

Commissioners;

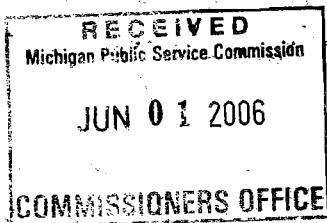

No return address 5/25/06

I am writing in regard to the high utility costs. I am aware that energy plans are available & useful in many ways. First, for every dollar spent on energy efficiency, we, as customers, save \$2.00. We could do this or build more costly fossil-fueled electric plants.

We should utilize wind energy which saves both energy & money. Finally, the DTE should be made to refund the \$4 million

charged from its customers. A strong message would be sent that this practice will not be tolerated.

Sincerely,
The Campbells

Ms. Joan Ball

To Commissioners
Peter Clark Laura Chapelle
Monica Martinez

The Commission should end
D J C. refund 44 million it
got from customers in case 142
and send a message to all
utilities that price gouging
won't be tolerated. Every 1%
spent on energy-efficiency,
customers should save \$2.00
and stop building more costly
fossil-fueled electric plants

Support Our Troops
Remember Our Veterans

N3097

The Commission should
make renewable energy-
savings a priority. The cost
of wind energy is declining
and will be cheaper
in the long run.

(No Return Address)

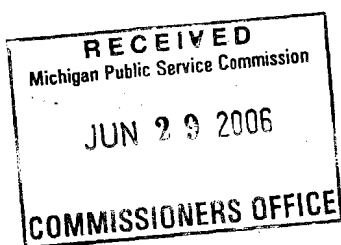

Dear Commissioners,

6-26-06

1. In case 4-14838 The commission should insist that
d I E refund \$44 million it gouged from its customers
through over-earnings. The commission should send a
message to all utilities that price gouging won't be tolerated.
2. In developing its 21st Century Energy Plan, the Commission
should make renewable energy and energy-savings a
priority. The cost of wind energy is declining and will be
cheaper in the long run.
3. The Energy Plan should encourage and fund energy-
savings programs. For every \$1.00 spent on energy
efficiency, customers save \$2.00. This is a better use of
money than building more & more costly fossil-fueled
electric plants.

Sincerely,
Pat Fuelling

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners Lark, Chapelle, Martinez:

As a resident of the State of Michigan, I encourage you to make renewable energy and energy-savings for all residents of our great state a priority in the 21st Century Energy Plan. Wind energy will be a cost effective and welcome source of renewable energy, as its cost is declining and will be cheaper in the long run.

I also urge you to encourage and fund energy-savings programs. For every dollar spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

In case U-14838, the commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a clear and decisive message to all utilities, including communications, electric and gas service companies, that price gouging won't be tolerated.

Please kindly reply to let me know what your plans are on these issues and what you are doing to protect the interests of all consumers of Michigan utility services.

Sincerely,

A handwritten signature in dark ink, appearing to read "John M. Thomas".

June 27, 2006

Dear Commissioner,

I am writing to voice my support for clean, reliable and affordable energy for Michigan residents. In developing an energy plan for the 21st century, I ask that the Commission make renewable energy and energy-savings a priority. I especially request that the use of wind energy be investigated. Any energy plan should encourage as well as fund energy-saving programs.

In addition, in case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. In doing this, the Commission would send a message to all utilities that price gouging won't be tolerated.

Thank you for your consideration. A reply would be greatly appreciated.

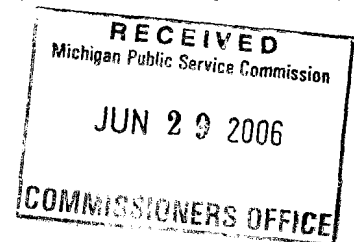

Sincerely,

Brenda Marshall

DEAR COMMISSIONERS:

