Dear Ms. Kunkle:

Re: In the matter, on the Commission's Own Motion, on the Certification of Eligible
Telecommunications Carriers
Case No. U-14900 - Alltel Communications, Inc.

Enclosed for filing is an envelope labeled "Confidential" which contains the *Application for Continued Designation as an Eligible Telecommunications Carrier* for Alltel Communications, Inc. This matter is being filed in paper form due to the confidential items included, per Section 210 of the MTA.

We also include a "Public Version" of the filing that redacts the confidential material.

Thank you for your assistance in this matter and please contact me with any questions.

Sincerely,

FOSTER, SWIFT, COLLINS & SMITH, P.C.

Mark J. Burzych

Attorneys for Alltel Communications, Inc.

I. INTRODUCTION

In accordance with the standards and requirements established by the Michigan Public Service Commission ("Commission"),¹ Alltel Communications ("Alltel") submits this ETC Certification and Annual Report, and respectfully requests the Commission to certify its eligibility for high-cost support from the federal universal service fund for calendar year 2007. In the *Annual Certification Order*, the Commission adopted the annual reporting and certification requirements as established by the Federal Communications Commission ("FCC") and codified at 47 C.F.R. §§ 54.202 and 54.209.² For reference purposes, Alltel's demonstrated compliance with the Commission's annual reporting and certification standards will reference the FCC's regulations.

II. BACKGROUND

The Commission has designated Alltel as a competitive ETC in certain non-rural wire centers served by Verizon Communications, the full study areas of several rural telephone companies, and certain individual wire centers of other rural telephone companies.³ As an ETC, Alltel provides the nine supported services, including:

- Voice grade access to the Public Switched Telephone Network;
- Local Usage;
- Dual tone multi-frequency signaling or its functional equivalent;
- Single party service or its functional equivalent;
- Access to 911 or E911;

¹ *In the Matter, on the Commission's Own Motion, to Examine the Commission's Role in Eligible Telecommunications Carrier Determinations*, Case No. U-14530 (April 13, 2006) ("Annual Certification Order"). See also Case No. U-14900.

² *Annual Certification Order*, p. 2.

³ *In the Matter of Alltel Communications, Inc. Application for Designation as an Eligible Telecommunications Carrier pursuant to Section 214(e) of the Communications Act of 1934*, Case No. U-13765, (September 11, 2003) ("ETC Order").

- Access to operator services;
- Access to interexchange services;
- Access to directory assistance; and
- Toll limitation for qualifying low-income customers.

A complete listing of the areas in which Alltel has been designated as an ETC, and is receiving federal universal service support, is contained in **Exhibit A**, enclosed, as required by Attachment A of the *Annual Certification Order* (hereinafter referred to as the "Checklist").

Also as required by the Checklist, Alltel provides the name, address, telephone number and email of the Company contact:

III. ALLTEL SATISFIES EACH OF THE COMMISSION'S ETC APPLICATION REQUIREMENTS SET FORTH IN SECTION 54.202(A)

The Commission has adopted Section 54.202(b) of the FCC's Rules requiring a common carrier previously designated by the Commission as an ETC to submit the information required by FCC Rule 54.202(a) no later than June 15, 2006.⁴ Alltel respectfully submits the following

⁴ *Annual Certification Order*, p. 2.

information in satisfaction of the Commission's requirements in Case No. U-14530 as it applies to the Company's ETC Designated Service Areas in the State of Michigan.

A. Alltel Commits To Provide Service Throughout Its Designated Areas To All Customers Making A Reasonable Request For Service

Alltel commits to provide service throughout its Designated Areas to all customers making a reasonable request for service in compliance with the Commission's standards based on FCC Rule 54.202(a)(1)(i). For purposes of evaluating the provision of service upon request from a potential customer within its Designated Areas, Alltel hereby certifies that it will:

1. Provide service on a timely basis to requesting customers within its Designated Areas where its network already serves the potential customer's premises; and
2. Provide service within a reasonable period of time, if the potential customer's premises is located within Alltel's Designated Areas, but outside its existing network coverage, if service can be provided at reasonable cost by:
 - (a) Modifying or replacing the requesting customer's equipment;
 - (b) Deploying a roof-mounted antenna or other equipment;
 - (c) Adjusting the nearest cell tower;
 - (d) Adjusting network or customer facilities;
 - (e) Reselling services from another carrier's facilities to provide service; or
 - (f) Employing, leasing or constructing an additional cell site, cell extender, repeater, or other similar equipment.

