

Dear Commissioner Peter Lark,

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent in energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

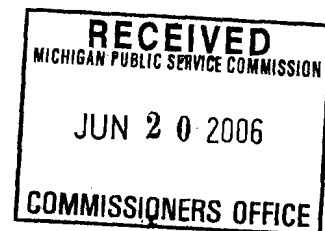

Please reply!

A handwritten signature in cursive script, reading "Cynrhia W. Washburn". The signature is written in black ink and is positioned above a horizontal line.

Cynrhia Washburn
1972 Chestnut St.
Holt, MI 48842-6504

Dear Commissioner Laura Chapelle,

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

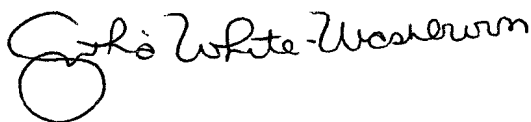

In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

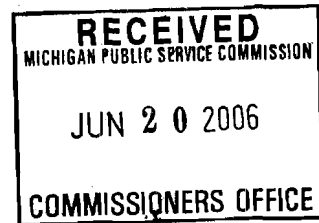

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent in energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Please reply!

A handwritten signature in cursive script, reading "Sarah White-Wasserman". The signature is written in dark ink and is positioned below the text "Please reply!".

Dear Commissioner Monica Martinez,

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

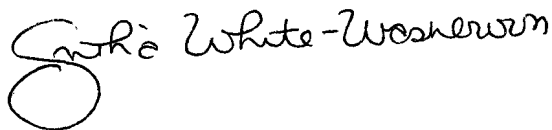

In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent in energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Please reply!

A handwritten signature in cursive script, reading "Sarah White-Washburn". The signature is written in dark ink and is positioned above a large, empty circle.

June 16, 2006

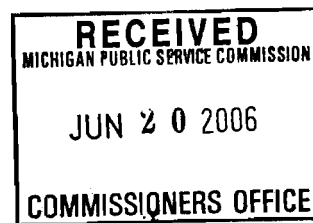

Commissioners Lark, Chapelle, and Martinez:

This is a letter imploring you to take action to plan for Michigan's future electric needs! I want to let you know that I support the option and use of clean, reliable and affordable energy.

- 1.) In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging will not be tolerated.
- 2.) In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
- 3.) The Energy Plan should encourage and fund energy-saving programs. For every \$1 spend on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

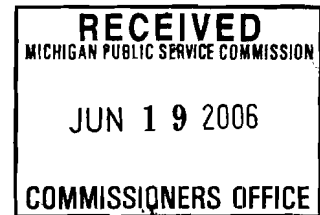

Please take our letters under consideration. .

Zachary Stone

1902 Dean Ave
Holt, MI 48842

June 12, 2006

Dear Commissioner Laura Chapelle,

I am writing to voice my support for more clean, reliable and affordable energy for our state.

In case U-14838, the Commission should insist that the DTE refund the 44 million dollars that it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be more cost effective and environmentally sound in the long term.

The Energy plan should encourage and fund energy-saving programs. For every \$1 spent on energy efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

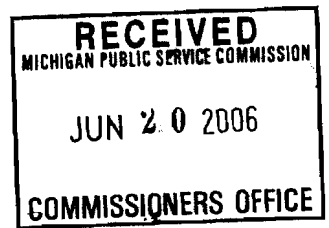

A reply to this letter would be greatly appreciated.

Thank you for your efforts as residents such as myself voice support in making Michigan a more fuel-efficient state.

Sincerely,

A handwritten signature in black ink, appearing to read "Ben Bierlein".

Ben Bierlein

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners,

I am writing to voice my concern over the following items:

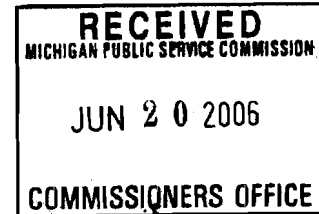

1. Utility Price Gouging - Please insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The Commission should send a message to call utilities that price gouging won't be tolerated.
2. Michigan Energy Plan –
 - a. In developing Michigan's 21st Century Energy Plan, the Commission should make renewable energy and energy savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
 - b. The Energy Plan should encourage and fund energy saving programs. For every \$1 spent on energy efficiently, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Please reply to let me know how these items are being addressed.

Thank you very much,

Angela Mitzel

June 16, 2006

Commissioners Peter Lark, Laura Chapelle and Monica Martinez
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners;

I am asking for your support in pursuing clean, reliable and affordable energy. We are all aware of the current energy crisis gouging the American citizens which in turn is hurting everyone from the poor to corporate. In Case#U-14838, the Commission should insist that DTE refund the \$44 million dollars, it received from its customers through over-earnings. The Commission needs to send a message to all Utilities that price gouging won't be tolerated. It's time to make the right calls for the public whom you represent.

Also, in developing the 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a Priority. The cost of wind energy is declining and will be much cheaper in the long run. The Energy Plan should encourage and fund the energy-savings programs. For every \$1 spent on energy efficiency, customers save \$2. This is a much better use of our money than building more costly fossil-fueled electric plants. We have to look at the long term effect, with eyes wide open. I encourage you to reply discussing your actions and views with documentation regarding your statistics. Thank you so much.

Sincerely,

A handwritten signature in cursive script, reading "Julie A. Regis".

:
Peter Lark; Commissioner
Michigan Public Service Commission
PO Box 30221
Lansing MI 48909

Dear Commissioner Lark,

As a lifetime resident of the great State of Michigan, I am excited to better understand your role in framing our state's energy policy and direction. An acknowledgement or reply to this communication would be appreciated.

If you would please consider the following points as it pertains to the public good of Michigan residents.

