVUS' December 2003 Contract and March 2004 Addendum to that Agreement (collectively the "Agreement"), which are attached as Exhibit C-1 to Mr. Hoover's pre-filed testimony?

A. Yes. I have reviewed that Agreement many times. It was brought to my attention as soon as it was executed.

Q. Do you believe that TelCove fulfilled its part of the Agreement?

A. I don't believe that TelCove fulfilled its part of the Agreement. However, I see the Agreement as having two sides to it. There is the side of the Agreement that has the service provided to the customers of CORVUS, these include the lines and completion of calls. In my opinion, that part of the Agreement was fulfilled with good service. However the Agreement also included the provision of billing services to CORVUS – that part of the Agreement was clearly not fulfilled by TelCove due to the Aurora system and the switch database. The part of the Agreement that was not fulfilled was beyond my control as TelCove's Operations Manager.

Q. Are you familiar with the term Billing Telephone Number?

A. Yes I am familiar with the term Billing Telephone Number or Billed Telephone Number and the acronym the terms are more commonly known by "BTN." The BTN is the

primary telephone number used for billing regardless of the number of telephone lines associated with that number. It should be distinguished from the Working Telephone Number or "WTN," which is the published telephone number for the business, which may or may not be linked to the BTN. For example lets say a company has a PBX with plain old analog lines with one main telephone number. For example this Business, which I will call Business X, publishes their number as (248) 555-1234. Anyone who dials this number get Business X's receptionist, Mabel. Mabel answers all calls and transfers them to internal telephone lines when people want to talk to anyone at Business X. However the "internal" lines still need to have numbers associated with them as do any outgoing lines. Thus the "internal lines" or even Direct Inward Dialed ("DID") lines may be WTNs, while the main number is also the BTN for all other numbers in the company. For that matter, any number can be the BTN, it does not necessarily have to be the main listed telephone number.

Q. What is your understanding of how BTNs were used by TelCove and CORVUS under the Agreement?

A. Using Business X as my example again, remember that (248) 555-1234 is the main number and Mabel the receptionist is answering all calls at that main number. Once Business X signs up with CORVUS everything is automated. While calls still can and do come in on (248) 555-1234, many calls come in on a DID or are automatically routed by computer controlled Private Branch Exchange ("PBX") equipment to individual internal lines. In fact what really happens is that Business X's service is split in two. All

outgoing service goes out over one or more CORVUS T-1 circuits, which can each handle 24 individual telephone voice circuits. Business X's incoming service continues to come in through the incumbent local exchange service, SBC/AT&T on analog lines assigned to telephone number (248) 555-1234. This method of serving a customer creates a good redundancy. If either the CORVUS digital lines or the analog incoming line goes down, Business X still has telephone service using the other form of service.

Q. Are you aware of any problem that occurred with the BTNs used by TelCove and CORVUS in late May of 2004?

Yes, I am aware that duplicate BTNs were assigned by TelCove to CORVUS' clients.

Q. How were duplicate BTN's assigned by TelCove to CORVUS' clients?

A. Because CORVUS' customers were going to use their regular numbers, such as the (248) 555-1234 number I illustrated above, for incoming calls that were to be delivered over SBC's network, we needed to assign a BTN for each CORVUS customer for use on the TelCove network. Normally we would purchase, or have assigned, an exclusive number from the North American Numbering Plan Administrator ("NANPA"). In this case we could not port CORVUS' clients main numbers to TelCove using Local Number Porting or use those numbers as the BTNs, since the numbers had to remain on the SBC network to receive incoming calls.

When this was explained to TelCove Corporate, we were told that they were not going to purchase new numbers, but rather we should just make up numbers for use in the

TelCove system. This ultimately came from Darla Eisle at TelCove. We were told that this was a matter of cost for these numbers. So that is exactly what we did, we made numbers up, pulling them out of the air. This was done at a meeting in Southfield, with both Billie Williams and Skip Standriff from TelCove present. TelCove Corporate gave us the impression that those numbers were to do nothing but be a place holder in the Aurora billing system. While that was correct, this practice had some unintended consequences.

It should have been a matter of internal housekeeping with the Aurora system to make sure that those numbers were properly used and kept exclusively within the Aurora system. Unfortunately, those numbers were sent to Qwest because this new BTN became the way to identify the traffic from CORVUS in the Qwest long distance system. These numbers were presented to CORVUS as clean numbers and they were not. Rather, these numbers belonged to SBC. This created a chain of events under which a Traffic Control System Interface Message was automatically sent from Qwest to the local carrier for that BTN requesting that the Primary Interexchange Carrier ("PIC") code be pointed to Qwest. Where the "made up" BTNs happened to match existing real telephone numbers the existing real telephone numbers ended up switched to Qwest as their long distance carrier. This is what happened with the tool sales guy up in Milford.

Q. Were these customers "slammed"?

A. Yes, if you mean that their long distance carrier was changed without authorization as a result of the duplicate BTNs being used in the system.

Q. Do you know if any of them complained to the Michigan Public Service Commission.

A. Yes, I believe a few of them did. However, CORVUS and Qwest dealt with those entities that had been slammed and I believe settled any claims off line. Qwest has very high standards with respect to slamming and does a good job of ensuring their resale customers pay attention to the rules.

Q. How long were these duplicate BTNs in the TelCove system?

A. This problem, and the resulting problems with third-parties went on through the middle of June or July of 2004. I believe we had it resolved by that time.