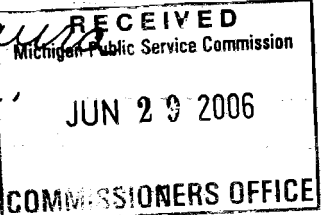

RENEWABLE ENERGY MUST BE A PRIORITY FOR DEVELOPMENT, AS FOSSIL FUEL SUPPLIES RUN THIN. WHILE FOSSIL FUEL PLANT DEVELOPMENT MAY BE A SHOT IN THE ARM TODAY, SUPPLIES INEXORABLY EXHAUST. RENEWABLE WIND ENERGY MUST BE CONSIDERED, FOR EXPEDIENCY IS NO SUBSTITUTE FOR A LONG-TERM ENERGY SOLUTION. EVERY DOLLAR SPENT ON ENERGY EFFICIENCY RETURNS TO CONSUMERS AS A SAVINGS OF TWO. FINALLY, I SHALL TOLERATE NO FORM OF PRICE GOUGING FROM UTILITIES SUCH AS THE DTE, WHICH OUGHT TO REFUND THE \$44 MILLION IT UNDULY WRESTLED FROM ITS CUSTOMERS. TAXPAYERS FUND THE GOVERNMENT SO THAT THE GOVERNMENT SERVES THE TAXPAYERS. PROTECT TAXPAYERS FROM BEING CHEATED, AND ENSURE THAT MICHIGAN'S CHILDREN WILL HAVE RENEWABLE, RELIABLE ENERGY.

To: Peter Lark, Laura Chapelle and Monica Martinez

RE: Case# U14838

I hope that your commission will look into the gouging of D.T.E. Customers and send a message to Utility* Companies that gouging won't be tolerated. They should be compelled to return the 44 million dollars overcharged to their customers.

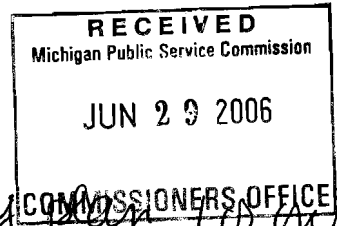

I also hope that you will look into cheaper, natural renewable sources of energy such as wind energy.

Going in such a direction would hurt profits of big oil companies but would lessen the cost burden on American families who are struggling to make ends meet.

Leadership is Needed!

Thank You,
Tim Denton

To All Above Addressed,

I am a resident of Michigan that has suffered from the current increase this year. I have a few points that I would like to make in regards to the current utility rates:

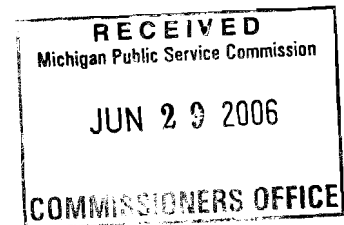

1. In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging wont be tolerated.
2. In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.
3. The Energy plan should encourage and fund energy-saving programs. For every \$1 spent on evergy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

I hope this letter makes a difference in helping our state realize that we won't accept the rate increase.

Thank You,

Emma Parsons
4580 Braidwood Dr
White Lake, MI 48383

June 27, 2006

To Whom It May Concern:

I am writing in regards to DTE and other electric companies trying to develop alternative ways of cutting costs for consumers. I feel it is robbery that we are paying so much money every year and it just keeps going up. You only hear of our cost going up but no one stops to think of ways to help the people. How can people afford to pay any of these utilities with these large increases?

If we stop gouging in the gas stations, why are we not doing the same thing here? How much will the prices go up before someone actually cares and does something?

We want DTE to refund the monies owed back to customers who are at their mercy and have to pay their outrageous costs... What else can we do, not pay???? Is anyone able to go without these utilities? I think not, but what else do you do when that is all you have? When will someone look out for the little person, who works hard everyday to be abused by huge million dollar companies like DTE and Consumer Energy?

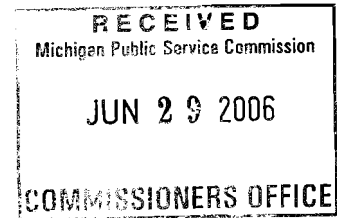

Thank you for taking time to read my letter,

Kevin and Angela Herman

Commisioners Peter Lark, Laura Chapelle, and Monica Martinez
Michigan Public Service Commision
P.O. Box 30221
Lansing, MI 48909

Dear Commissioners:

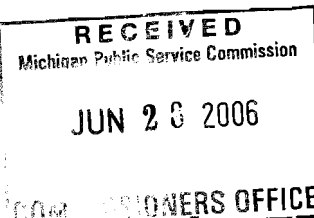

As a young Michigander and homeowner, I am very concerned that the state government is not planning for my generation's future. Our current plan is costly and we have not had the option of renewable energy – despite the fact that Michigan has great potential for wind power as an energy source. This not only affects our bank accounts, but it also affects the quality of our environment for my future children and future grandchildren.

Homeowners and citizens realize that the development and implementation of this 21st Century Energy Plan will not happen overnight and will require much research. Citizens support energy plans that encourage and fund energy-saving programs. In addition to future energy plans, there is also issue with the past. The commission owes it to Michigan citizens to insist that DTE refund its customers in case U-14838.

Thank you for your time and consideration.