- In case U-14838 please send a strong message on behalf of the hard-working residents of this state that gouging will not be tolerated. Insist that DTE refund the \$44 million it gouged from customers in the form of over-earnings. I believe in the regulatory process when the common good is threatened. Greed always threatens the common good.
- Renewable energy and rewards for energy savings needs to be a priority going forward in this century. The idea that fossil fuels are plentiful and only becoming more expensive is pure folly. While at one time a large biomass of dinosaurs contributed to our modern world, there just aren't any more; it can't possibly get any better in the years to come. Wind could be viable, but a combination of wind and solar makes more sense. The infrastructure that supports wind-towers, and makes the power generated available to utility customers could also support solar collection. The wind here tends to be the most reliable when the fuel demands are the least (spring and fall). It is rare however that neither the wind, nor the sun are available here for energy exploitation.
- In the 1980s our family took advantage of Michigan's tax credit when we built a passive-solar, earth-sheltered home. The earth-shelter part had a longer payback than the passive solar. In spite of the predictions of western, lower Michigan not having much sun, we found the solar component well worth the minimal additional investment. Saving energy is a never-ending challenge. Developing new and re-new-able energy sources is also a challenge. Funding programs to do both is an instant pay-back for everyone in the State of Michigan.

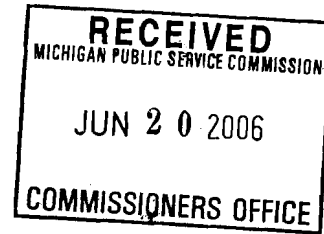

Please do your part to support the State of Michigan as a leader, and an innovator, in the energy challenge of the 21st Century. We have the talent and creativity to rise to the occasion.

Sincerely,

Michigan Public Service Commission
P. O. 30221
Lansing, MI 48909

Dear Commissioner Lark, Commissioner Chapelle, and Commissioner Martinez,

As a proud Michigan resident, I would like to request that our Public Service Commission do everything in its power to ensure that all residents are guaranteed affordable electricity. We have all grown dependent upon modern conveniences that require electricity, so now we must all work together to ensure that our state is making long term plans to provide this necessary energy at an affordable price.

As a DTE customer, I feel that the Commission should insist that DTE refund the \$44 million that was taken from customers through recent rate increases. I also feel that the Commission should make renewable energy and energy-savings a priority. The wind is a source of energy that will always be available. It is vital that this source of energy be utilized in our state. As the quote says, "A penny saved is a penny earned." If customers can save \$2 for every \$1 spent on energy efficiency, our Michigan economy will have a greater chance to grow and thrive.

I look forward to your reply so that I can become more knowledgeable about the long-term plans for our state's energy sources.

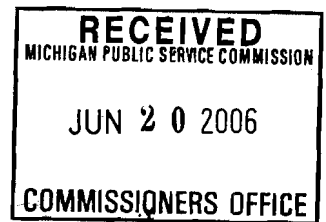

Sincerely,

Beth Widgren

P.O. Box 30221
Lansing MI ~~89009~~ 48909

I am urging you to take action for Michigan's future electric needs. The following are some of the points I would like you to consider:

1. In the case of U-14838, I am requesting that the Commission insist the DTE refund the \$44 million that was gouged from the customers through over-earnings. In addition I am requesting that the commission send a message to all utilities that price gouging will no longer be tolerated.
2. In developing the 21st century energy plan, I am requesting the Commission make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be a cheaper form of energy in the long run.
3. The energy plan should encourage and fund energy-saving programs. For every \$1.00 spent on energy-efficiency, customers save \$2.00. This is a better use of the energy monies than building more and more costly fossil-fueled electric plants.

Please reply to this request. My name and address are:

Barbara Van Dyke

Lansing, MI 48909

RE: Case U-14838

Dear Commissioners:

Over paying for electricity by Michigan residents should not be tolerated. Our economy is tough enough at this time; people losing jobs are not able to afford paying high energy costs. In case U-14838 the Commission should insist that DTE refund the \$44 million collected from its customer as a result of over-earnings. The commission should send a message to all utilities that over-pricing will not be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run. It is also cleaner for the environment.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more costly fossil-fueled electric plants.

I thank you for time and hope to hear from you regarding any decisions in this matter.

Sincerely,

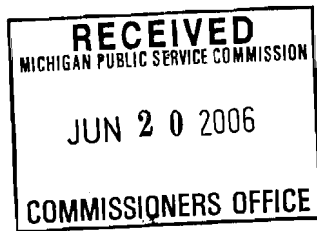

A handwritten signature in cursive script, appearing to read "Joanne Wozniak".

June 15, 2006

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez

I am writing this letter to you to voice my concerns about clean, reliable and affordable energy now and into the future for the state of Michigan.

With the state being in the position that we are in, with all of the electrical energy having to come up from the south, we need to be pro-active in our approach to supply the needs for the citizens of the state. Along these lines I think the commission should insist that DTE refund the \$44 million that it has gouged from its customers through over-earnings. The commission should also send a message to all utilities that price gouging won't be tolerated.

As far as thinking about the future, when the commission is developing their 21st Century Energy Plan they, should make renewable energy and energy-savings a priority. Included in that plan should be a provision that would encourage and fund energy saving programs. For every \$1 spent on energy efficiency, customers would save \$2. This would be a better use of money than building more and more costly fossil-fueled electric plants.

Another concept that we should look into is the use of wind farms to generate electricity, which would reduce our dependence on other forms of generating electricity.

I look forward to hearing from you regarding these important issues and how you plan to provide the State of Michigan with a cost-effective electrical energy supply.

Sincerely,

A handwritten signature in black ink, appearing to read "Gerald Avery".

Gerald Avery

June 16, 2006

Bill Perry

To: Peter Lark, Laura Chapelle, and Monica Martinez

From: Bill Perry, 4120 Turnbridge Dr., Holt, MI 48842

Subject: **Michigan's Future Electric Needs**

I am writing to raise the following issues:

- Case U-14838; the PSC should insist that DTE refund the \$44 million in over-earnings. This should not be tolerated, and a clear message to all utilities must be made.
- Strong efforts must be initiated by the PSC to promote renewable energy and make conservation and energy savings a priority. This effort must include an all out effort to reduce fossil fuels and encourage alternatives such as low cost wind energy.