Q. In retrospect, should have TelCove made up BTN numbers?

A. We should not have. But when corporate told us, meaning those of us in the field, to do this, we did not know that the numbers would be sent off to Qwest, causing unsuspecting third parties to have their long distance service changed without their authorization. In retrospect we should have, and in some cases did, use ported DIDs for BTNs, rather than just assigned random numbers for the BTNs. The whole process took time and with a reluctance on the part of TelCove to get us what we needed to get this done due to cost, we ran into the wall.

Q. Who at TelCove would have, or should have, known that the made up BTNs were going to be sent to Qwest?

A. I am not sure who, if anyone would have known that these numbers would end up going to Qwest. They should have been clean numbers and this could have been avoided.

Q. You mentioned earlier that CORVUS' service was misrated as local when it should have been long distance. How do you believe this affected CORVUS' business?

A. As I described each rate center has a RAX value assigned to it. This RAX value has to do with how the outgoing calls are rated and translated. Using the RAX you can change the rating of a call from interLATA to intraLATA to local. For CORVUS we had to assign a different RAX value for each of the various CORVUS lines coming from a rate center in order to route interLATA long distance traffic to Qwest, CORVUS' chosen IXC. For a while the RAX value for many of CORVUS' lines were set wrong. These wrong RAX settings caused a high percentage of outgoing calls to end up misrouted through TelCove, through TelCove's main Tandem Switch in Pittsburgh, no matter whether the call was interLATA, intraLATA, or local.

Because the calls were never routed to the Qwest network, CORVUS's billing processor did not get notified of the call for purposes of billing CORVUS' clients. This was especially problematic because CORVUS' clients had a service under which they were billed a flat rate for unlimited local calls. Therefore no matter how many calls were rated as local, even when in reality they were long distance, they were billed at the flat rate.

Q. Did TelCove "slam" these otherwise long distance calls?

A. In a technical sense, TelCove did handle calls that otherwise should have been routed to Qwest, CORVUS' long distance provider, without authorization. What TelCove did was route calls behind the scenes to an improper destination. In addition, TelCove also uses Qwest as an underlying carrier for the TelCove Long Distance products including the 800 numbers for SmartBus. Any 800 call that is originated locally gets routed to Qwest and ultimately through TelCove's network to be terminated in the SmartBus call center. Pretty unwieldy way of completing a call.

Q. How long did this misrouting of calls go on?

A. While we at TelCove kept trying to correct the problem, it persisted in some form or another throughout my tenure at TelCove, which was at least through June of 2005.

Q. You are no longer with TelCove, how do you think they will react to your testimony?

A. I anticipate that TelCove will say that I don't know what I am talking about or that I am grossly misrepresenting the facts in this matter. However, I encourage TelCove to examine the AMA-Data from the TelCove Switch that is on file in Coudersport, Pennsylvania. The AMA Data does not lie. I have also been told first hand that senior management in TelCove has openly blamed Pat Markey and myself for these issues and further states this was never an accepted project by TelCove and even goes further to

label both Mr. Markey and myself "Detroit Rogue Employees." I personally take offense to that characterization because TelCove senior management including Bob Guth, (TelCove's President) Jeff Donahuge (TelCove's Executive Vice President for Sales and Pperations) and Craig Drinkhall (Executive Vice President of Engineering) were informed and on board every step of the way. There are several ways to prove this assertion. First, before accepting the business, at the regional meeting in New Jersey, there was a meeting held at which all of the senior management team were given Viso diagrams of how service to CORVUS was to work and be provisioned. Seated in the room were Mr. Guth, Mr, Drinkhall, Mr. Donahuge, and Rick Bruner, the Regional Operations Manager. Craig Drinkhall was the one who stated we could accomplish this service with no problem. So they were informed of this project before anything was set up for CORVUS.

Second, a Capital Authorization Request ("CAR") was created by me for the installation of equipment in the Collocation Room to support the physical and power requirements of the CORVUS DACS equipment. It was plainly spelled out in the CAR as to what was being installed and who the customer was. This CAR was approved and material issued for the project. This could not happen on just a local level as it had to be signed off by Mr. Bruner, Mr. Donahuge and, I believe it even went to Mr. Guth for final approval.

Q. What is the AMA Data?

A. To provision CORVUS' service, TelCove had a Lucent 5ESS Switch in its Melrose Avenue, Southfield, Michigan co-location facility. A function of that Lucent 5ESS Switch is that it archives a record of every call that passes through that switch, including flags of call code and structure that show how it is rated, dialed digits, and its destination trunk group. An examination of that data would conclusively demonstrate and verify everything I have testified to. While I do have copies of TelCove's AMA Data for the period in question, I have them in a format that cannot be read without specialized equipment and software. Thus the AMA Data I have is of limited value to this Commission in its current format. However, I know for a fact that TelCove has access to that same AMA Data and has access to the specialized equipment and software that would allow it to verify everything I have said above. This AMA data would also show test calls that were made and the improper rating and routing between the CORVUS RAX and the standard RAX for given rate centers.

Q. Do you have any further comments?

A. No, not at this time.

Importance: High

Mr. Coy,

As discussed, please accept this correspondence as confirmation of the agreement between the parties to extend Defendant's deadline to file an answer to the Complaint to July 6, 2006. If this meets with your understanding, please respond accordingly.

Mr. Horton,

I noted that you are the assigned case coordinator. Please advise if this does not meet with your (or Judge Eyster's) approval or if further information is required.

Thank you.