Sincerely,

Carla Breuckman

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

I am writing to let you know that I feel that high prices for the utilities are outrageous. I think that the commission should insist that DTE refund the \$ 44 million it has gouged from customers through over-earnings. We all work very hard for every penny we get only to write it to DTE or/and Consumers. The commission should let them know that price gouging will not be tolerated. I think that the commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run. The Energy Plan should encourage and fund energy-savings programs. For every \$ 1 spent on energy-efficiency, customers save \$ 2 . This is a better use of money than building more and more costly fossil-fueled electric plants. That way we all win and will have something more than empty pockets for the future.

Commissioner Laura Chapelle
Commissioner Monica Martinez

Dear Commissioners,

It is my opinion in Case U-14838, the Commission should insist that DTE refund the forty-four million dollars it gouged from its customers through over-earnings. The Commission should send a message to all utilities that price gouging will not be tolerated.

In addition, in developing its 21ST Century Energy Plan, the Commission should make renewable energy and energy-saving a priority. The cost wind energy is declining and will be cheaper in the long run.

Lastly, the Energy Plan should encourage and fund energy-saving programs. For every one million dollars it spent on energy-efficiency, customer save two dollars. This is a better use of money than building more and more costly fossil-fueled electric plants.

In regards to this concern, I would appreciate a letter of reply to the following address:

Case U14838 Please insist the DTE refund the \$44 million it has taken from customers. Please price gouging should not be tolerated. The US is on this earth. It should not be hurt by consumer misdealing.

In developing its 21 Century Energy Plan the Commission should make renewable ENERGY AN ENERGY SAVINGS PRIORITY. Wind energy is cheaper.

The energy plan should encourage and fund energy savings programs. It will save more money in the long run than fossil fueled electrical plants. The fossil fuels have reached peak production. It is downhill for energy companies unless you make some dramatic changes. Look to the present and to the future. Then where will your company and your money be? \

Every person in the United States in fact every person on Earth should have the right to clean water, energy, (heat and light), food and health. It is up to you as a public Service to make this possible. With our present technology and science information this is possible if you put you greed and power aside.

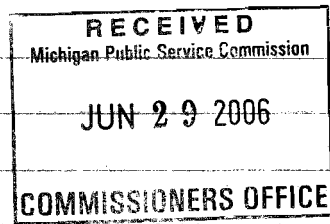

Please reply to this letter.

June 27, 2006

Dear Commissioners,

I am outraged by the price gouging of DTE. Last year we spent around 186 hours without electricity. Trying to communicate with someone higher than a phone rep was nearly impossible. I was finally able to get phone numbers after calling Ladera Toy & the Mayor of Livonia. After several months of numerous phone calls & hours of my personal time spent, it was found that our outages were due to dead ash trees falling on the lines. Since we are a small number of customers on the circuit we were last to have our power restored.

In my conversations with Power Quality, I was told the lines are cleared according to the specified nine feet. They will not cut down the trees. Why can't they move the lines out of the ravine? If they are earning all of this extra money I certainly expect better service. This year we've had two outages - 3 hours out during each outage. Some modifications were made to the boxes which will allow 1-2 lines to continue with power if one goes out. But that doesn't solve the real problem - get the lines out of the ravine. If not, give me some of that money back that DTE is stealing from the consumer.

As the commission it is your duty

to do what is best for the public. You must hold DTE accountable for service at reasonable costs. Please do not shirk this duty or dismiss it as trivial. Be a commission of integrity and speak out for the public you support.

Sincerely,

Please reply: →

P.S.

Let's join the 21st Century Energy Plan and be more conscious of renewable energy. Be innovative, not responsive. Plan for the future instead of waiting for the problems to surface. If we can create savings for the consumer let's do it! Be proactive & productive.

I want to save money on energy. Please encourage fund energy-saving programs. You could be the commission who is innovative and makes a difference in the 21st Century. Or you could go out as a nobody & invisible to the public. If I can save \$2 for every \$1 spent on energy efficiency I will have more money to pour into the economy. Please be my voice for a saving program.

June 26, 2006

Commissioners Peter Lark, Laura Chapelle and Monica Martinez
Michigan Public Services Commission
Post Office Box 30221
Lansing, Michigan 48909

Dear Commissioners Peter Lark, Laura Chapelle and Monica Martinez,

I feel that in the case U-15838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy savings a priority. The cost of wind energy is declining and will be cheaper in the long run. The energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly fossil-fueled electric plants.

Please let me know where you stand on these issues.

Sincerely,

A handwritten signature in cursive script that reads "Megan Johnson".