If service cannot be offered at reasonable cost using one of these options, Alltel will report the unfulfilled service request to the Commission and describe how it attempted to provide service consistent with the Commission's requirement based on FCC Rule 54.209(a)(3).

B. Alltel's Service Improvement Plan

In accordance with the FCC rules, and as required by the Checklist, Alltel has developed a five-year plan that describes with specificity proposed improvements or upgrades to its network serving its Michigan Designated Areas ("Service Improvement Plan"). Alltel's Service

Improvement Plan is attached as **Confidential Exhibit B**. The Service Improvement Plan includes all information required by FCC Rule 54.202(a)(1)(ii) for calendar years 2006 through 2010. The projected expenditures under the Service Improvement Plan are based on an estimate of receiving, on average, approximately \$8.5 million in federal high-cost universal service support per year over the five-year period.⁵

Alltel's Service Improvement Plan demonstrates how signal quality, coverage or capacity will continue to improve due to Alltel's receipt of federal high-cost universal service support; the projected start date and completion date for each improvement; the estimated amount of investment for each project that is funded by high-cost support; the specific geographic areas where the improvements are expected to be made; and the estimated population that will be served as a result of the improvements. In certain portions of the Designated Areas, service improvements are not currently projected within the scope of this five-year Service Improvement Plan. As reflected in **Confidential Exhibit B**, Alltel is projecting certain enhancements and upgrades to its switching facilities which will provide an improvement to all areas served in the Designated Areas. Additionally, the projected capital expenditures and other operating expenses reflected in the Plan exceed the projected amount of universal service support Alltel will receive. In those portions of the Designated Areas for which a specific capital expenditure is not contemplated in the Service Improvement Plan, Alltel will nevertheless incur significant operating costs and will continue to utilize federal high-cost universal service support for the provision, maintenance, and upgrading of facilities and services for which the support is intended

⁵ This figure is based on projections from the Universal Service Administrative Company's website found at www.universalservice.org. Actual support amounts received may vary from this projection.

consistent with Section 254(e) of the Telecommunications Act of 1996 (the "Act") and FCC Rules 54.7 and 54.202(a)(1)(ii).

C. Alltel Has Adequately Prepared For Emergency Operations

As required by the Checklist, Alltel provides the following information demonstrating its ability to remain functional in emergency situations consistent with the Commission's standards based on FCC Rule 54.202(a)(2). The Alltel network is designed to be able to remain functional in emergency situations. Alltel has reasonable amounts of back-up power to provide functionality without an external power source (between four to eight hours), and has implemented industry practices to reroute traffic around damaged facilities and manage traffic spikes resulting from emergency situations.

Alltel has deployed fixed and portable back-up power generators at various locations throughout its network that can be deployed in emergency situations. These back-up power generators are capable of keeping a cell site up and running until power is restored to the cell site, a portable generator is moved to the site, system changes are made to reroute traffic or a cell on wheels ("COW") is deployed. Alltel tests its back-up power generators regularly to ensure functionality. Alltel is also capable of rerouting traffic around damaged or out-of-service facilities by changing call routing translations as needed. Alltel is also able to deploy COWs as temporary cell sites when existing facilities are damaged or out-of-service for longer periods of time. Further, by changing call routing translations or deploying COWs, Alltel is able to manage traffic spikes throughout its network. As a long-term solution for managing increased traffic levels and traffic spikes, Alltel may increase capacity at its cell sites, switches and transport facilities.