I would appreciate knowing more about your commission's efforts in the promotion of alternative fuel programs, with a reply to this letter.

June 16, 2006

Commissioners Peter Lark, Laura Chapelle &
Monica Martinez,

If the DTE gouged us \$44 million through overearnings, I want a refund. Or the DTE could put that huge profit towards renewable energy programs. Renewable energy should be top priority! We have no right to the use of most of the fossil fuels for this world. Let real there's a lot of us out there that don't want to make our environment worse with the majority of our energy coming from fossil fuel.

Kathy Gencich

Lake Orion, MI 48362

Laura Chapelle, Peter Lark, + Monica Martinez
Michigan Public Service Commission
Po Box 30221
Lansing, MI 48909

I am writing because I am concerned about the toll our energy use is taking on the environment. As a commissioner for the State of Michigan, I am asking you to please consider renewable energy as an alternative to the more polluting forms of energy in use today. There are many forms of renewable energy that would go along way to help slow down the negative effects we have placed on the planet. Our high dependency on fossil fuels needs to change. Wind energy is an alternative to fossil fuels. Though the initial costs of changing over to a renewable energy source may seem costly, in the long term it will save money and more importantly it would help the earth. Please develop an energy plan for the 21st Century. Be forward thinking and consider renewable forms of energy.

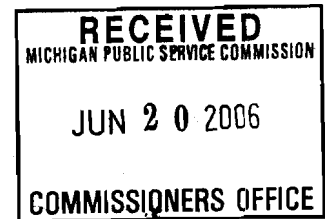

Sincerely,

Lisa Clapsaddle

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commission
PO Box 30221

TO: Commisioners Peter Lark, Laura Chapelle and Monica Martinez
Michigan Public Service Commision
P.O. Box 30221
Lansing, MI 48909

RE: Energy Cost Escalation and Michigan Income Decline

It would appear, the time has come to seek alternative types of energy sources. Michigan residents are witness to and faced with ever increasing energy costs. This trend is inversely proportionate to the trend of the Michigan workforce, who continue to see their incomes threatened by reduced wages or layoffs. There does not appear to be any directed effort in force to develop or harness the natural powers of wind or water to generate an alternative energy means. Such R&D could result in job creation and energy cost reductions if properly planned, engineered and developed for future needs. Now is the time to engage such relief efforts, prior to the economy hitting a devastating and potentially unrecoverable slump.

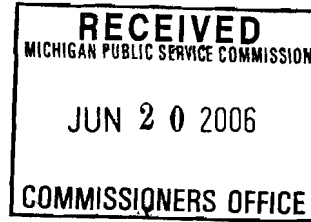

The major utility companies who seem to fully capitalize on their customer's needs and weaknesses, perhaps need to be directed to set aside some reasonable percentage of their profits. This would show good faith to the economy, their customer base and the Michigan governing officials. If these Utility Companies are not just gouging their customer base to earn higher profits, but have a humanitarian and economically just purpose for their existence, then public opinion and support might change in their favor.

As this is currently not the case, something should be done to work toward the future preservation of energy needs to cost ratios, such that your Michigan constituents can feel comfortable they have chosen the correct representation to express their concerns upon listening ears.

Sincerely,

Paul A. Hesse

Re: Michigan's future electric needs!

In Case U-14838 commissioners should insist that DTE refund, the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging will not be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy an energy-savings a priority. The cost of wind energy is declining. It will be cheaper in the long run.

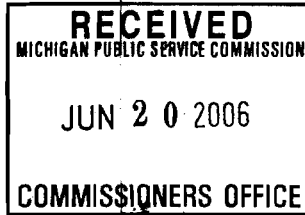

The energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building increasingly costly fossil-fueled electric plants.

I anxiously await your reply regarding your proposed solution to our energy crisis.

Sincerely,

Donna Beauchamp, Michigan Resident and homeowner

Charles E. Beauchamp
1981 Lochmar Blvd
Oakland, MI 48863

June 15, 2006

Dear Commissioners:

Being recently approached by some people who believe strongly in a cleaner, more reliable form of energy has caused me to write to you in regards to the same matter.

In case U-14838, please have the commission insist that DTE refund \$44 million it gouged from its customers through over-earnings.

In developing a new energy plan please consider renewable energy as an alternative source to help keep costs down for consumers.

I know you have many things to consider on a daily basis but I certainly appreciate your time and consideration. Also, a short reply would be appropriate showing your consideration of my opinions and the decisions you will be making. Thank you!

Brian Chadwick
1912 Schoolcraft
Holt, MI 48842

Commissioners Peter Lark, Laura Chapella, & Monica Martiney.
Michigan Public Service Commission
P.O. Box 30231
Lansing, Mi. 48909

Commissioners:

In a time when our utility bills are rising to a point where we can hardly pay them, it seems you should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-saving programs.

In Case U-14838, the Commission should insist that DTE refund the \$44 million it took from its customers through over-earnings. We are tired of price gouging by utilities and you as a Commission should send a message to all utilities that it won't be tolerated.

Please let me hear from you on this matter.

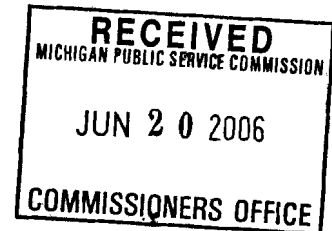

Respectfully,

Gladys Streight
195 Hiram

Lt. Orion, Mi 48360

10-15-2006

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commission
PO Box 30221
Lansing, MI 48909

Dear Commissioners,

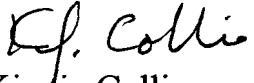

In case U14838, the Commission should mandate that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper and cleaner in the long run.

The Energy Plan should encourage and fund energy-savings programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

I would appreciate the courtesy of a reply to this letter. These requests are important to the future of our State, our Country, and most importantly, our children!

Thank you,

Kirstin Collie

:
Peter Lark; Commissioner
Michigan Public Service Commission
PO Box 30221
Lansing MI 48909

Dear Commissioner Lark,

As a lifetime resident of the great State of Michigan, I am excited to better understand your role in framing our state's energy policy and direction. An acknowledgement or reply to this communication would be appreciated.