Megan Johnson

June 27, 2006

Dear Commissioner,

I am writing to voice my support for clean, reliable and affordable energy for Michigan residents. In developing an energy plan for the 21st century, I ask that the Commission make renewable energy and energy-savings a priority. I especially request that the use of wind energy be investigated. Any energy plan should encourage as well as fund energy-saving programs.

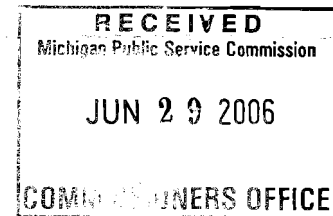

In addition, in case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. In doing this, the Commission would send a message to all utilities that price gouging won't be tolerated.

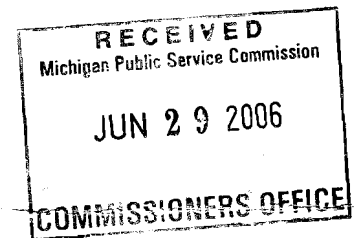

Thank you for your consideration. A reply would be greatly appreciated.

Sincerely,

Brenda Marshall

Brenda Marshall
4853 Club Place
Ypsilanti, Michigan 48197

Dear Michigan Public Service Commission Members:

I support clean, renewable energy for the 21st century and beyond.

In the past ten years, it has becoming increasingly evident that our country, and especially our state with its "motor city", is increasingly dependent on fossil fuels for energy. I think that the Public Service Commission needs to make renewable energy and energy savings a priority. Fossil fuels are eventually going to run out, with peak oil production expected by 2010, and the waste produced by nuclear fission plants is much too great for our country and world to bear. The cost of alternative energies, such as wind energy, is decreasing and it will be cheaper in the long run.

We need a comprehensive energy plan that encourages and funds energy-savings programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building costly fossil-fueled or nuclear electric plants. Although the up-front investment is a lot, the eventual payoff, both financially and environmentally, is worth the cost.

In case U-14838, the Commission needs to insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging is neither ethical nor allowable under law. This kind of price gouging is ridiculous, and you ALL know it.

Thank you for your time.

Sincerely,

Alexander Brown

Dear Commissioner Larky
re: new Energy Plan

As you formulate Michigan's new Energy Plan, I would appreciate it if you took case W-14838 into account, insisting DTE refund the \$44 Million to its customers, to reestablish the president ^{the state} + will not tolerate energy price gouging in the future.

Secondly, ^{please} developing ideas for the plan that would make renewable energy a priority + encourage + fund energy savings programs.

Thank you for your consideration!

Sincerely,

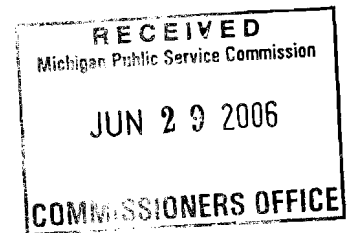

Mary K. Mans

Dear Commissioners,

Having learned of your efforts to provide our state with a real energy policy, to encourage alternative energy and conversation, as well as to persuade DTE to a reasonable rebate to its customers, I want to add my name to what I hope will be a significant number of your concerned supporters. Of course these issues are large-scale and difficult, but those are not valid arguments against the first steps to a new and sounder energy situation in Michigan. I would very much appreciate remaining informed of your progress, so long as a reply would not detract from concentration on the task at hand.

Yours truly,

(concerned consumer).

June 23, 2006

Dear Commissioners:

I feel that it is important to create legislatures that support clean, reliable, and affordable energy. It is time to eliminate price gouging, especially in the instance of DTE energy. In this difficult era in Michigan's economy, it is essential to create energy plans that abhor the waste of our dwindling natural resources and look toward renewable energy options, such as wind energy, that will be more cost effective and the environmentally friendly in the long run. These plans should also encourage and fund energy saving programs. Such programs could reward individuals that spend money on energy efficiency instead of using extra money to build more wasteful and costly fossil-fueled electric facilities. Thank-you for your time and concern for this matter.

Dear Commissioners Lark, Chapelle, and Martinez:

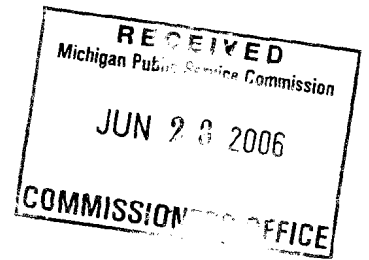

I urge the commissioners to work toward making Michigan less dependent on fossil fuels and expand funding for programs that promote renewable energy sources such as wind and solar energy. In developing its 21st Century Energy Plan, the commission should make renewal energy and energy-savings a priority. The Energy Plan must encourage and fund energy-saving programs. Sending taxpayers' dollars for renewable energy sources just makes common sense. Lastly, in the case of U-14838, the commission should insist that DTE refund the money it overcharged its customers. I hope that you act responsible and progressively and steer the stage in the right direction for the a cleaner, safer and more prosperous future.