D. Alltel Will Satisfy Applicable Consumer Protection And Service Quality Standards Within Its Designated Areas, Including Compliance With The CTIA Consumer Code

As required by the Checklist, Alltel will satisfy applicable consumer protection and service quality standards within its Designated Areas. For purposes of this requirement, the Commission expects to see (1) statement that a commitment has been made to comply with the Cellular Telecommunications and Internet Association ("CTIA") Consumer Code; (2) policies for consumer privacy protections (**Exhibit C**); and (3) advertisements or informational materials that Alltel provides its prospective customers on Lifeline and Link-Up services (**Exhibit C-1**). Set forth below is a demonstration of Alltel's ability to comply with the applicable standards, and where relevant, documents are attached as exhibits.

As set forth in the Checklist and established by FCC Rule 54.202(a)(3), a commitment by a wireless carrier to comply with the Consumer Code satisfies this requirement. Alltel became a voluntary signatory to the Consumer Code in September, 2003. Since adopting the Consumer Code, Alltel has implemented the policies and practices required of signatories throughout its Designated Areas, including disclosures of rates, terms of service and maps of service areas, a trial period for new service, which is actually longer than what the Code mandates (15-days instead of 14 days), ready access to customer service, policies for customer privacy and prompt responses to consumer inquiries and complaints from government agencies. Alltel provides periodic training materials to customer service representatives and internally monitors and updates its intranet site toward maintaining compliance with the Consumer Code. Alltel provides subscribers with benefits that are not mandated by the Consumer Code or other regulation in that it monitors its network for dropped calls and does not bill its subscribers for any dropped calls.

Further, as required by the Checklist, attached as **Exhibit C** is the "Alltel Privacy Statement," which demonstrates how the Company seeks to protect the privacy of its subscribers.

Additionally, as required by the Checklist, attached as **Exhibit C-1** are examples of Alltel's Lifeline outreach efforts. In addition to informing consumers about Lifeline on its website at www.Alltel.com/lifeline, approximately at least once a quarter, the Company conducts outreach by advertising in local newspapers where it is an ETC, and annually sends Lifeline flyers to 35 local Michigan workforce development centers in the Company's ETC service area.

E. Alltel Offers A Local Usage Plan Comparable To The Service Offerings Of The Incumbent LECs Serving Alltel's Designated Areas

Alltel offers a local usage plan comparable to the service offerings of the incumbent LECs serving its Designated Areas consistent with the Commission's requirement incorporating FCC Rule 54.202(a)(4). The requirement to offer at least one service offering that contains an amount of local usage comparable to the local usage offered by the incumbent LEC does not mandate unlimited local calling. When comparing Alltel's service offerings to one offered by an incumbent LEC, it is appropriate to consider that Alltel offers local calling plans that may contain fewer minutes of use but larger local calling areas, which is comparable to a LEC plan with more minutes of use but a smaller local calling area.⁶

A listing of Alltel's rate plans currently available in the Designated Areas is attached as **Exhibit D**. Alltel provides rate plans that include substantial local calling areas with varying levels of local usage. Alltel includes local usage in each rate plan and Alltel offers local calling areas that are substantially larger than those offered by the incumbent LECs. Customers therefore have the opportunity to select a rate plan that best meets their needs. Each Alltel rate

⁶ *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, FCC 05-46, ¶ 33 (rel. March 17, 2005) ("March 17 Order").

plan includes, at a minimum, all of the supported services required by FCC Rule 54.101(a)(1)-(9) comparable to the service offerings of the incumbent LECs. Consistent with FCC Rule 54.202(a)(4), the amount of local usage available in Alltel's generally available rate plans is comparable to that offered by the incumbent LECs in the Designated Areas.

F. Alltel Acknowledges The FCC May Require It To Provide Equal Access In A Designated Area In The Event That No Other ETC In the Service Area Is Providing Equal Access

Consistent with the Commission's requirement incorporating FCC Rule 54.202(a)(5), Alltel hereby acknowledges that the FCC, pursuant to 47 U.S.C. § 332(c)(8), may require it to provide equal access to long distance carriers in the event that no other ETC is providing equal access within one of its Designated Areas.