If you would please consider the following points as it pertains to the public good of Michigan residents.

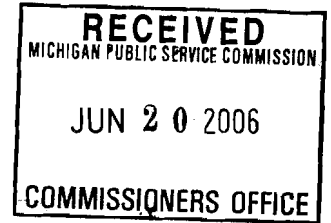

- In case U-14838 please send a strong message on behalf of the hard-working residents of this state that gouging will not be tolerated. Insist that DTE refund the \$44 million it gouged from customers in the form of over-earnings. I believe in the regulatory process when the common good is threatened. Greed always threatens the common good.
- Renewable energy and rewards for energy savings needs to be a priority going forward in this century. The idea that fossil fuels are plentiful and only becoming more expensive is pure folly. While at one time a large biomass of dinosaurs contributed to our modern world, there just aren't any more; it can't possibly get any better in the years to come. Wind could be viable, but a combination of wind and solar makes more sense. The infrastructure that supports wind-towers, and makes the power generated available to utility customers could also support solar collection. The wind here tends to be the most reliable when the fuel demands are the least (spring and fall). It is rare however that neither the wind, nor the sun are available here for energy exploitation.
- In the 1980s our family took advantage of Michigan's tax credit when we built a passive-solar, earth-sheltered home. The earth-shelter part had a longer payback than the passive solar. In spite of the predictions of western, lower Michigan not having much sun, we found the solar component well worth the minimal additional investment. Saving energy is a never-ending challenge. Developing new and re-new-able energy sources is also a challenge. Funding programs to do both is an instant pay-back for everyone in the State of Michigan.

Please do your part to support the State of Michigan as a leader, and an innovator, in the energy challenge of the 21st Century. We have the talent and creatively to rise to the occasion.

Sincerely,

Cathy Taylor

June 12, 2006

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners,

Please make an effort to keep our electric rates affordable while protecting the environment through the use of wind power.

Your support of the following would be greatly appreciated:

1. Stop utility price gouging and insist that DTE refund the excess it charged its customers.
2. Please make renewable energy a priority by using wind energy, instead of fossil fuel, because it is more efficient and cheaper.

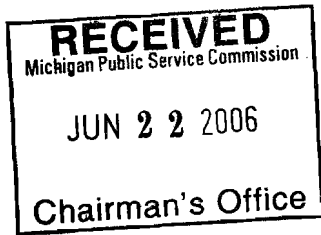

3. Keep the money in Michigan. Don't buy power from out-of-state companies.

Also, Michigan is behind other states in terms of promoting wind power and energy conservations. We need to protect Michigan citizens from rising electric costs now. Please be proactive in making Michigan a state that invests in wind energy. I hope to hear from you on this matter.

Sincerely,

A handwritten signature in cursive script that reads "Barbara Reinke".

Barbara Reinke

58 Devonshire Rd.
Pleasant Ridge, Michigan
48069-1211

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

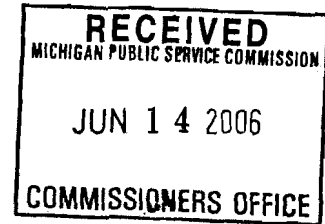

It has come to my attention in the case of U-14838 that I must implore the commission to insist on a refund to customers from DTE for the price gouging to the tune of forty-four million dollars and let this be a lesson that these kind of actions will not be tolerated in the future.

We need a new sustainable energy plan for the future. It is now becoming highly recognized by the common man or woman that our old fossil fuel and nuclear power plants are not the answer. Wind power is becoming commonplace in many advanced industrialized countries and we need to get up to speed.

Why is it that our energy plans for so long have not encouraged energy efficiency? We need to look at incentives for energy saving programs. Customers could save in the future by investing in alternative energy sources today. I for one would be happy to see wind turbines in our state in strategically located areas that maximize on efficiency and give us and our children a better future.

Please reply to my concerns for a better energy policy.
I wish you Peace. Best regards, R. Foster Sayles

June 9, 2006

Commissioner Laura Chapelle
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Laura,

In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Thank you for taking the time to read my letter.

Dear Sir/Madams

Re: Concern for Michigan's Future Electric Needs.

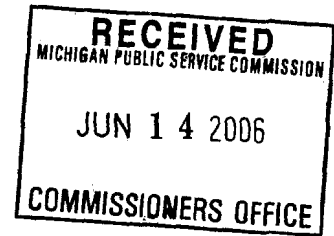

As a concerned consumer and user of energy, I would like to advocate that the following points be looked into

1. In case U-14838, the commission should insist that DTE refund the \$44 million it gouged from its customers through over-earning. The commission should send a message to all utilities that price gouging won't be tolerated.
2. In developing its 21st Century Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
3. The Energy plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

As consumers of energy, we have responsibilities as to how we use and preserve it and hence the commission should consider the above mentioned points seriously and importantly.

Concerned customer.

Joshi Havaladar
Architect.

To: Commissioners Peter Lark, Laura Chapelle, and Monica Martinex,

We would like you to take action now for future energy needs.

It is of a great concern to us that we take action now as responsible caretakers of the world we live in. Michigan has always been our home and we are actively taking a part in its future not only for us but for generations to come.

1. In case U-14838, the Commission should insist DTE refund \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

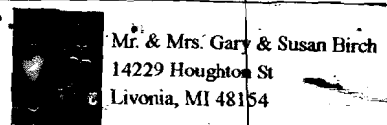

2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-saving a priority. The cost of wind energy is declining and will be cheaper in the long run.

3. The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money rather than building more and more costly fossil-fueled electric plants.

We thank you for your time spent on reading our letter of concerns to you. We would like if possible a response with your thought, and your concerns regarding the energy here in Michigan.

Sincerely,

Gary and Susan Birch

Lansing, Michigan 48909

Dear Commissioners Lark, Chapelle and Martinez:

I am writing you to voice my support of the work being done by the Michigan Consumer Federation with regard to the escalating cost of utilities in Michigan.