Sincerely,

Michigan Public Service Commission
P.O. Box 30221
Lansing, MI 48909

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez:

I am writing to you today in support of the Michigan Consumer Federation. We need help lowering costs for our utilities. Michigan lags behind even though it has one of the greatest resources for wind power in the country with 11% of our energy potentially being produced by wind. We were recently in Hawaii and my understanding is 30% of their energy is from renewable sources. Why can't Michigan follow suit? Some other points to consider:

- In case U-14838, the commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.
- In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority.
- The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more costly fossil-fueled electric plants.

Please work with the consumer and help lower our sky rocketing utility costs.

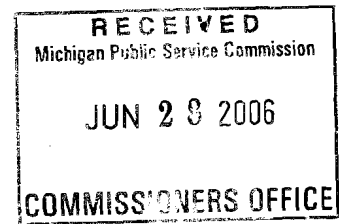

Sincerely,

Lansing, MI 48909

Support for clean, reliable and affordable energy:

Please consider the following as you vote:

1. Case U-14838: The Commission should insist that DTE refund the \$44 million it gouged from its customers through over earnings. The Commission should send a message to all utilities that price gouging will not be tolerated.
2. The Development of the 21st Century Energy Plan: The Commission should make renewable energy and energy savings a priority. The cost of wind energy is declining and will be much cheaper in the long run.
3. The Energy Plan should encourage and fund energy saving programs. For every \$1 spent on energy efficiency, customers should and could save \$@. This would be a more intelligent use of money than building more costly fossil fueled electric plants.

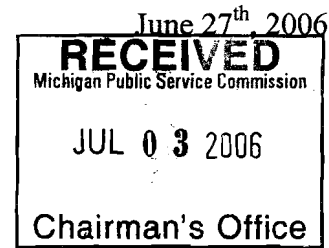

Please reply: Elizabeth P. Baxter, Ph.D.

Thank you for your passionate commitment to sensible future planning for the reduction of dependence of fossil fuels!

P.O. Box 30221
Lansing, MI 48909

Dear Commissioners:

My name is Erick Johnson and I am a resident of Pittsfield Township, Michigan. I am writing to express my thoughts to you on our state's need for a long-term energy planning process. This is an issue that will only become more critical for Michigan citizens as time goes by, and I urge you to support the following stances regarding our energy resources:

In case U-14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The Commission should send a message to all utility corporations that price gouging will not be tolerated.

In developing its 21st century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy savings programs. For every \$1 spent on energy-efficiency, customers should save \$2. Financial incentives are the strongest way that the Commission can encourage consumers to begin using renewable sources of energy. Furthermore, this is a better use of money than building more and more costly fossil-fueled electric plants.

Thank you for considering these viewpoints. I hope I can count on your support on this important issue.

Sincerely,

Erick Johnson

June 28, 2006

To whom it may concern;

Michigan has got to take hold and start thinking about the future. The time is now.

Example - Case U-14838 the DTE should refund the \$44 million stole from customers through over earnings.

Make renewable energy and saving energy a priority.

Fund energy saving programs and discourage all costly fossil fueled or coal fired electric plants.

Please think how were killing our future and all everyone has worked for. Generation will not survive if we fail.

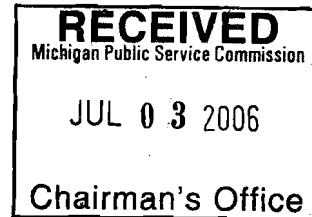

Please let me know if you receive my letter.

Re: DTE Energy customer gouging
U-14838

Dear Ladies and Mr. Lark:

I believe the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. Your Commission should send a message to ALL utilities that price gouging will not be tolerated.

Further, in looking at an energy plan for this century, the Commission should make energy savings and renewable energy a PRIORITY. The cost of wind energy is declining and will be cheaper in the long run, but it is not being well-utilized.

Further, any proposed energy plan should encourage and fund energy saving programs. For ever \$1.00 spent on more energy-efficiency, customers actually save \$2.00. This is a better use of money than building more and more costly fossil-fueled electric plants.