IV. ALLTEL'S ANNUAL REPORT IN ACCORDANCE WITH SECTION 54.209(a)

The *Annual Certification Order* also adopted FCC Rule 54.209(a) requiring a common carrier previously designated by the Commission as an ETC to annually report certain additional information no later than June 15 of each calendar year.⁷ Alltel respectfully submits the following information in satisfaction of the Commission's annual reporting requirement.

A. Progress Report on its Service Improvement Plan

In the *Annual Certification Order*, the Commission adopted FCC Rule 54.209(a)(1) requiring an ETC to file a progress report on its Service Improvement Plan. Attached **Confidential Exhibit B** is the comprehensive progress report filed in compliance with FCC rules.

The Service Improvement Plan covers the time period from January 1, 2006 through December 31, 2010. The information within **Confidential Exhibit B, Appendix B-1** provides

⁷ *Annual Certification Order*, p. 2.

actual year-to-date expenditure data for 2006 through May 31, 2006, and thus reflects Alltel's progress on the Service Improvement Plan through that date.

In addition, a carrier that has not previously filed a Service Improvement Plan must include a description of improvements or upgrades it has made since the date of its initial designation. Since Alltel was designated an ETC prior to the effective date of the FCC's eligibility and certification rules, Alltel is including a list of improvements/upgrades it has made since the Commission's ETC Designation Order. Furthermore, information regarding the amount of federal universal service support received by Alltel since the ETC Designation Order, service improvements completed and unaudited financial information regarding Alltel's capital expenditures and operating expenses for the period between January 1, 2005 and December 31, 2005 is contained in **Confidential Exhibit E**.

B. Network Outages In Michigan Designated Areas

The Commission has adopted FCC Rule 54.209(a)(2), which requires an ETC to annually report network outages within its Designated Areas (see Checklist). FCC Rule 54.209(a)(2) specifically requires:

detailed information on any outage, as that term is defined in 47 C.F.R. § 4.5, of at least 30 minutes in duration for each service area in which an eligible telecommunications carrier is designated for any facilities it owns, operates, leases, or otherwise utilizes that potentially affect (a) at least ten percent of the end users served in a designated service area; or (b) a 911 special facility, as defined in 47 C.F.R. § 4.5(e). Specifically, the eligible telecommunications carrier's annual report must include information detailing: (a) the date and time of onset of the outage; (b) a brief description of the outage and its resolution; (c) the particular services affected; (d) the geographic areas affected by the outage; (e) steps taken to prevent a similar situation in the future; and (f) the number of customers affected.

This information, for the time period January 1, 2005 through December 31, 2005,⁸ is contained within **Confidential Exhibit F**. Alltel has compiled and reported information for all outages, as defined in 47 C.F.R. § 4.5, of at least 30 minutes in duration occurring within its Michigan Designated Areas. Such information includes, but is not necessarily limited to, any outage that may potentially affect at least ten percent (10%) of its customers served in a service area. Similarly, the information relating to the number of customers affected by an outage is estimated based on the number of customers with a billing address in the wire center as of May 31, 2006. The exact number of customers affected would be dependent upon the number of call attempts during the service disruption, which is not capable of being ascertained.

C. Unfulfilled Requests For Service

The Commission has adopted FCC Rule 54.209(a)(3) (see Checklist), which requires an ETC to annually report the number of requests for service from potential customers within the ETC's designated service areas that were unfulfilled during the past year. The filing must also detail how the ETC attempted to provide service to those potential customers as set forth in FCC Rule 54.202(a)(1)(i). The required information concerning Alltel's unfulfilled requests for

⁸ Neither the Commission's *Annual Certification Order* nor FCC Rule 54.209(a)(2) establishes the time period to be covered by an outage report filing. January 1, 2005 through December 31, 2005 would seem to be an appropriate time period for the initial report even though the Commission did not adopt the FCC's reporting requirements until April 13, 2006. Prior to the Commission's establishment of the ETC outage reporting requirement, Alltel did track and report outages based on the FCC's Part 4 regulations. However, FCC Rule 54.209(a)(2) established different reporting thresholds and substantive content requirements as compared to the Part 4 rules. Future outage reports will also be based on a January 1 through December 31 period.

service within its Designated Areas from January 1, 2005 through December 31, 2005⁹ is contained in **Confidential Exhibit G**.