I request action on the following:

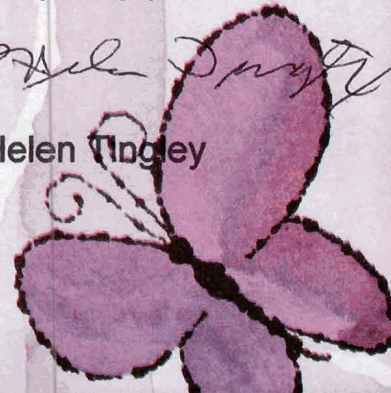

- 
- 1) In case no. U-14838, I support your efforts in insisting that DTE refund the \$44 million dollars it has overcharged its customers through over-earnings. Please let them know that this type of action will not be tolerated.
 - 2) I support efforts to discover and put to use alternative and renewable energy.
 - 3) I support customers receiving a financial benefit when they choose to conserve energy.

Thank you for your time and efforts to correct this problem.

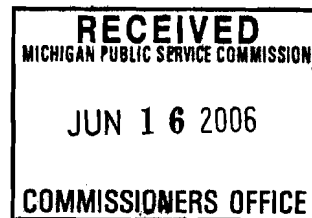

Very truly yours,

Helen Tingley

THE BUREK'S

June 12, 2006

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez

Dear commissioners:

I am writing this letter to urge the Commission to make renewable energy and energy savings a priority in developing its 21st Century Energy Plan.

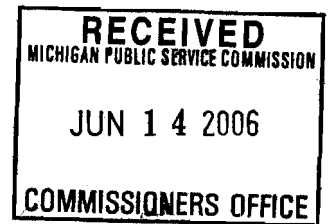

I've visited Japan, (a nation that must import all their energy) and I believe we can do so much more here to save energy. I've already replaced nearly three dozen light bulbs in my house with compact florescent lamps. I don't know if the average consumer realizes what a deal these are. In the old days, Detroit Edison gave away light bulbs. Now that low cost CF exist, Detroit Edison could be encouraged to hold lamp exchange programs instead building new fossil fueled power plants. The schools could teach the kids how CF can save energy. If we raise the awareness, then we all can have a positive impact to future and our children's future. Thank you.

Sincerely,

A handwritten signature in black ink that reads "Mark Burek". The signature is written in a cursive, slightly slanted style.

Mark Burek

June 12, 2006

Commissioners Peter Lark, Laura Chapelle, & Monica Martinez
Michigan Public Service Commission
PO Box 30221
Lansing, MI 48909

Dear Commissioners,

As a Michigan resident and consumer I would like to voice my support for clean, reliable, and affordable energy. If DTE gouged over \$44 million from customers, then that money should be returned to the consumers rather than padding the pockets of corporate CEOs. The Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants. Thank you for your time, and a reply to my letter would be greatly appreciated.

Sincerely,

Dani Tubbs
Livonia, MI

June 12, 2006

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

I teach middle school science in Northville. This past year my eighth graders entered the Future City Competition held in Novi. We ended up winning the most Energy Efficient City award because we had three different energy sources in our city. One of the sources was wind energy. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. In a state like Michigan, wind energy makes a lot of sense. The cost of wind energy is declining and will be cheaper in the long run. I would hope that the Energy Plan would encourage and fund energy-saving programs. For every dollar spent on energy efficiency, customers save two dollars. This is a better use of money than building more and more costly fossil-fueled electric plants. From what I understand in case U-14838, the commission should insist that DTE refund the forty- four million dollars it took from its customers through over-earnings. The commission should send a message to all utilities that price gouging will not be tolerated.

Sincerely,

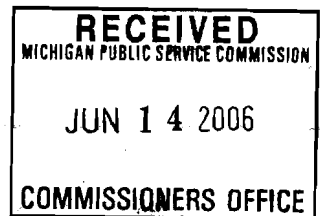

Shirley Shaw

June 7, 2006

Dear Commissioners,

I write you in support of clean, reliable,
renewable, and affordable energy.

Regarding energy use and planning,
in particular, I urge you in case U-14838
to send a strong message that price gouging
won't be tolerated and insist that DTE refund to
customers the \$44 million ~~not~~ obtained through
overearnings;

① to make renewable energy and energy-savings
(e.g., wind power)
a priority in developing the Michigan Public Service
Commission 21st Century Energy Plan; and
③ ensure that the Energy Plan encourages and funds
energy-saving programs.

I look forward to your reply.
Sincerely, JoAnn Zanotti

1. In case U-14838, the commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

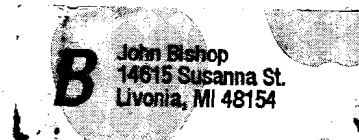

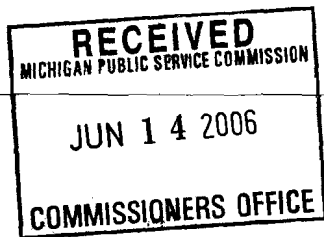

2. In developing its 21st Century Energy Plan, the commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

3. The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

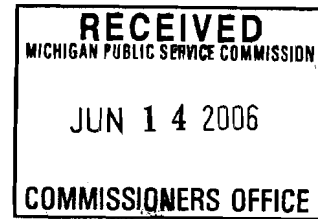

Please respond on what your intentions will be to resolve the potentially continual drain on our energy supplies and the savings we may expect in the future.

THIS NOTE IS SPECIFICALLY ADDRESSED TO THE
FOLLOWING: Peter Lark, Laura Chapelle, and Monica Martinez.

John R. Bishop

June 9, 2006

Michigan Public Service Commission

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

My family and I are interested in the potential Michigan has to help reduce the energy produced pollution from the fossil fuel sources. The cost of energy is out of reach for many fixed income households.

We would appreciate your support in case U-14838 and that you strongly recommend compensation from the DTE Company to its customers.

Now and in the future, could this commission please continue to be an advocate for this great state and the struggling citizens who must deal with the fallout of this political and economic climate left for us to manage?