PLEASE give this letter your consideration and do something to help save our dwindling natural resources. Thank you.

Sincerely,

June 29, 2006

Dear Commissioners,

I am writing to ask you to support clean, reliable and affordable energy! The utility rates are continually increasing, however, within the state of Michigan; we have the highest unemployment rate. Incomes have not increased at the rate that utilities have increased. We do need relief!!

In case U – 14838, the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

In developing its 21st Century Energy Plan, the Commission should make renewable energy and energy-savings a priority. The cost of wind energy is declining and will be cheaper in the long run.

The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2. This is a better use of money than building more and more costly follies-fueled electric plants.

I would appreciate your help and consideration in this matter.

Sincerely,

Commissioners; Peter Lark, Laura Chapelle, Monica Martinez
Michigan Public Services Commission
P.O. Box 30221
Lansing, Michigan
48909

Dear Commissioners;

This letter is to address my concerns regarding energy in our state. I feel that DTE must not be allowed to price gauge the citizens of Michigan and it is your duty to work in our best interest. They should be made to refund all over-earning funds back to its customers.

I also feel it is the responsibility of the commission to develop renewable energy plans for our state and to make certain that energy companies like DTE do not take advantage of their position at the expense of Michigan residents.

Thank you for your time in reading this letter and I look forward to your response.

Sincerely,

Mary Takata

17360 Birwood

To the Attention of Commissioners: Peter Lark, Laura Chapelle
and Monica Martinez,

Regarding the 21st Century Energy Plan:

Please strongly consider making renewable energy and energy savings a priority. With the amount of coastline in the state wind energy should seriously be researched as an alternative. The costs are declining and will hopefully payoff in the future.

The Energy Plan should encourage and fund energy saving programs. Provide energy saving tips, incentives for initiating and utilizing methods of saving energy.

In the case U-14838:

The commission should insist that DTE refund the \$44 MILLION it gouged from its customers through over earnings. Send a message to all utilities that price gouging will not be tolerated.

Your individual actions will help the voters decide who will be the Commissioners of the future. If you are there for us, we'll be there for you.

Sincerely,

Lawrence and Donna Paulson (Registered Voters)

Dear Commissioners,

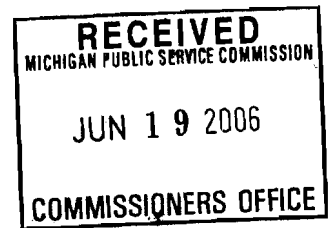

It is with much concern that I write to you today. Energy costs are soaring and it's all because of our total dependency on the usage of fossil fuels. In case #U-14838, I demand that the Commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. Price gouging should not be tolerated in any form. In preparing the 21st Century Energy Plan, you should make renewable energy and energy savings a priority. The cost of wind energy is declining and will be cheaper in the long run. That would be one step in the right direction if wind energy was pursued here in Michigan.

Please reply to me as to why these things have happened and when we will see alternative measures being taken to make Michigan a better place to live.

Sincerely,

Michael E. Hennessy

To Commissioners Clark, Chappelle, + Martinez

I am the parent of three Teenagers, one of them with special needs. If any of you have ever had children you know how costly it is to raise them. Add to that 3 fold the medical cost to take care of a special needs child and you will understand that we are on a tight Budget. As the prices of Power go up we have to cut out other items of living, to make ends meet. To allow the power companies to price gouge us is Pissplicable. You should force them to refund some of that money as in case U-14835. We also need cheaper sources of energy like Solar or Wind. These are Renewable and less costly. And Remind us who are waiting to Save Energy. Let the Customers Have some say in how our money is spent or saved. Please let us have an answer to these questions so that I can sleep at night not worrying about how I'm going to pay the Bills.

June 13, 2006

Dear Commissioners Lark, Chapelle, and Martinez,

I am very concerned about our lack of reliable and affordable energy in Michigan, and I think it's time we caught up with the needs of our state and nation. In developing your 21st Century plan, please make renewable energy and energy-saving a priority. The use of wind energy, in particular, should be looked into. It was encouraging to see these windmills as I drove home from PA this past week, and it made me wonder: why don't I see these in Michigan?

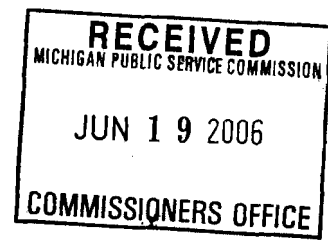

It simply is no longer true to say that saving energy will cost the economy and jobs in particular. We no longer believe such unfounded rhetoric, and know that it's prompted by lobbyists - the mouth-pieces of our present energy conglomerates.