D. Complaints Per 1,000 Handsets Or Lines

The Commission has adopted FCC Rule 54.209(a)(4), which requires an ETC to make an annual report of the number of complaints per 1,000 handsets or lines. The number of complaints per 1,000 handsets for its Designated Areas which Alltel has received from the Commission, FCC, Michigan Attorney General, the Better Business Bureau or similar third party consumer agency between January 1, 2005 and December 31, 2005 is 0.266255. The percentage of complaints is calculated based on the number of subscribers in the Designated Areas as of December 31, 2005.

E. Certification Regarding Its Provision Of A Comparable Local Usage Plan

The Commission has adopted FCC Rule 54.209(a)(7) (see Checklist), which requires an ETC to certify that it is offering a local usage plan comparable to the incumbent LEC in the relevant service areas. Alltel makes available rate plans that are the same throughout the ETC service area. In other words, it does not matter where in the ETC service area the customer resides—whether it is the Addison wire center of Verizon or the Winn wire center of Winn Telephone Company; the rate plans do not differ from one part of the service area to another. Alltel certifies that it is offering at least one comparable local usage plan as required by Section 54.209(a)(7). In fact, all of Alltel's rate plans are comparable to the ILECs' rate plans;

⁹ Neither the Commission's *Annual Certification Order* nor FCC Rule 54.209(a)(3) establishes the time period to be covered by a report of unfulfilled requests for service. January 1 through December 31 would seem to be an appropriate time period for the initial report; therefore, Alltel is reporting information from the previous calendar year. Future unfulfilled requests for service will also be reported based on a January 1 through December 31 period. See footnote 8, *supra*.

otherwise, Alltel would not attract customers and therefore would not receive any universal service support.

F. Certification Regarding The FCC's Ability To Provide Equal Access

The Commission's Checklist requires Alltel to certify that the FCC, pursuant to 47 U.S.C. § 332(c)(8), may require the Company to provide equal access to long distance carriers within one of its Designated Areas in the event that no other ETC is providing equal access. Alltel certifies that it will provide equal access in such an event, as required by the FCC.

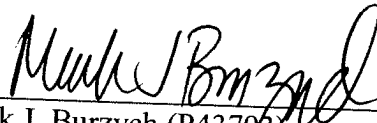

V. CONCLUSION

Based on the foregoing information, Alltel respectfully requests the Commission to certify to the FCC and USAC by October 1, 2006, its eligibility to receive federal universal service support for calendar year 2007 in accordance with 47 C.F.R. §§ 54.313 and 54.414.

**CONSUMER PRIVACY STATEMENT;
LIFELINE OUTREACH AND ADVERTISEMENT**

PRIVACY STATEMENT

We limit the information collected about you to what is needed for conducting business and offering products and services that might be of interest to you. You may choose to provide individually identifiable information (such as name, address, telephone number or e-mail address) to Alltel in a number of ways through our Web site — by ordering a service from us, sending us e-mail, registering to receive news or public information or applying for a job.

We do not:

- Collect individually identifiable information from you unless you provide it to us.
- Sell the names and addresses of visitors to our site to unaffiliated suppliers, without providing information on that disclosure where the individually identifiable information is collected.

We do:

- Use security techniques designed to protect customers' information from unauthorized access. See Information Security below.
- Collect, maintain and use customer information as necessary to provide the most helpful and targeted products and services to meet customers' needs (e.g. customer care or new products or services).
- Honor customers' requests to remove their names from our telephone or mail solicitation lists using reasonable efforts to delete the information from existing files. Just contact us.
- When undertaking projects with other companies, provide access to customer information with an understanding that our business partners will also treat the information with respect for privacy concerns.

In addition to individually identifiable information, we may collect information automatically when a visitor enters an Alltel site, such as the domain name, browser, the type of computer operating system, information about the Web page from which the visitor linked to the site, and time spent on different pages within the site. We may use this information to evaluate and improve the site, and may share the information with business partners and others.