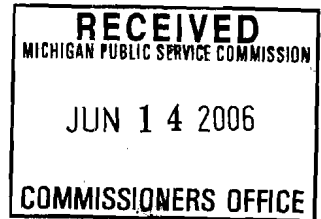

We would hope that you are looking into all possible and manageable Energy plans that would help to cut costs of energy, that will create a simple efficient energy system, and make it available to all Michigan citizens whether they can afford it or not.

Thank you for your research and analysis.

Maureen E. Palmer
Livonia, Michigan

A handwritten signature in cursive script, appearing to read "Maureen".

Wednesday, June 07, 2006

Dear Commissioners Peter Clark, Laura Chapelle, And Monica Martinez,

This is a request on behalf of my future grandchildren, great-grandchildren, great-great-grandchildren etc. We have grown as a nation to better ourselves and try to do what is best for everyone but I have to say things have gotten out of control!!! I mean to say that these large companies are making more and more for their own gains without a thought of the future of all the people who help to give them those gains. My own children are working longer and for alot less money when you consider the time they invest to keep companies going for their own gains. They downsize which puts them with longer hours and many people out of work who really need to work. We have been very fortunate to have paid our both sons college in full and they still work very long hours. Lets give our children's children their mom and dads to enjoy them as they are small ,as time passes too fast before they are grown and gone.

Here are some ideas:

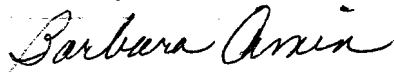

1. In case U-14838, the commision should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commision should send a message to all utilities that price gouging will not be tolerated.
2. In developing its 21st Century Energy Plan, the commision should make renewable energy and energy savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
3. The Energy Plan should encourage and fund energy-savings programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Let us recycle and use buildings standing empty. Clean up all the messes we made in our generation for our grandchildren to breathe without all the dirt and bad air we have created .

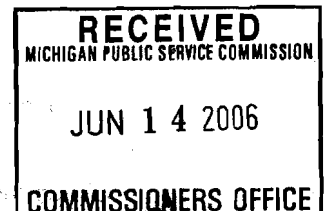

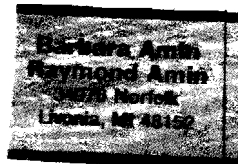

I would appreciate your statements on this matter in a letter form addressed to: Barbara Amin
34970 Norfolk
Livonia, Mi 48152

Thank you for taking the time to read this.

Sincerely,

Barbara Amin

6-6-06

Dear Commissioners Lark, Chapelle, & Martinez,

Please support clean, reliable, and affordable energy. Make renewable energy a priority ~ investigate wind energy. Then Energy Plan should include energy-saving programs. Price gouging should not be tolerated! A reply is requested.

Sincerely,
Darcie Martin
1019 Clover St.
Kalamazoo, MI 49008

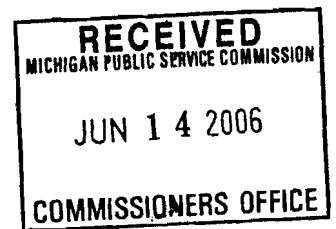

Dear Commisioners:

In case U-1438, the Commission should insist that DTE refund the \$44 million that it gouged from its customers through over-earnings. The commission should send a letter to all utilities that price gouging will not be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

Thank you for your time and consideration,

M. Kolb

Lansing, MI 48909

June 8, 2006

Commissioners:

This letter is on behalf of the campaign for clean, reliable, and affordable energy!
I am writing for my children, who need a plan in place before they are grown for
renewable and affordable energy. Why not use more wind energy - one of the few that is
declining in cost? Do we need to continue to rely so much on fossil fuels?

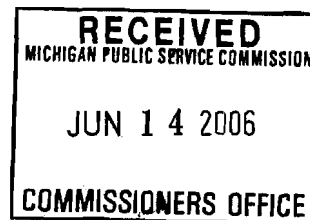

And I am also writing on behalf of those on fixed income, who must choose between
food, medicine or heat in the winter. How much of a profit do companies like DTE really
need to survive? \$44 million seems excessive!

What are *you* doing as commissioners for the people of this state, not just the businesses?

Sincerely,

Renee A. Beck

P.O. Box 30221
Lansing, MI 48909

Commissioners,

I feel in the case of U14838, the commission should demand that the DTE power company refund the \$44,000,000.00 of over earnings to its customers. This is only fair to all involved.

The commission should also direct all other utilities that overcharging customers will not be tolerated!

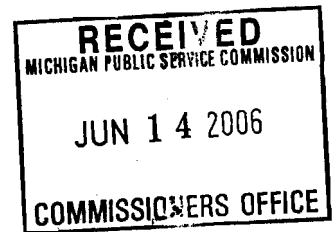

In developing your 21st Century Energy Plan the commission should prioritize renewable energy and energy savings. For every dollar spent on energy efficiency, the customer saves two. This is by far a better use of the monies than building fossil-fueled generating plants.

Please reply to this letter to the above address.

June 8, 2006

Dear Commissioners:

I am writing to you regarding Michigan's utility rates. In the case of U-14838, the Commission should insist that DTE refund the **\$44 million** that was gouged from its customers through over-earnings. The Commission should send a message to all utilities that price gouging will not be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run. There should be tax incentives offered for alternative energy users. There should be enough education and incentive to make it the preferred energy source.

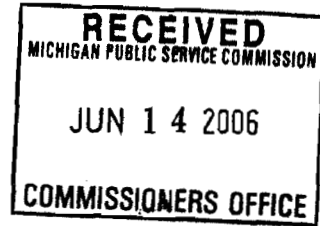

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of funds than building more and more costly fossil-fueled electric plants.

Thank you for your time. You should know that this is an important issue to all of Michigan's residents.

Sincerely,

A handwritten signature in cursive script that reads "Tara E. McCrackin".

June 7, 2006

Dear Commissioners Peter Lark, Laura Chapelle and Monica Martinez,

This letter is written to ask for your support in addressing the many energy problems in our state of Michigan. Please make energy planning and energy saving a priority. Do make sure that energy plans encourage, and fund programs that save energy.