In case U-14838, I hope you will insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that price gouging won't be tolerated.

You represent the people of this state, so I expect you to do just that instead of representing big business.

Commissioners:

The future of our nation, and our state of Michigan is of vital importance.

Energy costs, both residential and commercial, are impacting the economy. The use of non-renewable energy sources impacts the future.

I encourage the development of energy-saving programs. Utilization of renewable energy sources, such as wind-power or "green" fuels needs to be encouraged, and such sources need to be made available.

Energy suppliers, such as DTE, need to be responsible, both fiscally and ecologically.

You, commissioners, are in a position to advocate for these goals, even to implement endeavors to accomplish them.

Your support is vitally needed and will be greatly supported.

Respectfully,
Jinda Bodner

Dear Commissioners,

I am a current Michigan citizen and DTE customer.

As with most of the rest of the country, I am deeply concerned about rising energy costs and our enormous dependency on fossil fuels.

I strongly encourage your commission to do everything in its power to reduce both energy use and energy cost. In developing your new energy plan, you must incorporate alternative energy methods, such as wind and solar energy, to reduce the use of fossil fuels. Energy efficiency should be encouraged and rewarded. Lastly, Energy providers, such as DTE, should reimburse consumers for their huge profits and over-earnings.

Thank you,

Lani Cary

RE: Michigan's Future Energy Needs

Dear Commissioners,

I am writing to you today on developing more renewable energy for the State of Michigan. I am an environmental science teacher and urge my students to reduce reuse and recycle all the time. It is time that Michigan begin to reduce our use of fossil fuels for our energy needs. We need to stop polluting our environment with this type of fuel. I have taught my students the many different ways that electricity can be produced, fossil fuels, wind power, water, nuclear, solar, etc. Wind power is the most feasible renewable resource here in Michigan. The infrastructure needs to be developed for this renewable energy source. We need to educate the populous on how this energy source works, so they can make an informed decision on its use here in our state. While the other resources are available here in our state Wind power seems to be the least environmentally invasive.

I would also call for stopping the gouging of customers by energy suppliers. DTE should refund the 44 million in over earnings to its customers. I believe in fair trade and a profit but they should not profit by gouging their customers.

I would also promote a plan that educates and encourages consumers to be more energy conscious and educate them on the use of more energy efficient means of using electricity in their homes, businesses, schools, etc.

I would like a reply as to how you will be addressing these issues in the near and far future.

Sincerely,

Kalamazoo, Michigan 49008

Dear Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

I'm a 17-year-old boy, hoping to see a brighter, less toxic, future for Michigan, as well as the country. To do so, action must be taken. First off, I ask of you to demand DTE to refund the \$44 million they gouged from their customers through over-earnings and tell to all utilities that the price gouging has stopped. I also wish for you to consider renewable energy and energy-saving, like wind energy, for example, is declining cost-wise and will be cheaper later on. The Energy Plan should encourage and fund energy-saving programs. For every \$1 spent on energy-efficiency, customers save \$2, instead of using it to build more costly fossil-fueled electric plants. Plus, carbon monoxide, the smog emitted from used fuel, destroys the Ozone layer, which is environmentally uncool. When you receive this, send a reply to:

White Lake, Mi 48383

Dear Peter Lark, Laura Chapelle, and Monica Martinez,

I am writing to ask why in the case U-14838, DTE has not refunded the \$44 million it took from its customers through over-earnings. I am 17 years old and will be a senior in high school. A company owing this much money to its customers is sending a terrible message, not only to its consumers, but to the young people of this state. This should be amended immediately for all involved.

In the matter of energy, it would be wise to utilize our natural resources and encourage energy saving programs. .

Sincerely,

Sean Falvo

A handwritten signature in cursive script that reads "Sean Falvo".

p.s. Please reply to this letter in writing.

To: Commissioners Peter Lark, Laura Chapelle, and Monica Martinez

I am writing to express my opinion that Michigan needs to be a leader in developing cleaner and more affordable renewable energy. I feel Michigan is lagging far behind other states and paying more money for our energy.

Regarding case U-14838, your Commission should *insist* that DTE refund the \$44 Million it has gouged from it's customers. You, as a Commission, should be sending the message to all utilities that this is not tolerable.

Also, your Commission should make renewing energy and energy-savings a priority. Wind Energy should definitely be considered and explored as it will be cheaper for Michiganians in the long run.

Building more costly fossil-fueled electric plants costs consumers much more and is not a good use of money. We need to be more progressive and forward looking to alternatives to fossil-fuel as the auto industry is doing. The Energy Plan should encourage and fund energy saving programs.