Cookies

A cookie is a small, encrypted data string our server writes to your hard drive that contains your unique Alltel.com User ID. We use cookies to deliver Web content specific to your interests and to control access to your personal shopping cart after your initial entry. The cookie permits the server to recall information from your previous shopping trip, should you decide to think about your purchase or talk it over with your spouse. A cookie is not used to access or otherwise compromise the data on your hard drive. With most browsers, you can choose to change your browser settings to disable cookies. Please be aware that cookies may be required to complete certain functions on Alltel.com.

Information Security

We have security measures in place to protect against the loss, misuse and alteration of information under our control. When you place an order, the information you submit is encrypted using the Secure Sockets Layer (SSL) protocol.

Value Added

Because we appreciate the trust you have placed in us, we continually look for ways to enhance that business relationship. So from time to time, we may let you know about a product or service. Using the information you have provided to us, we strive to limit our offers to those we think you would appreciate receiving. We want every contact you have with us to be a positive experience. So if you would prefer not to receive these value-added services, offers and opportunities, just contact us.

Children

Children should consult with their parents or guardian before furnishing any data to us. We believe that parents should supervise their children's on-line activities and may consider using one of a number of available parental

May, 2005

control tools that provide a child-friendly, on-line environment and can prevent children from disclosing individually identifiable information without parental consent. If a child has provided individually identifiable information without the consent of a parent or guardian, that parent or guardian should just contact us to request that the information be deleted from our records. Get more information about parental controls.

Links

Alltel is not responsible for content or privacy policies of other sites. You should keep this in mind when accessing sites through links on Alltel's Web site.

Updates

As with all Alltel sites, we will constantly strive to improve the services we may offer, and may update this privacy statement from time to time in connection with that effort. We reserve the right to expand our capabilities for information collection and use, and may change our policies along with this privacy statement at any time.

Alltel Corporation

Muskegon, Michigan 49442

To Whom It May Concern:

Alltel Communications, Inc, (a wireless carrier) has been designated an Eligible Telecommunications Carrier (ETC) in certain localities in Michigan. As an ETC, Alltel is required to offer Lifeline reduced rate telecommunications service to consumers who qualify.

In an effort to expand Lifeline outreach in the State of Michigan, Alltel is requesting that you post the attached notice in your office.

If I can be of further assistance, please contact me at 425.586.8287.

Sincerely,

Suzie Rao
Regulatory Counsel

Federal Lifeline Notice

Alltel customers may be eligible to receive monthly reduced rate telecommunications service under the Federal Lifeline and Link-Up programs if they satisfy federal eligibility criteria.

If you think you qualify,
please contact Alltel at
1-800-alltel9
for further information.

EXHIBIT D

ALLTEL SERVICE PLANS IN MICHIGAN

A description of the available rate plans eligible for universal service funding is attached to this **Exhibit D**. In addition to the attached service plans, Alltel provides service offerings to customers under grandfathered or legacy service plans that are no longer available to new subscribers. Each service plan includes the supported services required by FCC Rule 54.101(a)(1)-(9). Alltel's additional service plans are subject to change.

EXHIBIT E CONFIDENTIAL

CONFIDENTIAL APPENDIX E-1

DESCRIPTION OF 2005 IMPROVEMENTS OR UPGRADES

From April 2004 through December 31, 2005, Alltel received a total of \$9,720,159 in federal high-cost universal support for its Michigan Designated Areas. All of this support was used for the provision, maintenance and upgrading of facilities and services for which the support is intended consistent with 47 U.S.C. § 254(e) and 47 C.F.R. §§ 54.7, 54.313 and 54.314. For calendar year 2005, a brief description of specific network improvements and upgrades in the Michigan Designated Areas includes the following:

1. Expanded or enhanced coverage in the following areas:

[CONFIDENTIAL DATA BEGINS]

CONFIDENTIAL APPENDIX E-1

DESCRIPTION OF 2005 IMPROVEMENTS OR UPGRADES

2. Expanded or enhanced capacity in the following areas:

[CONFIDENTIAL DATA BEGINS]