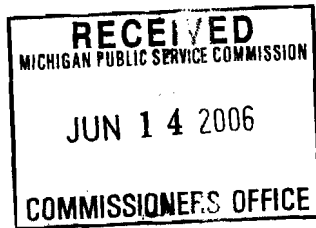

The price gouging from citizens must be stopped. Perhaps asking that DTE refund the millions that it has received from vulnerable customers would be an effective strategy.

Thank you for working on this very serious problem in our beautiful state. I would appreciate a reply that addresses the activity toward these goals. Thank you.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Diane White".

Diane White

Monica Martinez

Michigan Public Service Commission
P.O. Box 30221
Lansing MI 48909

Commissioners:

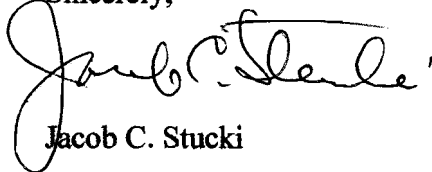

This letter is to encourage you to find for the consumers in Case U-14838.

I would also ask you in developing your 21st Century Energy Plan to consider first and foremost the development of wind energy. I have recently read, although I cannot find the reference at the moment, that the east coast of Lake Michigan is one of the world's steadiest producers of winds suitable for energy production. I urge you to take that into consideration as you develop your plans.

I am aware that many people regard "wind farms" as eyesores and would object to seeing fans in their view as they looked out over the beautiful lake. I look out over the lake myself and would prefer that the view be unobstructed, but this alternative beats all fossil-fueled energy plans.

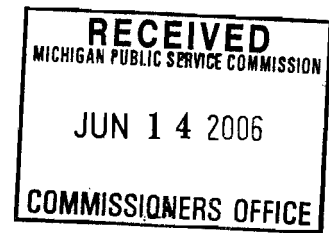

Thank you for considering this viewpoint. I would appreciate a reply to this letter.

Sincerely,

Jacob C. Stucki

June 7, 2006

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commission
P.O. Box 30221
Lansing, Michigan 48909

Dear Commissioners Lark/Chapelle/Martinez:

Enough is enough! I'm tired of paying extra money for utilities because all decisions are made *for* the utility companies *by* the utility companies. After DTE cried "poverty", it received a \$335 million annual rate increase – a 7% increase for residential customers. After the increase was approved, DTE reported 2005 corporate earnings that were \$44 million greater than it had told state regulators. Their needs to be a regulation set into action. Without a planning process implementing cheaper power, energy conservation and efficiency, ratepayers will continue to be gouged by unwarranted electric bill increases. In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

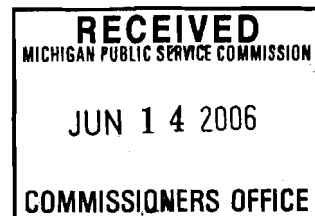

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

I have lived in Michigan for more than 47 years and to see our beautiful state being handled and taken over by industrial corporations that only believe in one thing "filling their pocket books" will be Michigan's destruction. The commission must speak out and represent the people of Michigan.

I would like an answer as to the plans of the commission regarding this most urgent problem.

Respectfully yours,

Mrs. Nancy Siegle
19352 Southampton Drive
Livonia, MI 48152

Dear Commissioner,

I would like you to send a message to all utility companies that price gouging will not be tolerated. I believe DTE should refund the \$44 million it gouged from its constomers in 2005. Also the cost of wind energy will be cheaper in the long run and you should make renewable energy-savings a priority. I would also be interested in a energy-savings plan that would encourage my family to purchase energy efficient appliances. Please keep me informed of any actions you may be taking.

Sincerely,

Michael T. Elwell

PO Box 30221
Lansing, MI 48909

Commissioners, Peter Lark, Laura Chapelle & Monica Martinez

In Case U-14838 I understand DTE has overcharged its customers by \$44 Million. I urge you to insist that DTE refund that \$44 Million that rightfully belongs to their customers especially since customers have no choice is who will deliver their utility needs regardless of who the supplier is.

Renewable energy needs to be a priority for Michigan as current energy sources are not endless and our dependence on foreign sources puts us all at risk. In addition renewable sources will ensure an endless supply.

An energy savings program whereby every dollar spent on energy efficiency would reward the consumer with two dollars in energy savings. Money spent in this capacity will be much better use of funds than building electric plant that require foreign or dirty fuel sources such as fuel or coal.

Thank You,

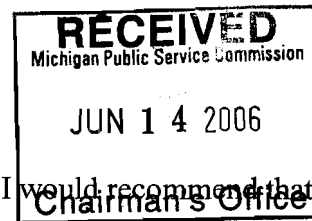

Bob Domino

To Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

Being a citizen of Michigan for my entire life, I am very concerned about the future energy needs of the state, and how they are handled. I fully support the Michigan Consumer Federation on its stand on the following 3 issues:

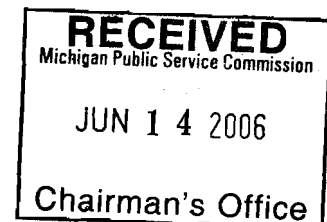

- 1) **In case U-14838**, the Commission should insist that DTE refund the \$44 million it has gouged from its customers through over-earnings. The commission should send a message to all utilities, including the petroleum gas utilities that price gouging will not be tolerated.
- 2) **In developing it's 21st Century Energy Plan**, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be much cheaper in the long run.
- 3) **The Energy Plan should encourage and fund energy-saving programs**. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Sincerely,

John J. Lach

June 9, 2006

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez:

I'm writing this letter in hopes that you will please change our laws so that we will have cleaner, more reliable and more affordable energy options.

Please consider the following:

- 1) Regarding case U-14838, the Commission should insist that DTE refund the \$44 million that it gouged from its customers through over-earnings. You should send a message to all utilities that price gouging **WON'T BE TOLERATED** now or ever!
- 2) Also, in developing your 21st Century Energy Plan, you should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run. Wind energy will provide long-term cost savings while keeping more money in the Michigan economy (IDEAL plan!). Michigan needs to be a leader in developing clean and affordable renewable energy.
- 3) Lastly, the Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers could save \$2! This is a much better use of money than building more costly fossil-fueled electric plants.