Thank you and I look forward to your reply.

Dear Commissioners,

Please insist DTE refund what it has gauged from it's customers due to over-earnings per case U-14838.

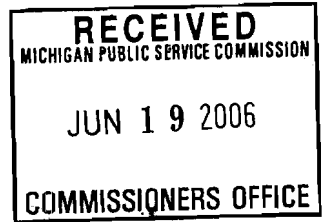

Please encourage the wind power idea for the 21st Century Energy Plan. This would be a long term, less costly plan for the future. Solar power is not out of the question for farm areas or state parks or schools.

Thank you,

Dear Commissioners Peter Lark, Lark Chapelle & Monica Martinez:

Please consider:

1. Case U-14838, the commission should consider/insist! that DTE refund the \$44 million it gouged from its customers thru over earnings. This should send message that utilities can not price gouge!
2. In developing its 21st Century Energy Plan, the commission should make renewable energy and energy-savings a priority! The cost of wind is declining and will be cheaper in the long run.
3. The energy Plan should encourage and fund the energy-saving programs! For every \$1⁰⁰ spent, we consumers could save \$2⁰⁰. This is a good use of money versus building costly fossil-fuel electric plants!

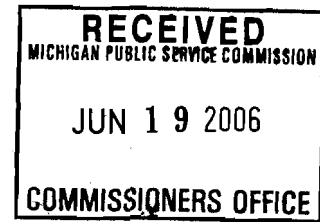

Please send me a reply to this letter as I am disabled and a long-time Michigan resident & tax-payer.

Sincerely,

Patricia Sue Smith
Patricia Sue Smith.

Jean Falvo
969 Bogie Lake Road
White Lake, MI 48239
248-889-8302

Commissioners Peter Lark, Laura Chapelle, and Monica Martinez,

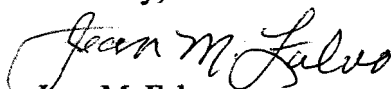

I am writing about the development of a 21st century Energy Plan, one which should encourage and fund energy-saving programs.

As a citizen of Michigan, I feel it is absurd to be getting our power from out of state and Canadian companies. We as a state should be planning our energy future, not the utility companies. With the depressed state that Michigan is in right now, we should be finding alternative sources for cleaner, more efficient energy. I have lived in this state my whole life and see a great potential for wind power here; we very seldom lack a breeze, water, or trees. These natural sources of energy have been utilized in other states for many years and have proved to be very successful. With the science projects and competitions in our state with students, you would think someone would see what these young, fantastic minds can create and would utilize their ideas and talents. If we wait too long, will it be our loss? I have five children and would like to see them remain in Michigan, but with the rising costs of energy, lack of jobs, and rise in cost of living who knows where they may set their roots?

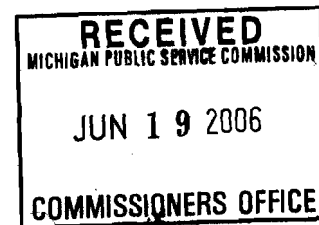

Also in the case U-14838, the commission should insist that DTE refund the \$44 million it gouged from its customers through over-earnings. The commission should send a message to all utilities that we the citizens will not tolerate price gouging. Again with the state Michigan is in, this is absolutely outrageous!!!!

I would appreciate a written reply to this letter. Thank You.

Sincerely,

Jean M. Falvo

Commissioners Peter Jark, Laura Chapelle and
Monica Montoya

I am asking you to require DTE to refund
the \$44 million dollars it has overcharged its
customers in case U-14838. The Commissioners
should also insist there be no price gouging by
utility companies.

I also request the commission to make
renewable energy a priority in its 21 Century
Energy Plan, such as wind power and solar
power. The Energy Plan should also encourage
and fund energy-saving programs. Customers
save \$2 for every dollar spent on energy efficiency.
It seems it would be more cost efficient than
building more dirty fossil-fueled energy plants.
I would appreciate a reply to this letter.

Sincerely

Audrey J. Barkers

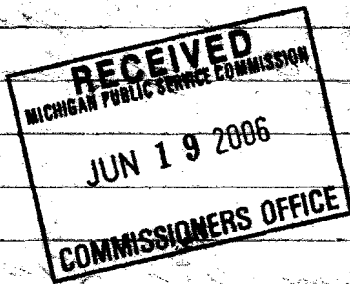

Commissioners Peter Lark
Laura Chapelle, & Monica Martinez