Thank you for your time and please reply! As a taxpaying citizen and proud Michigan resident, I'd like to see what the future holds in terms of our energy plan.

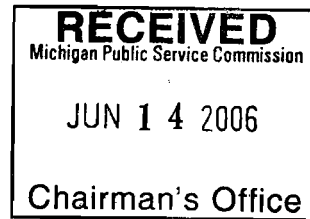

Sincerely,

A handwritten signature in cursive script, reading "Christina Underwood". The signature is written in black ink and is positioned above the printed name.

Lansing, MI 48909

Dear Commissioners,

I am writing concerning Michigan's future of energy and environment. I am concerned that we are looking for short-term answers in a long-term world. If we want our state to succeed we need to be willing to work, think ahead and sacrifice when necessary.

In case U-14838, the commission should insist that DTE refund the \$44 million that it gouged from its customers through over-earnings. By doing so the commission would send out a message to all utilities that price gouging will not be tolerated. If we do not support the residents of the state they will cease to be residents.

In developing a 21st century energy plan, the commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run. Again, paying a small price now will reap large rewards in the future.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and ore costly fossil-fueled electric plants. If we want to encourage science research and development in this state we should show that we are seriously interested.

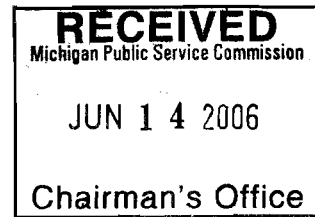

Please keep the future of the state in mind as well as the present.

Sincerely,

A handwritten signature in black ink, appearing to read "Nancy B. Kurtz". The signature is fluid and cursive.

1. Case U-14838. Please insist that DTE refund the \$44 million gouged from its customers thru over/earnings. Please send a message to all utilities that price gouging won't be tolerated.
2. In developing its 21st Century Energy Plan. Please make energy + energy-savings your priority. The cost of wind energy is cheaper.
3. The Energy Plan could fund energy-saving programs. We do not need more costly fossil-fueled electric plants.

Dear Commissioners:

I am very concerned about a lack of renewable energy resources in Michigan. In developing its 21st century Energy Plan, the Commission should make renewable energy and energy savings a priority. The cost of wind energy is declining and will be cheaper in the long run. The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants. Finally, in case U-14838, the Commission should insist that DTE refund the *\$44 million dollars* it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

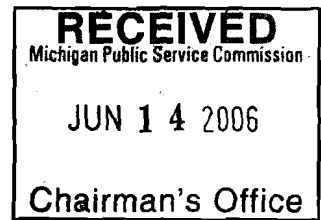

Please reply with a response to these issues.

Sincerely,

A handwritten signature in black ink that reads "Holly Rapin". The signature is fluid and cursive, with a long horizontal flourish extending to the right.

To Whom It May Concern:

As a Michigan citizen, I have some points I would like to make:

In case U-14838, I believe that the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging will not be tolerated.

Also, in developing its 21st Century Energy Plan, the commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will continue to become cheaper in the long run. Not only as a state, but as part of the world it is our responsibility to reduce green-house emissions and make our planet safer. If we don't take care of it now, it will only come back to haunt our children and our children's children.

The Energy Plan should also encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plans.

Thank you for your time, and I sincerely hope you take my points into consideration for a brighter tomorrow.

Thank You,

A handwritten signature in black ink that reads "Chelsey Curry". The signature is written in a cursive, flowing style.

Chelsey Curry

A handwritten address in black ink. It reads "Chelsey Curry" on the first line, "38559 Tuscony Ct." on the second line, and "Livonia, MI 48154" on the third line. The handwriting is somewhat informal and slanted.

Dear Commissioners,

I am writing to voice my support for clean, reliable and affordable energy. I believe in case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

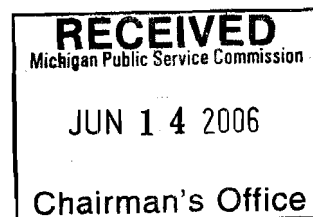

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

I would appreciate a reply.

Sincerely,

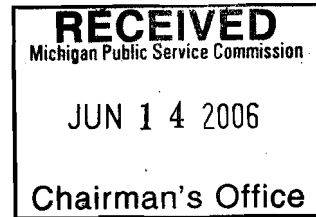

Jacob Brosky

Attn: Commissioner Peter Lark
Commissioner Laura Chapelle
Commissioner Monica Martinez

Commissioners:

I am writing to ask that you give support to and adopt the following positions concerning a comprehensive energy plan for Michigan's future.

- (1) In Case U-14838, the Commission should insist that DTE refund the \$44,000,000 it improperly and illegally gouged from its customers through over-earnings. The Commission should send a strong message to all utilities that price gouging will not be tolerated.**
- (2) In developing an energy plan for Michigan in the 21st century, the Commission should make renewable energy and energy savings a priority. The cost of wind energy, for example, is declining and will be cheaper in the long run.**
- (3) The energy plan for Michigan's future should encourage and fund energy-saving programs. For every \$1.00 spent on energy-efficiency, consumers save \$2.00. This is obviously a better use of money than building more and more costly fossil-fueled electric plants.**

I would appreciate a reply from each of you concerning these proposals. A self-addressed and stamped envelope is enclosed for that reply.

Surely, it does not require a knowledge of "rocket science" to look at the state of the energy crisis in both Michigan and the United States as a whole to see that decisive action is now required to cure not only current problems but also the far worse problems that will plague all of us in the future if such action is not taken.

Once again, I believe that these matters require your urgent attention; and I trust that you will carry out your duty to the citizens of Michigan by giving these matters your careful consideration.

Yours truly

A handwritten signature in dark ink, appearing to read "Lance R. Mather", with a stylized flourish at the end.
